Report of Independent Auditors

The Board of Trustees

BlueCross BlueShield North Carolina

We have audited the accompanying consolidated financial statements of Blue Cross Blue Shield of North Carolina and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 2016 and 2015, and the related consolidated statements of comprehensive income, changes in accumulated capital and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Blue Cross and Blue Shield of North Carolina and its subsidiaries at

December 31, 2016 and 2015, and the consolidated results of their operations and their cash flows for the years then ended in conformity with U.S. generally accepted accounting principles.

Report of Other Auditors on December 31, 2014 Financial Statements

The consolidated statements of comprehensive income, changes in accumulated capital and cash flows for the period ended December 31, 2014, were audited by other auditors who expressed an unmodified opinion on those statements on March 2, 2015.

1. Organization

Blue Cross and Blue Shield of North Carolina (BCBSNC; we; our; us; the Company) is a health services company domiciled in the state of North Carolina. The membership of BCBSNC and its subsidiaries (collectively the Company) totaled approximately 2.6 million members as of December 31, 2016. Including members served on behalf of other Blue plans, the Company's membership totaled approximately 3.7 million members served as of December 31, 2016. The Company's customers are located primarily in North Carolina, where the Company is licensed and operates. The Company provides a comprehensive spectrum of health benefits products and BCBSNC holds the exclusive licenses to use the Blue Cross® and Blue Shield® names and service marks in North Carolina. Health benefits offerings include preferred provider organization, or PPO, traditional indemnity medical, health maintenance organization, or HMO, Medicare supplement, Health Savings Account, or HSA, Medicare Advantage plans. The Company also offers a broad range of health benefits services for self-funded plans, including claims processing, stop-loss insurance, actuarial and reporting services, network access, medical cost management and other administrative services. In addition, the Company offers a range of other products, including coverage for dental, vision, group life, disability, accidental death and dismemberment, long-term care, prescription drugs including Medicare Part D, vision hardware, mental health, substance abuse, and chiropractic benefits. The Company offers these products and services to large and small employers, groups and government units as well as individuals.

As of December 31, 2016, BCBSNC had four wholly-owned subsidiaries: Corium, LLC ("Corium"); Corium II, LLC ("Corium II"); Blue Cross and Blue Shield of North Carolina Senior Health ("Senior Health"); and NobleHealth, Inc. ("NobleHealth"). Corium owns, operates, and manages financed office buildings of the Company. Corium II owns, operates, and manages unencumbered office buildings of the Company. Senior Health will provide Medicare plans in the future. NobleHealth holds non-controlling strategic investments in certain health services companies and has four wholly-owned subsidiaries: Mosaic Group Services, LLC ("Mosaic Group"); Mosaic Health Solutions, LLC ("Mosaic Health Solutions"); Noble Benefit Services, LLC ("NBS"); and Topaz Shared Services, LLC ("Topaz"). Mosaic Group functions as an insurance agency selling third-party life and disability and death and dismemberment products and is licensed as a third-party administrator. Mosaic Health Solutions has one wholly-owned subsidiary, ACS Benefit Services, LLC ("ACS") and also holds non-controlling strategic investments in certain health services companies. ACS provides self-funded plans with complete third-party administration services for group medical, dental and disability benefits. NBS will function as a third-party administrator for self-insured employer groups. Topaz provides a healthcare payer operating system.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements are prepared in conformity with generally accepted accounting principles (GAAP) in the United States (US). Preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the amounts of revenues and expenses during the reporting period. The Company uses estimates and assumptions based on analytical and/or actuarially accepted quantitative methods in determining contract reserves and claims incurred but not yet reported, valuation of pension and other benefit plans, deferred income taxes, fair value of investments, other-than-temporary impairments and other valuation accruals. Actual results could differ materially from those estimates.

The consolidated financial statements include the accounts of BCBSNC and all of its wholly-owned subsidiaries. All significant intercompany transactions and accounts have been eliminated in consolidation.

Certain prior year balances have been reclassified to conform to current year presentation in the accompanying consolidated financial statements. These reclassifications resulted in no change to previously reported amounts of accumulated capital, income before taxes, or net income. As a result of the change of presentation of Book and Bank overdrafts, the Consolidated Statements of Cash Flows changed. The line Net cash provided by (used in) operating activities decreased by $25,864 in 2015 and increased by $127,954 in 2014. The

line Net cash provided by (used in) financing activities increased by $25,864 in 2015 and decreased by $127,954 in 2014.

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued guidance that would require an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The updated standard will replace most existing revenue recognition guidance in U.S. GAAP, except those related to insurance contracts, when it becomes effective and permits the use of either a full retrospective or retrospective with cumulative effect transition method. Early adoption is not permitted. In July 2015, the FASB deferred the effective date provided in the new revenue guidance by one year. Giving effect to this deferral, the new guidance is effective for annual reporting periods beginning after December 15, 2018. The Company has not yet selected a transition method and is currently evaluating the effect that the updated standard will have on the consolidated financial statements.

In August 2014, the FASB issued guidance over the disclosure of uncertainties about an entity's ability to continue as a going concern. The guidance explicitly requires management to evaluate, at each annual or interim reporting period, whether there are conditions or events that exist which raise substantial doubt about an entity's ability to continue as a going concern and to provide related disclosures. We adopted this new guidance effective January 1, 2016 which did not have a material impact on our consolidated financial statements.

In February 2015, the FASB issued consolidation guidance that modifies the evaluation of whether limited partnerships and similar legal entities are variable interest entities or voting interest entities, eliminates the presumption that a general partner should consolidate a limited partnership, and affects the consolidation analysis of reporting entities that are involved with variable interest entities. The new guidance is effective beginning with annual reporting periods beginning after December 15, 2016, with early adoption permitted. All legal entities are subject to reevaluation under the revised consolidation model. We adopted this new guidance effective January 1, 2016 which did not have a material impact on our consolidated financial statements.

In April 2015, the FASB issued new guidance requiring entities to present debt issuance costs related to a recognized debt liability as a direct deduction from the carrying amount of that debt liability. This standard is effective beginning with annual reporting periods beginning after December 15, 2016. The adoption of the new guidance will not have a material impact on our consolidated financial statements.

In April 2015, the FASB issued new guidance to help entities determine whether a cloud computing arrangement contains a software license that should be accounted for as internal-use software or as a service contract. The guidance is effective beginning with annual reporting periods beginning after December 15, 2016, with early adoption permitted. Upon adoption, an entity has the option to apply the provisions either prospectively to all arrangements entered into or materially modified, or retrospectively. The adoption of the new guidance will not have a material impact on our consolidated financial statements.

In May 2015, the FASB issued new guidance requiring insurance entities to provide additional disclosures about claim liabilities including paid claims development information by accident year and claim frequency data and related methodologies. The guidance is effective for annual periods beginning after December 15, 2016 with early adoption permitted. We are currently evaluating the impact the new guidance will have on our disclosures.

In November 2015, the FASB issued new guidance which eliminates the current requirement to present deferred tax liabilities and assets as current and noncurrent in a classified balance sheet. Instead, we will be required to classify all deferred tax assets and liabilities as noncurrent. The guidance is effective for annual periods beginning after December 15, 2017. The adoption of the new guidance will not have a material impact on our consolidated financial statements.

In January 2016, the FASB issued new guidance related to classification and measurement of financial instruments which requires equity securities that are not accounted for using the equity method or that do not result in consolidation, to be accounted for at fair value with changes in fair value recognized through net income. The

new guidance is effective beginning after December 15, 2018 with early adoption permitted under certain circumstances. We are currently evaluating the impact on our consolidated financial statements.

In February 2016, the FASB issued new guidance related to accounting for leases which requires lessees to record assets and liabilities reflecting the leased assets and lease obligations, respectively, while following the dual model for recognition in statements of income requiring leases to be classified as either operating or finance. Operating leases will result in straight-line expense (similar to current operating leases) while finance leases will result in a front-loaded expense pattern (similar to current capital leases). The guidance is effective beginning with annual periods beginning after December 15, 2019, with earlier adoption permitted, and requires retrospective application to previously issued financial statements. We are currently evaluating the impact on our consolidated financial statements.

In June 2016, the FASB issued new guidance introducing a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses. The new current expected credit losses (CECL) model generally calls for the immediate recognition of all expected credit losses and applies to loans, accounts and trade receivables as well as other financial assets measured at amortized cost, loan commitments and off-balance sheet credit exposures, debt securities and other financial assets measured at fair value through other comprehensive income, and beneficial interests in securitized financial assets. The new guidance replaces the current incurred loss model for measuring expected credit losses, requires expected losses on available-for-sale debt securities to be recognized through an allowance for credit losses rather than as reductions in the amortized cost of the securities, and provides for additional disclosure requirements. Our investment portfolio consists of available for sale debt securities. The guidance is effective beginning with annual periods beginning after December 15, 2020. We are currently evaluating the impact on our consolidated financial statements.

In August 2016, the FASB issued new guidance addressing the classification of certain cash receipts and cash payments. The intent of this guidance is to provide consistency in the presentation and classification of cash receipts and payments within the statement of cash flows. The guidance is effective beginning with annual periods beginning after December 15, 2018 with early adoption permitted and should be applied on a retrospective basis. We are currently evaluating the impact on our consolidated financial statements.

Risks and Uncertainties

Unfavorable economic conditions could materially and adversely affect our revenues and our results of operations. For example, high unemployment rates could cause lower enrollment or lower rates of renewal in our employer group plans. Unfavorable economic conditions could cause employers to stop offering certain health care coverage as an employee benefit or elect to offer this coverage on a voluntary, employee-funded basis as a means to reduce their operating costs. In addition, unfavorable economic conditions could adversely impact our ability to increase premiums or result in the cancellation by certain customers of our products and services. All of these could lead to a decrease in our membership levels and premium and fee revenues and could materially and adversely affect our results of operations, financial position and cash flows.

