**Subject:** Trillium sale

Dear Mr Keeling,

The sale of Trillium to an out of state corporation epitomizes what is wrong with a corporate health care system. There is no way that draining millions of dollars out of our communities to a profit making corporation at the expense of those of us needing health care is sane or just. The justifications for benefit are not believable in ratio to the costs! What is the opportunity cost to people and providers that could be served? Please re-think this robbery and design a single payer system that cuts the profiteering out of human needs.
