patient

Please don't send us back words.

The 1972 law provided insurance  
for those that did not have it.

People were dying. It wasn't originally  
meant for those with insurance.

I listen to the insurer talk

about it's The Dialysis Clinic

The Dialysis Clinics say it's the  
insurance.

But we the patient end up paying  
more money.

We are in the middle -

We are the sick ones.

I fail to understand why these  
two can't come to an agreement  
on prices without sacrificing  
we the patients.