Our investment portfolio may suffer losses, which could materially and adversely affect our results of operations, financial position and cash flows. Market fluctuations could impair our profitability and capital position. Volatility in interest rates affects our interest income and the market value of our investments in debt securities of varying maturities, which comprise a majority of the fair value of our investments as of December 31, 2016.

We also allocate a proportion of our portfolio to equity and alternative investments, which are subject to greater volatility than fixed income investments. General economic conditions, stock market conditions, and many other factors beyond our control can materially and adversely affect the value of these investments and may result in investment losses.

There can be no assurance that our investments will produce total positive returns or that we will not sell investments at prices that are less than their carrying values. Changes in the value of our investment assets, as a result of interest rate fluctuations, changes in issuer financial conditions, illiquidity or otherwise, could have an

adverse effect on our equity. In addition, if it became necessary for us to liquidate our investment portfolio on an accelerated basis, it could have a material adverse effect on our results of operations.

Investments made in healthcare companies are not guaranteed to produce positive results. Our financial results may be impacted by a number of factors including, but not limited to, the failure of companies in which we invest to achieve business and operating plans, failure of these companies to adapt to a rapidly changing healthcare environment, and the inability of these companies to attract and retain key executives and employees. Additionally, negative changes in the financial markets could result in lower valuations (impacting the carrying value of investments already made) and the inability of these companies to access capital or to access capital on favorable terms. The impact of some or all of these risks could result in the impairment of our investment.

We routinely process, store, and transmit large amounts of data in our day to day operations. Such data includes sensitive personal, proprietary or confidential information relating to our customers, our business or other third-parties. Some of this data may be processed, stored, and transmitted outside of the U.S. because of operational reliance on strategic vendors.

The possibility of security incidents resulting in a breach of our information systems and/or sensitive information are constant risks to our organization. Notwithstanding the proactive and aggressive measures we employ to prevent them, experienced cyber criminals may be able to penetrate our layered security controls and misappropriate or compromise sensitive information given sufficient time and resources. Such attacks could create system disruptions or cause shutdowns, or may result in the deployment of malicious software programs, such as viruses and worms, that could infect our systems or otherwise exploit any security vulnerabilities. Physical attacks and disruptions are also a risk. Our facilities may be subjected to security incidents or security attacks; acts of vandalism or theft; coordinated attacks by activist entities; misplaced or lost data; human errors; or other similar events that could negatively affect our systems and our customers' data.

The costs associated with threat mitigation and vulnerability remediation to prevent a breach or cyber-incident are significant, but potentially much greater when such activities are forced to occur after an event. Such efforts are always impactful and may not always be successful. Service interruptions, delays or complete lack of service resulting in customer dissatisfaction and the loss of existing or new customers are additional impacts associated with these activities. Breaches of our security measures and the unauthorized disclosure of sensitive information could expose our customers to the risk of medical identity theft or financial harm. Additionally, such breaches could expose us or other third-parties to loss or misuse of sensitive information, resulting in litigation and potential liability for us, damage our brand and reputation, or otherwise harm our business.

Substantially all of the Company's cash and cash equivalents are held in either deposits at financial institutions or in commercial paper with a high quality investment grade rating. Credit losses are not anticipated. All fixed income securities are rated investment grade at the time of purchase by nationally recognized rating agencies, and the credit ratings are continuously reviewed by management. The portfolio is diversified by limiting each individual non-government issuer concentration to no more than 5% of the portfolio.

We are dependent on the success of our relationship with a large vendor for a significant portion of our information system resources and certain other vendors for various other services. We have an agreement with Fujitsu America, Inc (Fujitsu). for the operation of our Information Technology systems and are dependent upon them for support functions. We also have agreements with other vendors to provide call center, claims processing, enrollment and billing, and fulfillment support. Additionally, we have vendor dependencies associated with various workflow and transactional systems critical to our operations. Should these vendors be unable to provide their services, our operations and financial stability may be significantly impacted, but more importantly we may not be able to meet the demands of our customers.

The inability to bring a scalable and flexible information technology infrastructure to support and deliver on the current and anticipated future needs of the business in an efficient, cost effective and well-controlled manner could impact results of operations, financial position and cash flows. Our new core technology suite and business model is intended to provide core operating capabilities including enrollment, claims-processing and customer services with the explicit goals of reducing our operating costs and increasing speed-to-market and

market offer flexibility. This core platform has been in service for our Small Group market since July 2014 and Individual Under 65 market since January 2016, with additional markets migrating as we add new functionality. The migration of our Individual Under 65 market initially had challenges which impacted customers and required additional expenses to mitigate. These challenges have now been stabilized. We will migrate remaining markets over a number of years. Completion of this program could favorably position the Company and improve our price competitiveness and speed-to-market. However, changes in the Topaz business model could also impact the migration plan. Execution risk exists on a program of this magnitude and complexity, while the business and operating cost value is largely delivered upon completion of the migration.

In addition, federal and state regulatory agencies may further restrict our ability to implement necessary changes in premium rates to earn our target contribution to surplus or impose additional restrictions, under new or existing laws, such as minimum medical loss ratio requirements or restricted definitions of costs to be included when calculating medical loss ratios under such definitions. Our ability to secure sufficient premium rates, including regulatory approval for and implementation of such rates on a timely basis, may be restricted by changes in federal and state regulations or by the application of existing federal and state regulations. A limitation on our ability to increase or maintain our premium rates and more restrictive medical loss ratio requirements could adversely affect our business, cash flows, financial condition and results of operations.

A wide variety of factors could result in volatility of medical losses in any given year. These factors include economic and regulatory risks whereby state and federal budgets could be materially and adversely affected, resulting in reduced reimbursements or payments for federal and state government health care coverage programs, including Medicare. A reduction in state reimbursement rates could be implemented retrospectively to payments already negotiated and/or received from the government and could indirectly affect our results of operations, financial position and cash flows. In addition, the state and federal budgetary pressures could cause the government to impose new or a higher level of taxes or assessments for our commercial programs, such as premium taxes on insurance companies and health maintenance organizations and surcharges or fees on select fee-for-service and capitated medical claims, and could materially and adversely affect our results of operations, financial position and cash flows. New types of medical treatments or prescription drugs could emerge during the policy period or after the time premiums are established and approved by regulators, resulting in higher medical losses than expected. Finally, the actual size of a buying market or participation in a given market may vary from what is assumed at the time premiums are set, resulting in higher average medical costs in a risk pool and insufficient revenue.

Depending on the consolidation and integration of physician groups and hospitals, reimbursement strategies vary across markets. Fee-for-service is our predominant reimbursement methodology for physicians, but we are transitioning to a value-based payment program. More traditional physician fee schedules are developed at the state and regional level based on an assessment of several factors and conditions, including the Centers for Medicare & Medicaid Services ("CMS"), resource-based relative value system, medical practice cost inflation and physician supply. In addition, we have implemented and continue to expand physician incentive contracting, or "pay for performance", which ties physician payment levels to performance on quality and clinical outcomes. As providers continue to consolidate, we may experience upward pressure on reimbursement amounts and, in turn, our business, cash flows, financial condition and results of operations may be harmed.

Additionally, accountable care organizations; practice management companies (which are companies that aggregate physician practices for administrative efficiency); and other organizational structures that physicians, hospitals and other care providers choose may change the way in which these providers interact with us and may change the competitive landscape. Such organizations or groups of physicians may compete directly with us, which could adversely affect our operations, and our results of operations, financial position and cash flows by impacting our relationships with these providers or affecting the way that we price our products and estimate our costs, which might require us to incur costs to change our operations.

Another risk that may develop relates to changes and disruption being incurred in our marketplace. The traditional payer-provider dynamic is being challenged by providers looking to expand into the payer space and create their own health plans. New entrants into the insurance space that heavily focus on automation and lower administrative expense create competition for payers. And finally, new technologies and delivery models may

carve out the need for the traditional payer and provider service models. As these disruptive risks appear on the horizon, we are assessing them and planning for our best mitigation strategies to adapt our business model to take advantage of the changes while still providing value to our members as an enterprise.

The passage of the Affordable Care Act (ACA) in 2010 has resulted in dynamic changes in the provision of health insurance. The law brought many substantive changes to the health insurance market and has had a significant impact on health insurer operations. Some of the larger and more far-reaching requirements of the law include the individual and employer mandates, federal subsidies for low and middle income consumers, establishment of a standard set of benefits in the individual and small group markets (known as the Essential Health Benefits), a new online Marketplace for consumers to compare and purchase health insurance, more stringent rating restrictions as well as increased review and scrutiny of rate increases. Additionally, the law has imposed numerous new taxes and fees on insurers. While many of these provisions of the law have been in effect for several years, health insurance issuers continue to feel the far-reaching effects of a litany of subsequent regulations and guidance implementing the law.

Federal and state regulatory changes in December 2013 allowed certain individuals to maintain their current pre-ACA plans that are not compliant with health care reform, which led to higher than previously expected retention of existing underwritten health plans. As this was the case with many issuers across many states, this resulted in many consumers who would have bought ACA compliant plans, staying in either grandfathered or transitional (grandmothered) plans. Per federal guidance, these policies are now set to end at the end of 2017.

In addition, the ACA has increased federal oversight of health plan premium rates and could adversely affect our ability to appropriately adjust health plan premiums on a timely basis. Financing for these reforms comes, in part, from material additional fees and taxes.

Given the breadth of possible changes and the uncertainties of interpretation, implementation, and timing of these changes, health care reform broadly has and will continue to change how we do business. These changes are likely to impact pricing, benefit design, product offering, and sales distribution channels. The response of insurance issuers, the market overall, and adjustments to plan offerings has caused some disruption in health care markets. Several national and state level issuers have experienced significant losses as a result of older and sicker members than expected enrolling in ACA plans, both within and outside of the Exchange. It is possible that health care reform and related regulations, as well as future legislative and regulatory changes, including legislative restrictions on issuers' ability to manage provider networks or otherwise operate business, may have a sustained material adverse effect on our results of operations, financial position, and cash flows.

In the 2015 federal budget bill, Congress specified that the ACA's risk corridor program must be budget neutral, with distributions not exceeding collections. In October 2015, CMS announced that for the 2014 benefit year, they would pay insurers expecting risk corridor payments 12.6% of their requested amount due to a shortfall with insurers having requested $2.87 billion in payments and CMS has received $362 million (in aggregate). The notice repeated CMS' intention to pay the remaining 2014 amounts due out of 2015 and 2016 receivables. CMS stated that in the event of a shortfall in the program after the 2016 benefit year, they will 'explore other sources of funding for risk corridors payments'. In November of 2016, CMS announced that all 2015 risk corridor collection amounts will be used to pay outstanding 2014 due amounts and that no funding would be available to pay 2015 amounts due. The 2015 payment amount is approximately 3.5% of the total 2014 requested amount. This continued uncertainty regarding receipt of risk corridor owed amounts makes financial forecasting and reporting increasingly challenging.

The election of Donald Trump as President, coupled with Republican majorities in both houses of Congress and promises to repeal and replace the ACA, indicate some level of change is expected for health reform. While the actual policy changes are unknown, it is likely that reform efforts will focus on common Republican-supported themes including repeal of both the individual and employer mandates, the pursuit of the sale of health insurance across state lines, promoting greater use of health savings accounts (HSAs) and continuous coverage incentives such as late enrollment penalties seen in Medicare.

The US House of Representatives lawsuit (US House of Representatives v. Burwell) challenging the ability of the Department of Health and Human Services (HHS) to make Cost Sharing Reduction (CSR) payments to insurers is an additional source of financial uncertainty. CSR plans are available to enrollees at or below 250% of the Federal Poverty Level (FPL). CSR Plans provide lower deductibles, copayments, coinsurance, and out-of-pocket maximums for enrollees. HHS makes CSR payments directly to BCBSNC as reimbursement for the lower cost-sharing amounts provided in CSR plans.

In the lawsuit, the House of Representatives maintains that the funds HHS is using to make CSR payments requires a direct appropriation from Congress. The House of Representatives maintains that as Congress did not provide a specific line item appropriation for CSR payments, HHS has not been granted the right or authority to make a distribution from the Treasury. The Obama administration maintains that CSR payments and the Advance Premium Tax Credit (APTC or subsidies as they are known) are inextricably linked (as eligibility for CSR is triggered by APTC eligibility); thus the appropriation of funds for APTC serves as an appropriation for CSRs as well.

In May 2016, a federal judge ruled in favor of the House of Representatives that the Administration does not have the power to spend money on CSR payments to insurers without an appropriation from Congress. Though Congress authorized the program, they never actually provided money for it. The Administration appealed the ruling to the U.S. Court of Appeals for the DC Circuit Court and will continue to make CSR payments while the case is on appeal. The judge stayed the ruling so it will not go into effect while the decision is being appealed. A decision is expected early in 2017. However, there is some uncertainty as to how vigorously the current Administration will pursue the appeal.

Absent a change in direction from the current Administration, many believe that the case will continue to be appealed and ultimately decided by the U.S. Supreme Court. The challenge for BCBSNC is that we are required to offer CSR plans to eligible individuals as part of our Qualified Health Plan (QHP) issuer agreement with the Federal Exchange, and this agreement covers the entire plan year. If the CSR payments from HHS are deemed inappropriate, CSR payments to BCBSNC could possibly be stopped soon after a ruling but we would still be required to offer CSR plans for the remainder of the plan year, as stipulated in our signed issuer agreement. The timing of a final decision is unknown, but may still be years away.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with an original maturity of three months or less and not restricted to be cash equivalents. Cash equivalents totaled $56,752 and $55,903 as of December 31, 2016 and 2015, respectively. Cash and cash equivalents are carried at cost, which approximates fair value due to the short maturity of these assets.

Included in other noncurrent assets as of both December 31, 2016 and 2015 are restricted money market funds and bonds of $30,949 and $33,005, respectively, which were on deposit with the state of North Carolina in accordance with contractual requirements.

Investments

All investments are categorized as available-for-sale and are recorded at their fair values as of the balance sheet date. The Company records purchases and sales as of the trade date. Fixed income securities are classified as either current or noncurrent assets based on their contractual maturities as well as management's expectations as to when they will be sold. If the Company does not intend to sell the fixed income security, management considers available evidence to assess whether it is more likely than not the Company will be required to sell the security before the recovery of its amortized cost basis. Equity securities are primarily classified as current as they are available for use for current operations. Certain securities, which are used to satisfy contractual, regulatory or other requirements, continue to be classified as long-term, without regard to contractual maturity. Venture capital investments, real estate funds, private equity funds and private equity securities are classified as noncurrent assets.

Realized gains and losses, including other-than-temporary impairments that are determined to be due to credit, are included in income. Unrealized gains, unrealized losses estimated to be temporary in nature and other-than-temporary impairments determined to be non-credit related, net of deferred income taxes, are reflected in

accumulated capital as Accumulated Other Comprehensive Income (Loss) (AOCI). Realized gains and losses on investments sold are determined on the specific identification basis. Interest and dividend income is recorded on the accrual basis.

Declines in the fair value of invested assets below cost are compiled on a monthly basis and reviewed quarterly to assess whether any other-than-temporary impairment loss should be recorded. Various thresholds are used to identify those securities which are at the greatest risk of an other-than-temporary impairment. Impairment losses for declines in value of fixed income investments and equity securities below cost attributable to issuer-specific events are based upon all relevant facts and circumstances for each investment and are recognized when appropriate. Some, but not all, of the factors considered in evaluating financial condition are earnings trends, industry outlook, negative cash flows, profitability, capital, the length of time below book value, downgrade of debt ratings and asset quality which could lead to an other-than-temporary impairment of any security. U.S. Treasury securities with unrealized losses are deemed to be temporarily impaired, with unrealized losses due to interest rate changes and not due to credit related factors. For fixed income investments with unrealized losses due to market conditions or industry-related events and where no specific evidence of deterioration of the issuers' credit exists, if the Company does not intend to sell the fixed income security and management does not consider it to be more likely than not the Company will be required to sell the security before a market recovery or maturity, declines in value below amortized cost are not assumed to be other-than-temporary.

When an other-than-temporary impairment loss is determined to have occurred on equity securities, the losses are recognized in the Consolidated Statements of Comprehensive Income. The way in which impairment losses on fixed income securities are recognized in the financial statements is dependent on the facts and circumstances related to the specific security. If the Company intends to sell a security or it is more likely than not that we would be required to sell a security before the recovery of its amortized cost, less any current period credit loss, the Company recognizes an other-than-temporary impairment in the Consolidated Statements of Comprehensive Income for the difference between amortized cost and fair value. If the Company does not expect to recover the amortized cost basis, does not plan to sell the security and if it is not more likely than not that the Company would be required to sell a security before the recovery of its amortized cost, less any current period credit loss, the recognition of the other-than-temporary impairment is bifurcated. The Company recognizes the credit loss portion in net income and the noncredit loss portion in AOCI.

The credit component of an other-than-temporary impairment is determined by comparing the net present value of projected future cash flows with the amortized cost basis of the fixed income security. The net present value is calculated by discounting our best estimate of projected future cash flows at the effective interest rate implicit in the fixed income security at the date of acquisition. For mortgage-backed and asset-backed securities, cash flow estimates are based on assumptions regarding the underlying collateral including expected prepayments, vintage, type of underlying asset, geographic concentrations, default rates, recoveries and changes in value of the underlying collateral. For all other fixed income securities, cash flow estimates are driven by assumptions regarding probability of default, including changes in credit ratings, and estimates regarding timing and amount of recoveries associated with a default.

Fair value is determined by quoted market prices, where available. For securities not actively traded, fair values were estimated using values obtained from independent pricing services or quoted market prices of comparable instruments. Management judgment is involved in evaluating whether a decline in an investment's fair value is other-than-temporary. The discovery of new information and the passage of time can change these judgments. Impairment judgments are revised when new information becomes known and any resulting impairment adjustments are made at that time.

Ownership in Investee Companies

The Company, through its wholly-owned subsidiary, NobleHealth, had ownership in Mosaic Health Solutions which has ownership in several investee companies in the amount of $166,589 and $135,079 as of December 31, 2016 and 2015, respectively. Ownership interest amounts ranged from 1% to 45%. These investments are included in the Other assets line item in the Consolidated Balance Sheets and make up 7.0% and 4.4% of total invested assets at year end in 2016 and 2015, respectively.

These investments are accounted for under the equity method of accounting and the Company has elected the fair value method for such investments as they have determined that fair value best reflects the economics of these investments. These investments were valued using quantifiable data from the portfolio company, recent portfolio company financing events, discounted cash flows, and relevant revenue, market, earnings before interest, tax, depreciation and amortization (EBITDA), or similar multiples for comparable companies and transactions. Earnings in 2016 and 2015 for these investments were $14,372 and $34,194, respectively, which was recorded in Other income.

Premiums and Other Receivables

Premiums and other receivables include the uncollected amounts due from insured and self-funded customers and the federal government for amounts related to Medicare Advantage. Also, included in other receivables are the uncollected amounts of drug rebates, interest, certain profit sharing arrangements and other miscellaneous receivables. Premiums and other receivables are reported net of any allowance for uncollectible amounts. The allowance for uncollectible receivables is estimated each period and a valuation allowance is recorded based upon the age of unpaid amounts and other information about the customers as well as management's judgment regarding the ability of the customers to pay outstanding amounts. Estimates of uncollectible accounts receivable are revised each period, and changes are reflected in the operating expense line of the Consolidated Statements of Comprehensive Income in the period they become known. At December 31, 2016 and 2015, the Company recorded a valuation allowance of $12,956 and $17,402 respectively.

The Company's pharmacy benefit manager (PBM) contracts with pharmaceutical manufacturers, some of whom provide rebates based on use of the manufacturers products by the PBM for the Company's insured and self-funded customers. The Company accrues the rebates receivable monthly based on the terms of the applicable contracts. The PBM bills these rebates to the manufacturers on a quarterly basis. The Company is reimbursed either annually or quarterly for these rebates. The Company records the rebates attributable to insured customers as a reduction to claims and medical expenses. The rebates attributable to self-funded customers are accrued as rebates receivable as well as a corresponding payable to self-funded customers in accordance with their contracts.

Affordable Care Act Risk Management Programs

Beginning in 2014, as prescribed by health care reform, three programs, commonly referred to as the 3R's, went into effect to reduce the risk for participating health insurance companies selling coverage on the public exchanges.

A three-year (2014-2016) reinsurance program is designed to provide reimbursement to insurers for high claims dollars resulting from individual business sold on or off the public exchanges. The reinsurance entity established by HHS is funded by a per-customer reinsurance fee assessed on all commercial medical plans, including self-insured group health plans. Only non-grandfathered individual plans are eligible for recoveries if claims exceed a specified threshold, up to a reinsurance cap. Reinsurance contributions associated with non-grandfathered individual plans are reported as a reduction in premium revenue, and estimated reinsurance recoveries are established with an offsetting reduction in medical claims expense. Reinsurance fee contributions for other insured business are reported in other operating expenses. After fully reflecting completed actual claims experience and sufficient claims run-out, development factors were set and used to record the reinsurance receivable. At December 31, 2016 and 2015, the Company had a reinsurance receivable of $100,839 and $235,434, respectively. In 2016, the Company collected $197,800 reinsurance with outstanding reinsurance receivable of $24,257 related to 2015. In 2015, the Company collected all of the reinsurance for 2014.

A permanent risk adjustment program reallocates funds from insurers with lower risk populations to insurers with higher risk populations based on the relative risk scores of participants in non-grandfathered plans in the individual and small group markets, both on and off the exchanges. Based on the risk of our members compared to the risk of other members in the same state and market, considering data obtained from industry studies and our proprietary market data, we estimate our year-to-date risk adjustment. The Company records a risk adjustment receivable or payable, with an offsetting adjustment to premium revenue when the amounts are reasonably estimable and collection is reasonably assured. To determine this amount, we used 3rd party consultant studies to supplement our own estimates in both years. These results were validated with internal

actuarial models. At December 31, 2016 and 2015, the Company had a risk adjustment receivable of $165,000 and $98,980, respectively. In 2016, the Company collected $83,300 of the risk adjustment receivable for 2015. The Company does not have an outstanding receivable on risk adjustment for 2015. In 2015, the Company collected the vast majority of the risk adjustment receivable established in 2014.

A three year (2014-2016) risk corridor program is designed to limit insurer gains and losses by comparing allowable costs to a target amount as defined by HHS. This program applies to individual and small group qualified health plans, operating on and off the exchanges. Variances from the target amount exceeding certain thresholds may result in amounts due to or due from HHS. The Company records a risk corridor receivable or payable as an adjustment to premium revenue based on our year-to-date experience when the amounts are reasonably estimable. At December 31, 2016 and 2015, the Company had a risk corridor receivable of $341,041 and $359,722 respectively.

In December 2014, the 2015 Continuing Resolution Omnibus Bill was approved by Congress and signed into law. Due to the lack of appropriation in the budget for the risk corridor program and the likelihood that payments required to be made by CMS would exceed amounts collected to fund the program, the Company evaluated the collectability of the risk corridor receivable and determined that it was probable that none of the 2015 amounts due from CMS would be collected and none of the 2016 amounts would be collected. As a result, the Company had a reserve of $325,919 and $301,868 as of December 31, 2016 and 2015, respectively.

The following is a summary of the 3R's as of December 31, 2016. Amounts are classified as current or long-term in the accompanying Consolidated Balance Sheets based on the timing of expected settlement.

	Reinsurance Recoveries	Risk Adjustment	Risk Corridor
Current assets	$100,839	$165,000	$3,040
Non-current assets	-	-	$12,081
Net asset (liability)	$100,839	$165,000	$15,121

The following is a summary of the 3R's as of December 31, 2015.

	Reinsurance Recoveries	Risk Adjustment	Risk Corridor
Current assets	$235,434	$98,980	$3,040
Non-current assets	-	-	54,814
Net asset (liability)	$235,434	$98,980	$57,854

Federal Employee Program

The Company participates in the Federal Employee Health Benefits Program (FEHBP) with other BlueCross BlueShield Plans. This program includes a fully-insured experience-rated contract, commonly known as the Federal Employee Program (FEP), between the Office of Personnel Management (OPM) and the Blue Cross Blue Shield Association (BCBSA), which acts as an agent for the participating BlueCross BlueShield plans. In addition, each participating plan, including the Company, executes a contract with BCBSA which obligates each participating plan to underwrite FEP benefits in its service area. Premium rates are developed by BCBSA and negotiated with OPM annually. These rates determine the funds that will be available to the participating BlueCross BlueShield plans to provide insurance to Federal employees that enroll with the BlueCross BlueShield FEP. The excess of gross premiums for the life of the program over the charges for the life of the program on an accrual basis is accounted for as a rate stabilization reserve (commonly referred to as the special reserve), as required by the contract between OPM and BCBSA. Each year, OPM also allocates a portion of the premiums to a contingency reserve which may be utilized by the participating plans in the event that annual premiums paid to the insurance carrier are insufficient or the rate stabilization reserve falls below certain levels prescribed by OPM.

Premiums paid to the carrier and available to each participating BlueCross BlueShield plan, including the special reserve and the contingency reserve, are held at the U.S. Treasury, including amounts unused from prior periods. Any premiums that remain in the rate stabilization reserve upon termination of the BCBSA contract after the claims run-out and reimbursement of allowable administrative expenses would be returned to OPM for the benefit of the FEHBP. The FEP contract renews automatically each year unless written notice of termination is given by either party.

In accordance with the FEP contract, premium funds that exceed daily operating needs are held on behalf of the Company in letter of credit accounts at the U.S. Treasury to provide funding for claims, administrative expenses, and other charges to the contract. The Company, along with other BlueCross BlueShield plans who participate in the FEHBP contract, has an unrestricted right to draw funds being held in the U.S. Treasury, other than those allocated to the contingency reserve, for any valid claim or expense. If the balance of the special reserve is exhausted or falls below certain prescribed levels, OPM will transfer funds from the contingency reserve to the special reserve to the extent that funds are available in the contingency reserve. Amounts incurred in excess of the total reserves held at the U.S. Treasury for the FEP would not be reimbursed to the Company. The unaudited amounts being held in the special reserve are $6,824,353 and $4,970,499 as of September 30, 2016 and December 31, 2015, respectively. The unaudited amounts being held in the contingency reserve are $8,441,095 and $9,459,079 as of September 30, 2016 and December 31, 2015, respectively.

The Company has recorded its allocable share of the special reserve funds held in the U.S. Treasury as an asset, with an equivalent amount recorded as a rate stabilization reserve. These amounts are $43,286 and $15,429 as of December 31, 2016 and 2015, respectively, and are included in Other current assets and Other current liabilities in the accompanying Consolidated Balance Sheets. Additionally, the Company has recorded a mandatory statutory reserve for its FEP business. These amounts are $33,388 and $30,024 as of December 31, 2016 and 2015, respectively, and are included in Cash and other non-current liabilities in the accompanying Consolidated Balance Sheets.

Concentration of Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash equivalents, investments and premium and other receivables. All cash equivalents and investments are managed within established guidelines, which provide us diversity among issuers. Concentrations of credit risk with respect to premium and other receivables are related to our large number of payers comprising our customer base and the federal government.

FEP represented approximately 16.1% and 16.0%, of accounts receivable as of December 31, 2016 and 2015, respectively. ACA receivables represented 32.9% and 40.2% of accounts receivable as of December 31, 2016 and 2015, respectively. FEP and ACA receivables represented approximately 49.0% and 56.2% of accounts receivable for the years ended December 31, 2016 and 2015, respectively.

FEP represented approximately 14.4%, 13.6%, and 13.1% of net revenue for the years ended December 31, 2016, 2015 and 2014, respectively. FEP and ACA revenue represented approximately 42.3%, 41.2%, and 44.9% of net revenue for the years ended December 31, 2016, 2015 and 2014, respectively.

Property and Equipment

Property and equipment is stated at cost less accumulated depreciation and amortization. Depreciation and amortization is computed using the straight-line method over the estimated useful lives of the respective assets, which are 40 to 50 years for buildings, 3 to 10 years for furniture and equipment, and 2 to 10 years for computer equipment and software. Leasehold improvements are amortized using the straight-line method over the shorter of the lease term or estimated useful life of the asset. Upon disposition or retirement, assets and related accumulated depreciation accounts are relieved and any related gain or loss is reflected in the Consolidated Statements of Comprehensive Income. Property and equipment is evaluated annually for the existence of events or changes in circumstances that indicate the asset might be impaired. Property and equipment retired from use is classified as held for sale and is carried at the lower of its depreciated cost or fair value, less estimated costs to sell. The Company ceases depreciating these assets when they are classified as held for sale.

The Company develops software for internal use. Certain costs associated with the development or purchase of internal-use software are capitalized and amortized over the estimated useful lives of the software. All other development costs are expensed as incurred.

Goodwill and Intangible Assets

Goodwill represents the excess of cost of acquisition over the fair value of net assets acquired. Intangible assets represent the values assigned to acquired subscriber relationships and provider networks. Intangible assets are recognized as assets apart from goodwill because they meet one of two criteria: the contractual-legal criterion or the separability criterion. Goodwill is evaluated for impairment on an annual basis and more frequently if events or changes in circumstances indicate that the asset might be impaired. The Company first assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If after completing this assessment, it is determined that it is more likely than not that the fair value of a reporting unit is less than its carrying value, we then proceed to a two-step impairment testing methodology using the income approach (discounted cash flow method). In the first step of this testing methodology, we compare the carrying value of the reporting unit, including goodwill, with its fair value, as determined by its estimated discounted cash flows. If the carrying value of a reporting unit is less than its fair value, no impairment is considered to have occurred and step two of the impairment test is unnecessary. If the carrying value of a reporting unit exceeds its fair value, we then complete the second step of the impairment test to determine the amount of impairment to be recognized. In the second step, we estimate an implied fair value of the reporting unit's goodwill by deducting the fair value of all net assets of the reporting unit (including any unrecognized intangible assets, and excluding the goodwill) from its fair value as determined in the first step. Any remaining fair value after assigning fair value to the reporting unit's net assets represents the implied fair value of the goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, the Company records an impairment loss equal to the difference in that period.

Intangible assets are amortized over their useful lives. Intangible assets are evaluated annually for the existence of events or changes in circumstances that indicate the asset might be impaired. The Company assesses qualitative factors to determine whether it is more likely than not that the intangible assets' fair value is less than its carrying amount. Based on the results of this assessment, the Company may conduct a quantitative impairment test if the fair value of the intangible assets was determined to be, more likely than not, less than its carrying amount. Recoverability of intangible assets is primarily determined by a comparison of the carrying amount of the assets to future net cash flows before interest expense and income taxes expected to be generated by the assets. Impairment, if any, is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

Medical and Other Benefits Payable

The reserve for medical and other benefits payable includes management's estimate of the ultimate cost of the claims in process of settlement, claims incurred but not yet reported, and claims adjustment expenses needed to settle these claims.

The process of estimating reserves requires a high degree of judgment and a number of factors are taken into consideration. The Company actuarially estimates the liability for claims in process of settlement and claims incurred but not reported based on the most current historical claims payment patterns, changes in number of members, changes in products and benefits, and estimates of health care trend changes (cost, utilization, and intensity of services). Management also estimates the amount of claims adjustment expense needed to settle claims by determining the total administrative cost incurred to process claims as a percentage of total insured claims expense and applying that percentage to total claims in process of settlement and claims incurred but not yet reported.

Estimates for medical and other benefits payable are continually reviewed and revised as changes in experience and other factors occur, and revisions are reflected in the claims and medical expense line of the Consolidated Statements of Comprehensive Income in the period in which the change in estimate is identified. Changes in medical cost trend and claims payment patterns used in estimating reserves would impact the balance of medical and other benefits payable. These estimates may change as actuarial methods change or as underlying

facts upon which these estimates are based change. There have been no significant changes to the Company's actuarial methods in the last three fiscal years.

Contract Reserves

Contract reserves are established for long duration insurance products where, because of the policy's design, future benefit costs increase because of factors that the plan cannot reflect in the premiums. The liability, established when a portion of the premium collected in years prior to the valuation date is meant to help pay for claim costs arising in later years, represents the present value of future benefits paid to or on behalf of policyholders and related expense less the present value of future net premiums. Contract reserves are actuarially estimated using methods that include locked in assumptions such as interest rates, claim trends, persistency, and other assumptions. The assumptions include a provision for possible unfavorable deviation. Contract reserves are established for Blue Advantage, NAIC Medicare Supplement, and individual Blue Options HSA grandfathered products. In 2017, our Blue Advantage policies will no longer be offered to our customers; the North Carolina Department of Insurance (NCDOI) has been notified that we will be terminating all Blue Advantage policies at the end of 2017.

The current portion of contract reserves relates to the estimated amount by which the Company expects claims costs to exceed premiums collected over the next twelve months.

Book Overdrafts

Under our cash management system, checks issued but not yet presented to banks frequently result in overdraft balances for accounting purposes. These amounts are classified as a current liability in the Consolidated Balance Sheet and was $133,674 and $140,660 for the years ended December 31, 2016 and 2015, respectively. Changes in book overdrafts from period to period are reported in the Consolidated Statement of Cash Flows as an operating activity. In prior years, all overdrafts were reported in the Consolidated Statement of Cash Flows as a financing activity; these have been reclassified to book overdrafts as allowable under GAAP. As a result of this change, the Consolidated Statements of Cash Flows changed. The line Net cash provided by (used in) operating activities decreased by $25,864 in 2015 and increased by $127,954 in 2014. The line Net cash provided by (used in) financing activities increased by $25,864 in 2015 and decreased by $127,954 in 2014.

Bank Overdrafts

Under our cash management system, payments issued and presented to our banks can result in overdraft balances at those banks when immediate funding is not available; an extension of credit from the bank is granted. These amounts are classified as a current liability in the Consolidated Balance Sheets and was $0 for each of the years ended December 31, 2016 and 2015. Changes in bank overdrafts from period to period are reported in the Consolidated Statement of Cash Flows as a financing activity.

Premium Deficiency

Premium deficiencies are recognized when it is probable that expected future claims and claims adjustment expenses will exceed existing reserves plus anticipated future premiums on existing health benefit contracts with the consideration of investment income and overhead expense allocation. For purposes of premium deficiencies, contracts are deemed to be either short or long duration and are grouped in a manner consistent with the Company's method of acquiring, servicing and measuring the profitability of such contracts. Management determined that no premium deficiency reserve was warranted as of December 31, 2016 and 2015.

Revenue Recognition and Unearned Premiums

Revenue is principally derived from health benefit premiums. Generally, membership contracts have one-year terms. Group contracts are subject to cancellation upon 30 days written notice. Premiums are generally due monthly and are recognized as revenue during the period in which the Company is obligated to provide services or benefits. Amounts that are billed and received but unearned are recorded as unearned premiums. Because employer groups generally provide changes to their eligible member population one month in arrears, each billing includes an adjustment to premiums for the prior month's changes in member status that were not reflected in the original billing. Premium refunds are shown as a reduction in premium.

Our Medicare Advantage premium revenues are subject to periodic adjustment under CMS' risk adjustment payment methodology. The CMS risk adjustment model provides higher per member payments for enrollees diagnosed with certain conditions and lower payments for enrollees who are healthier. The Company and other health care plans collect, capture, and submit available diagnosis data to CMS within prescribed deadlines. CMS uses submitted diagnosis codes, demographic information, and special statuses to determine the risk score for most Medicare Advantage beneficiaries. CMS also retroactively adjusts risk scores during the year based on additional data. The Company estimates Medicare Advantage risk adjustment revenues based upon the data submitted and expected to be submitted to CMS.

Beginning in 2014, HHS pays us a portion of the health care costs for low-income individual members for which we assume no risk in accordance with the Health Care Reform Law. We account for these subsidies as a deposit in our Consolidated Balance Sheets and as a financing activity in our Consolidated Statements of Cash Flows. We do not recognize premiums revenue or benefits expense for these subsidies as these payments are a reimbursement. Receipt and payment activity is recorded in our Consolidated Balance Sheets in other current assets or accounts payable and accrued expenses depending on the balance at the end of the reporting period. Receipts from HHS associated with these cost sharing subsidies for which we do not assume risk were $50,119 and $55,286 higher than claims payments for the year ended December 31, 2016 and 2015, respectively.

Administrative fees include revenue from those group contracts that provide for the group to be at risk for all or, in the case of stop-loss agreements, a portion of its claims experience. These self-funded groups are charged an administrative fee that is based upon the number of members in the group and the group's claims experience. In addition, administrative fees include amounts received for the administration of certain other contracts, including cost plus arrangements. Administrative fees are recognized in accordance with the terms of the Company's contractual relationship with the customer. Administrative fees are included in the administrative fees and other revenue in the Consolidated Statements of Comprehensive Income. All benefit payments, except for those covered by stop-loss agreements, under these self-funded programs are excluded from the claims and medical expenses line of the Consolidated Statements of Comprehensive Income. Reimbursements of all medical benefit payments, except for those covered by stop-loss agreements, under these self-funded programs are also excluded from the operating revenue in the Consolidated Statements of Comprehensive Income.

Medicare Part D Prescription Drug Program

The Company serves as a plan sponsor offering Medicare Part D prescription drug insurance coverage under a calendar year contract with CMS. Payments from CMS under this contract include amounts for premiums, risk corridor adjustments, reinsurance and low-income cost sharing subsidies and prospective payments under the coverage gap discount program (CGDP).

The CMS contract is subject to audit and adjustments identified are recognized in the Consolidated Statements of Comprehensive Income as they are reviewed and agreed to by the Company. As of December 31, 2016, years 2006 through 2016 remain open to financial examination by CMS.

The payments received monthly from CMS and members represent amounts for providing prescription drug insurance coverage. The Company recognizes premium revenues for providing this insurance coverage ratably over the contract period. Premiums received in advance are recorded in unearned premiums. Pharmacy benefit and administrative costs under the contract are expensed as incurred. As a result of the Medicare Part D product design, the Company incurs a disproportionate amount of benefit costs in the first half of the contract year compared with the last half of the contract year.

The Company's CMS payment is subject to risk sharing through the Medicare Part D risk corridor provisions. The Company recognizes a risk sharing payable or receivable based on year-to-date activity. The risk corridor provisions compare costs targeted in the Company's annual bid to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances exceeding certain thresholds may result in CMS making additional payments to the Company or require the Company to refund to CMS a portion of what was received. The Company estimates and recognizes an adjustment to premium revenues related to these risk corridor provisions based upon pharmacy claims experience to date as if the annual contract

were to terminate at the end of the reporting period. Accordingly, this estimate provides no consideration to future pharmacy claims experience.

In addition, payments from CMS for reinsurance and low-income cost sharing subsidies represent reimbursement of prescription drug costs for which the Company is not at risk and is recorded as a payable when received. Reinsurance subsidies represent reimbursements for CMS's portion of prescription drug costs which exceed the member's out-of-pocket threshold, or the catastrophic coverage benefit level. Low-income cost sharing subsidies represent reimbursements from CMS for all or a portion of the deductible, the coinsurance and co-payment amounts from the out-of-pocket threshold for low income beneficiaries. The Company recognizes risk sharing receivable or payable based on year to date activity. Monthly prospective payments from CMS for reinsurance and low-income cost sharing subsidies are based on assumptions submitted with the Company's annual bid. This payable is reduced when reinsurance is utilized and subsidies are provided by the Company. This activity is accumulated and when the net balance for each contract is negative, it is recorded as a receivable. The Company does not recognize premium revenues or claims expense for these subsidies as the Company does not incur any risk with this part of the program.

A reconciliation and related settlement of the final risk sharing and low-income cost sharing and reinsurance subsidy amounts is performed following the end of the contract year. As of December 31, 2016 and 2015, the net estimated risk sharing payable with CMS was $0 for both years. The net estimated subsidies receivable from CMS was $3,299 and $9,388 at December 31, 2016 and 2015, respectively. Any estimated receivables related to either the CMS risk sharing or subsidies are included in premiums and other receivables. Any estimated payables related to the CMS risk sharing or subsidies are included in accounts payable and other accrued expenses.

Accounting for Income Taxes

Deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and tax credit carryforwards. A valuation allowance is recorded to reduce the Company's deferred tax asset to the amount the Company believes is more-likely-than-not to be realized. This determination is based upon a number of assumptions, including: the types of deferred tax assets; the expected reversal patterns and periods of the temporary differences; taxes paid in prior periods available for carry-back claims; estimates of future taxable income; and other significant issues or developments likely to impact the realization of the benefits from the deferred tax assets. If facts are ultimately inconsistent with the Company's expectations, an adjustment to the Company's deferred tax asset may be required in the future. Any such adjustment would be charged or credited to income tax expense in the Consolidated Statements of Comprehensive Income in the period the determination is made.

When tax returns are filed, some positions taken will be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more-likely-than-not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50% likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceed the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying Consolidated Balance Sheets along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Interest and penalties associated with unrecognized tax benefits are charged to income tax expense in the Consolidated Statements of Comprehensive Income.

Employee Benefit Programs

The funded status of the Company's defined benefit pension plans and nonpension postretirement benefit plans is recognized in the Consolidated Balance Sheets. The funded status is measured as the difference between the fair value of plan assets and the benefit obligation at December 31, the measurement date. For defined benefit

pension plans, the benefit obligation is the projected benefit obligation, which represents the actuarial present value of benefits expected to be paid upon retirement based on estimated compensation levels and service. For the nonpension postretirement benefit plans, the benefit obligation is the accumulated postretirement benefit obligation, which represents the actuarial present value of postretirement benefits attributed to employee services already rendered.

The fair value of plan assets represents the current fair value of cumulative Company contributions and investment earnings on those contributions less amounts paid out. Overfunded plans, with the fair value of plan assets exceeding the benefit obligation, are aggregated and recorded as a prepaid pension asset equal to this excess. Underfunded plans, with the benefit obligation exceeding the fair value of plan assets, are aggregated and recorded as a pension, postretirement and other retirement benefits liability equal to this excess. The current portion of the pension and nonpension postretirement benefit obligations represents the actuarial present value of benefits payable in the next 12 months exceeding the fair value of plan assets, measured on a plan-by-plan basis. This obligation is recorded in accounts payable and accrued expenses in the Consolidated Balance Sheets. Net periodic pension and nonpension postretirement benefit expense (income) is recorded in operating expense in the Consolidated Statements of Comprehensive Income.

Certain events, such as changes in employee base, plan amendments and changes in actuarial assumptions, result in a change in the benefit obligation which results in corresponding changes in the gains and losses or prior service costs. The result of these events is amortized as a component of net periodic benefit expense (income) over the average life expectancy of the participants, provided such amounts exceed certain thresholds which are based upon the benefit obligation or the value of plan assets. (Gains) losses and prior service costs (credits) not recognized as a component of net periodic benefit expense (income) in the Consolidated Statements of Comprehensive Income as they arise are recognized as a component of gains (losses) and prior service costs (credits) recognized in AOCI in the Consolidated Statements of Changes in Accumulated Capital. Those (gains) losses and prior service costs (credits) are subsequently amortized and recognized as a component of net periodic benefit expense (income).

The measurement of benefit obligations and net periodic benefit expense (income) is based on estimates and assumptions approved by the Company's management. These valuations reflect the terms of the plans and use participant-specific information such as compensation, age and years of service, as well as certain assumptions, including estimates of discount rates, expected return on plan assets, rate of compensation increases and mortality rates.

The Company records expense for defined contribution plans for the Company's contribution when the employee renders service to the Company, essentially coinciding with the cash contributions to the plans. The expense is recorded in operating expense in the Consolidated Statements of Comprehensive Income.

Fixed Income Securities – For both 2016 and 2015, the unrealized losses on the Company's fixed income investments were not the result of any credit related issues. In 2016, the unrealized losses on the Company's fixed income investments were mostly attributable to changes in interest rates. All of the issuers have investment grade credit ratings and therefore, the Company believes each issuer will be able to meet the contractual terms of the obligation. At December 31, 2016 and 2015, the Company did not have the intent to sell and it was not more-likely-than-not that the Company would be required to sell the investments before the recovery of its amortized cost basis. The Company therefore did not consider the investments at December 31, 2016 and 2015 to be other-than-temporarily impaired.

Equity Securities – For both 2016 and 2015, the Company's investments in equity securities primarily consists of investments in mutual funds and exchange-traded funds (ETF's). Various investment lots were below

cost at December 31, 2016 and 2015 and were primarily in emerging market debt ETF's, the vast majority of which had been in a loss position more than twelve months. The unrealized losses in these investments in 2016 were due to uncertainty concerning Fed interest rate actions, changes in commodity prices, and exchange rate movements. The Company believes the declines are not permanent in nature and are due to the lack of clarity regarding Fed policy and commodity price changes, and not related to increased credit risk.

The Company continues to review its investment portfolios under its impairment review policy. Given the unpredictability of market conditions and the significant judgments involved, there is a continuing risk that declines in fair value may occur and other-than-temporary impairments may be recorded in future periods.

4. Goodwill and Intangible Assets

The gross carrying amounts and accumulated amortization for the major intangible asset classes and goodwill at December 31 are as follows:

	2016		2015	
	Gross Carrying Amount	**Accumulated Amortization**	**Gross Carrying Amount**	**Accumulated Amortization**
Amortized intangible assets				
Subscriber relationships	$65,881	$40,055	$65,881	$37,616
Provider networks	7,198	6,334	7,198	6,188
	$73,079	$46,389	$73,079	$43,804
Goodwill	95,218		87,097	
Total	$168,297		$160,176	

Amortization expense of intangible assets for 2016, 2015, and 2014, was $2,585, $2,724, and $3,159, respectively.

The intangibles are amortized over periods that originally range from 12 to 31 years using the undiscounted cash flow method. Estimated amortization expense for the next five years is as follows: 2017, $2,131; 2018, $2,034; 2019, $1,943; 2020, $1,857 and 2021, $1,774.

5. Property and Equipment

Property and equipment as of December 31 consists of:

	2016	**2015**
Land and improvements	$34,250	$19,437
Buildings	107,545	79,474
Furniture, equipment and leasehold improvements	52,095	39,792
Construction in progress and equipment not in service	92,158	105,595
Computer equipment and software internally developed and purchased	404,386	333,885
	690,434	578,183
Less – accumulated depreciation and amortization	$(219,877)	$(186,507)
	$470,557	$391,676

Depreciation and amortization expense of property and equipment, excluding amortization of intangibles for 2016, 2015 and 2014, was $39,023, $28,166, and $19,153, respectively.

Accumulated amortization for capitalized software and hardware was $163,634 and $137,630 at December 31, 2016 and 2015, respectively. Amortization expense, included in depreciation and amortization above, for capitalized software and hardware for 2016, 2015 and 2014 was $27,195, $21,028, and $11,776, respectively.

During 2013, the Company announced its intention to create a central campus and leave the Headquarters building. The Company purchased two buildings in Durham to create this central campus. During 2015, the Company sold its Headquarters property. The gain on Headquarters was $30,937 and is in the Operating Expense line of the Consolidated Statements of Comprehensive Income. The original cost of the Headquarters property was $16,260 and accumulated depreciation at the date of sale was $13,788.

At December 31, 2016 and 2015, the Company capitalized $37,045 and $54,972, respectively of internally developed software related to its core operating platform.

6. Medical and Other Benefits Payable

Activity in the medical and other benefits payable liability is summarized as follows:

	2016	2015
Medical and other benefits payable at beginning of year	$708,666	$726,684
Incurred related to:		
Current year	6,043,226	6,631,617
Prior years	(179,664)	(98,764)
Total incurred	5,863,562	6,532,853
Paid related to:		
Current year	5,288,143	5,873,703
Prior years	575,860	677,168
Total paid	5,864,003	6,550,871
Medical and other benefits payable at end of year	708,225	708,666
Liability for claims processing costs	19,164	17,304
Total	$727,389	$725,970

Amounts incurred related to prior years vary from previously estimated liabilities as the claims are ultimately settled. Liabilities at any year end are continually reviewed and re-estimated as information regarding actual claims payments becomes known. This information is compared to the originally established year end liability. The favorable development for the years ended December 31, 2016 and December 31, 2015, was the result of actual claim payment patterns and cost trends differing from those assumed at the time the liability was established, and changes in the estimate for CSR of $55,286 and $54,124, respectively. The claims payment patterns and cost trends were influenced by utilization levels, unit costs, mix of business, benefit plan designs, provider reimbursement levels, core operating system conversions and changes, claim inventory levels, claim processing patterns, and claim submission patterns. In addition, the favorable development for the year ended December 31, 2016 was the result of flattening cost trends that are not expected to recur.

7. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses consist of the following as of December 31:

	2016	2015
Accounts payable	$108,786	$71,742
Accrued salaries and other benefit expenses	110,590	104,921
Accrued ACA cost sharing reduction	50,119	55,286
Other accrued expenses	320,132	341,511
	589,627	573,460
Less non-current portion	45,261	37,882
Total	$544,366	$535,578

8. Lines of Credit and Long-Term Debt

BCBSNC has established three credit lines providing a total borrowing capacity of $400,000 to support its daily working capital requirements. The three credit lines include two revolving lines of credit and a secured line of credit with the Federal Home Loan Bank of Atlanta (FHLBA). The interest rate for borrowings on the revolving lines is LIBOR plus 65 basis points. The interest rate for borrowings on the secured line is based on rates published by the FHLB for the specific term requested for the borrowings.

In November 2013, BCBSNC entered into a revolving line of credit and amended and restated it in July 2015, to increase the borrowing capacity to $150,000, and extend the termination date until July 2017. In July 2016, BCBSNC extended the termination date an additional year to July 2018.

In September 2015, BCBSNC entered into a second $50,000 revolving line of credit terminating in September 2017. In December 2016, BCBSNC extended the termination date to September 2018.

In September 2016, BCBSNC entered into a credit agreement with the FHLBA providing secured borrowing capacity up to $200,000. The capacity is based on our internal limits and the collateral included cash and securities in our investment portfolio deemed eligible by the FHBLA. Collateral is only encumbered to the extent borrowings are outstanding.

Amounts drawn under these credit lines were $46,109 and $171,851 at December 31, 2016 and 2015, respectively.

In September 2014, Corium entered into a $165,000 thirty-year, fully amortizing, 4.09% mortgage due 2044 with an unaffiliated lender using eight office buildings as collateral. The mortgage is not callable and can be prepaid at any time subject to a make whole premium due to the lender. This note is classified as long term in the accompanying consolidated balance sheets

Long-term debt consists of the following at December 31:

	2016	2015
Long-term debt	$158,396	$161,405
Less current portion of long-term debt	3,136	3,010
Long-term debt, less current portion	$155,260	$158,395

BCBSNC must maintain certain covenants including limits on indebtedness to capital, indebtedness to EBITDA, risk based capital ratio, liens, and dispositions. As of December 31, 2016 and 2015, the Company was in compliance with the covenants and requirements outlined in these agreements.

Future maturities of debt are as follows: 2017, $3,136; 2018, $3,267; 2019, $3,403; 2020, $3,544; 2021, $3,692 and thereafter $141,354.

9. Fair Value Measurements

The carrying amounts reported in the Consolidated Balance Sheets for cash, cash equivalents, premiums and other receivables, Affordable Care Act receivables, income tax receivable, unearned premiums, medical and other benefits payable, accounts payable, other assets and accrued expenses, book overdrafts and payables for securities approximate fair value because of the short term nature of these items.

Certain assets and liabilities recorded at estimated fair value in the Consolidated Balance Sheets are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Level inputs are defined as follows:

Level Input:	Input Definition:
Level I	Inputs are unadjusted, quoted prices for identical assets or liabilities in active markets at the measurement date.
Level II	Inputs other than quoted prices included in Level I that are observable for the asset or liability through corroboration with market data at the measurement date.
Level III	Unobservable inputs that reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date.

Transfers between Levels, if any, are recorded as if they had occurred at the beginning of the reporting period during which the change in method for valuing the underlying assets occurred.

Fair values of fixed income and equity securities are based on quoted market prices, where available. We have outsourced our investment accounting function. Our service provider obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing. In addition, the pricing service uses model processes such as the Option Adjusted Spread model to assess interest rate impact and develop prepayment scenarios.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value.

Following is a description of the valuation methodologies used by the Company to value assets, including the pension and postretirement assets, measured at fair value:

Major Category	Valued at
Mutual funds	Net asset value (NAV) of shares which are provided by the administrator of the fund.
State and/or U.S. government obligations and common and/or preferred stock	Closing price reported in the active market in which the individual security is traded. If in an inactive market, based on quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. Securities that trade infrequently and therefore have little or no price transparency are valued using the investment manager's best estimates.
Interest in collective trust funds	NAV of shares which are provided by the administrator of the fund.
Pooled separate accounts	Based on underlying value provided by the fund manager
Partnership and real estate funds	Based on net asset value provided by the fund manager
Private equity funds	Based on net asset value provided by the fund manager

Major Category	Valued at
Other investments	Dealer quotes, trade data, two-sided markets institutional bids, comparable trades and/or other news media
Privately held fixed income and equity securities, including venture capital investments	Reviewing the value ascribed to the most recent financing, comparing the security with securities of publicly traded companies in a similar line of business, and/or reviewing the underlying financial performance including estimating discounted cash flows
Fixed income securities including corporate, commercial and residential mortgage backed securities	Closing price reported in the active market in which the bond is traded or based on yields currently available on comparable securities of issuers with similar credit ratings or discounted cash flows approach that maximized observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks

The carrying value of corporate-owned life insurance policies is the cash surrender value as reported by the respective insurer.

The fair value of our long-term debt, included in liabilities on the Consolidated Balance Sheets, is based on current market observable rates estimated to be available to us for debt of similar terms and remaining maturities.

The following table summarizes fair value measurements by level at December 31 for assets measured at fair value on a recurring basis:

There was one material transfer and no material transfers between Levels I, II or III during the years ended December 31, 2016 and 2015, respectively.

A reconciliation of the beginning and ending balances of assets measured at fair value on a recurring basis using Level III inputs for the years ended December 31, 2016 and 2015 is as follows:

	Common Stock	**Private Equity**	**Venture Capital**	**Real Estate Trust**	**Total**
Beginning Balance at January 1, 2015	$3,589	$40,124	$83,080	$173,794	$300,587

Ending balance at December 31, 2016	$3,969	$85,658	$84,062	$221,667	$395,356

Private equity, Venture capital and Real estate trusts included in Level III are valued at net asset value as a practical expedient. For Real Estate Investments, the Company anticipates that net asset value is consistent with the liquidation value of these assets. There is a limited market for private equity and venture capital investments, and as a result, if the Company were required to sell these investments, the full fair value of these assets may not be realized. As of December 31, 2016, the Company has unfunded commitments of $53,157 for Private Equity Investments and $79,895 for venture capital investments.

Non-financial assets and liabilities including long-lived assets, goodwill, asset retirement obligations, and certain investments are recognized at fair value when they are considered to be other-than-temporarily impaired. There was no required fair value measurement for assets and liabilities measured at fair value on a non-recurring basis.

Non-financial instruments such as property and equipment, other current assets, deferred income taxes and certain financial instruments such as policy liabilities are excluded from the fair value disclosures. Therefore, the fair value amounts cannot be aggregated to determine our underlying economic value.

10. Employee Benefit Programs

BCBSNC has a non-contributory qualified defined benefit retirement plan covering a significant number of employees (excluding employees of ACS). The benefits are based on years of service and the employee's highest sixty consecutive months of earnings in the last one hundred and twenty months of participation in the plan.

BCBSNC also provides non-contributory, non-qualified defined benefit supplemental executive retirement plans (SERP) for certain executives. Two of the SERPs have benefits based on years of service, retirement age and certain final average pay calculations. Benefits are offset by benefits payable from other defined benefit retirement plans. An additional SERP has benefits based on years of service and individual agreements that generally require payment of a fixed monthly dollar amount for 15 years upon retirement.

BCBSNC provides certain health care and life insurance benefits for retired employees. Substantially all of BCBSNC's employees who reach retirement age while working at BCBSNC with at least 5 years of service may become eligible for health care insurance benefits. In addition, substantially all of those BCBSNC employees hired prior to January 1, 2006, who will reach retirement age while working at BCBSNC with at least 15 years of service may become eligible for both a Company subsidy of health care insurance costs and life insurance benefits. BCBSNC funds retiree health care benefits by making contributions to the Voluntary Employees Beneficiary Association (VEBA) administered by the BCBSA. The Company did not make a contribution for the years 2015 or 2016 to fund the liability for eligible retired employees.

In October 2014, the Company offered a Cash Out Window (COW) to terminated vested participants in the qualified defined benefit plan and, in certain limited situations, the SERP. The COW allowed the participants to elect an immediate lump sum distribution of their benefit in the plan(s). Lump sum payments of $100.2 million were paid from the qualified retirement plan in 2014, with $35.6 million of those lump sum payments attributable to the COW. Because these qualified plan payments exceeded the sum of estimated 2014 service and interest costs, settlement accounting was triggered. As a result, $17.6 million of unrecognized actuarial loss associated with the payments was relieved from AOCI and recognized in income.

Effective January 1, 2017, the Company has moved the majority of its Medicare eligible retirees to a private exchange. Medicare eligible retirees will receive a benefit in the form of a Healthcare Reimbursement Account (HRA). The proposed HRA is expected to equal to current expected plan subsidy for each group as of 2016.

The components of the net periodic benefit cost are as follows for the year ended December 31:

	Retirement Benefits						Other Postretirement Benefits		
	Qualified			Non-Qualified					
	2016	2015	2014	2016	2015	2014	2016	2015	2014
Service cost	$900	$800	$525	$85	$86	$91	$1,936	$2,302	$1,964
Interest cost	16,879	19,693	22,701	1,715	2,274	2,425	2,933	3,249	3,213

Net periodic benefit expense (income)	$(12,200)	$(12,860)	$1,367	$2,034	$2,835	$2,837	$1,761	$2,512	$1,556

In 2016, 2015 and 2014, the Company recognized the amortization of the cumulative net loss from past experience as measured by comparing the expected position of the plan at year-end (based on the beginning of the year actuarial assumptions and prior year census data) with the actual position of the plan at year-end (based on the end of year actuarial assumptions and current year census data) prior to recognizing any plan provision changes.

The reconciliations of the benefit obligation as of December 31 are as follows:

The estimated prior service credit and net actuarial loss that will be amortized from AOCI into net periodic benefit expense in 2017 are $(365) and $3,501, respectively.

The accumulated benefit obligation was $513,170 and $498,717 at December 31, 2016 and 2015, for the qualified retirement plan and $58,353 and $56,497 for the non-qualified retirement plans, respectively.

Due to the freeze, there will not be a difference in the accumulated benefit obligation and the projected benefit obligation prospectively.

The following tables present assumptions used in determining the actuarial present value of the benefit obligation and the subsequent year's net periodic benefit cost for the qualified and non-qualified retirement plans as of a measurement date:

The Company uses the Mercer Yield Curve to select a discount rate and uses separate discount rates for the different benefit plans as well as no rounding of discount rates, for consistency with industry trends. The expected future cash flows underlying the benefit obligations are discounted by the rate on the yield curve corresponding to the cash flow duration. The single discount rate that would yield the same present value as the sum of the discounted cash flows is determined. As of December 31, 2016 and 2015, the combined duration of all plans was 14 years and 13 years, respectively. The nonqualified pension plans have shorter durations than the qualified pension plan and the other postretirement benefit plans.

On December 31, 2015 we changed the method we use to estimate the service and interest components of net periodic benefit cost for defined benefit pensions and other postretirement benefits. This new estimation approach discounts the individual expected cash flows underlying the service cost and interest cost using the applicable spot rates derived from the yield curve used to discount the cash flows used to measure the benefit obligation. Historically, we estimated these service and interest cost components utilizing a single weighted-average discount rate derived from the yield curve used to measure the benefit obligation at the beginning of the period.

We have made this change to provide a more precise measurement of service and interest costs by improving the correlation between projected benefit cash flows to the corresponding spot yield curve rates. We have accounted for this change as a change in accounting estimate that is inseparable from a change in accounting principle and accordingly have accounted for it prospectively. The benefit obligation measured under this

approach was unchanged as of December 31, 2015. The new approach was used to measure the service and interest cost for the pension benefits, other postretirement benefits and other postemployment benefits in 2016. The service cost and interest cost for those plans was reduced by approximately $6.4 million in 2016 as a result of the change.

Starting with the 2016 net periodic benefit cost, the Company elected to use a spot discount rate approach to determine the interest cost component of expense and interest on the service cost component. Instead of using a single fixed discount rate, each year's cash flow is discounted at, and then credited with, interest based on the spot rate for that duration. The effective rate for interest on the benefit obligation is the single equivalent rate such that interest on the plan's PBO using the single rate equals the sum of the interest on each year's discounted cash flows determined using the corresponding spot rate along the Mercer Yield Curve. Interest on benefit obligations for purposes of determining the interest cost component of expense is calculated by applying interest to the present value of the payment expected at each payment date. For this purpose, interest is determined using the same spot rate used to determine the present value of the associated payment. In addition to the spot discount rate approach described above, the Company also elected to use split discount rates for the calculation of the PBO and service cost component of expense. The service cost calculation uses the same method as the calculation of the PBO, but is based on expected service cost cash flows only (e.g. expected retiree cash flows are not included).

In 2014, the Society of Actuaries completed a mortality study and issued a new base mortality table (RP-2014) and new mortality improvement scale (MP-2014). The Company has decided to move to the Mercer modified MRP-2007 base mortality table and the Mercer modified MMP-2007 generational projection scale on December 31, 2014. In previous years, the Company used the RP-2000 base mortality table and the Scale AA generational projection scale. This change resulted in an increase of this benefit obligation in 2014.

To set the expected return on plan assets for the qualified pension plan, the Company projects returns on each asset class using historical return relationships and making adjustments as necessary, given current market and economic conditions. The projected returns are then applied to the portfolio target asset allocation weightings and result in a projected long-term portfolio rate of return.

The following table presents assumptions used in determining the accumulated postretirement benefit obligation and the subsequent year's net periodic benefit cost for the other postretirement benefit plans:

To set the expected return on plan assets for the other postretirement benefit plans, historical markets are studied and long-term relationships between equities and fixed income securities indicate that assets with higher volatility generate a greater return over the long run. Current market factors such as inflation and interest rates are evaluated before long-term capital market assumptions are determined. The long-term portfolio return is established with proper consideration of diversification and rebalancing. Peer data and historical returns are reviewed to check for reasonability and appropriateness.

The following table presents the medical trend rate used in determining the accumulated postretirement benefit obligation at December 31 for the other postretirement benefit plans:

	2016	**2015**
Health care cost trend rate assumed for next year:		
Under age 65	6.70%	7.1%
Age 65 and older	6.70%	7.1%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	4.5%	4.5%
Year that the rate reaches the ultimate trend rate:		
Under age 65	2037	2037
Age 65 and older	2037	2037

The above trend rates were used for the PPO plan options. Different rates were used for some post-65 plan options to better model gross costs and expected government subsidies. The health care cost trend rate assumption can have a significant effect on the amounts reported. A one-percentage point change in assumed health care cost trend rates would have the following effects:

	1-Percentage Point Increase	1-Percentage Point Decrease
Effect on total of fiscal 2016 service and interest cost components....	$421	$(327)
Effect on the December 31, 2016 postretirement benefit obligation...	$4,923	$(3,938)

Future expected benefit payments and 2017 contributions are as follows:

The Company utilizes a partial liability matching investment strategy. The Plan's funding ratio exceeded 100% at year end and approximately 50% of the portfolio was transitioned to a liability driven investment strategy (LDI) in 2014. As the Plan's funding ratio grows, more investments will be allocated to the LDI strategy.

The Plan's investments remain diversified and of high quality. At year end the Plan had investments in funds invested in fixed income, domestic & international equities, real estate and timber.

The investment fiduciary for the VEBA employs a total return investment approach whereby a mix of equities, fixed income and other investments is used to maximize the long-term return of plan assets for a prudent level of risk. The investment portfolio contains a diversified blend of equity, fixed income and other investments. Investment risk is measured and monitored on an ongoing basis through investment portfolio reviews, annual liability measurements, and periodic asset/liability studies.

The mutual fund investment strategy for the VEBA is market sensitive while remaining consistent with the risk tolerance, tax status, and cash flow requirements. Fund strategies include pursuing and capitalizing on market inefficiencies using duration, yield curve, security selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks and supply and demand.

Other Employee Benefits

BCBSNC sponsors a defined contribution retirement plan qualified under Section 401(a) of the Internal Revenue Code, the BCBSNC 401(k) Plan (401(k) Plan). Eligible employees may contribute pretax and Roth contributions that are matched at the rate of 100% of the first 4% and 50% of the next 2% of compensation contributed. Additional Company contributions include profit sharing contributions that range from 2% to 5% of eligible compensation, based on the employee's years of service with the Company, and Transition Contributions that range from 1% to 8% of eligible compensation for eligible employees who were participants in the defined benefit pension plan on December 31, 2013. Transition Contributions will cease after December 31, 2023. Employee and Company contributions are subject to certain regulatory limits and service conditions.

The Company's contributions to the plans totaled $32,856, $31,021 and $31,249 for the years ended December 31, 2016, 2015, and 2014, respectively.

The Company also maintains the Restoration Plan, a non-qualified defined contribution plan, to ensure that designated participants receive the full amount of benefits to which they would have been entitled under the BCBSNC 401(k) Plan except for limits on compensation imposed by the Internal Revenue Service. The Company's contributions to the plan totaled $1,958, $1,975 and $1,427, for the years ended December 31, 2016, 2015, and 2014, respectively.

11. Income Taxes

BCBSNC files a consolidated federal income tax return with its subsidiaries. Current taxes are allocated among all affiliated companies based on a written tax sharing agreement, primarily on a separate company return basis using a wait-and-see method. These agreements have the effect of crediting each separate company within the consolidated group for the use of its net operating or other losses in the year in which the separate company could utilize the losses on a separate company return basis while charging those companies that previously benefited from use of the losses.

The significant components of income tax expense (benefit) in the Consolidated Statements of Comprehensive Income for the years ended December 31 are as follows:

A valuation allowance is required against deferred tax assets if, based on the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Based upon all the available evidence, management recorded a valuation allowance of $1,790 and $7,624 as of December 31, 2016 and 2015, respectively. The change during the year in the total valuation allowance was a decrease of $5,834. Management believes it is more likely than not that the Company will realize its remaining net deferred tax assets as of the respective balance sheet dates.

As of December 31, 2016, we have no remaining federal income tax net operating loss (NOL) carryforward. We have $128,259 in state net operating loss carryforwards which will begin to expire in 2017. In addition, we have federal credit carryforwards in the amount of $41,896 which will begin to expire on December 31, 2034 and an AMT credit carryforward in the amount of $15,724 which can be used to offset regular tax in future years without expiration.

As of December 31, 2016, as further described below, certain tax years remain open to examination by the IRS and various state authorities. As of December 31, 2016, we have recorded no interest or penalties related to uncertain tax positions in the statement of operations or statement of financial position. We do not anticipate the amount of unrecognized tax benefits related to the open tax years will change in the next twelve months. The ultimate resolution of such items is dependent on a number of factors.

The Company's tax years 2011 through 2016 remain open to examination by the IRS. ACS and NobleHealth tax years 2011 to 2016 remain open to examination by various state Departments of Revenue.

12. Related Party Transactions

In December 2011, BCBSNC established Topaz as a partnership. Its purpose was to develop a technology-enabled and market-competitive business solution to address the individual and small group health insurance markets. The initial focus of Topaz was to deliver a shared technology solution based on The TriZetto Group's

software for administering business in the retail marketplace, including individual (less than 65 years old) and small group (defined as up to 100 lives) health insurance products. This solution will be expanded to serve additional lines of business in the future.

Topaz was owned by Noble and a wholly-owned subsidiary of Blue Cross and Blue Shield of Kansas City ("BCBSKC"). The initial capital contribution of Noble was $5,000 in exchange for 100 units and a 50% voting interest. The initial capital contribution of BCBSKC's subsidiary was $5,000 in exchange for 100 units and a 50% voting interest. The Company and BCBSKC were funding Topaz and its development of a software infrastructure. The Company and BCBSKC planned to become customers of Topaz as software was placed in service. Topaz was a variable interest entity because its capital contributions were not sufficient to fund the development of its software infrastructure. Funding sources other than capital contributions were required to accomplish this endeavor. Additional funding was in the form of investments in research and development. Through January 23, 2014, the Company has concluded that it was not the primary beneficiary of Topaz, because it did not hold the power to direct the activities that most significantly impact Topaz, since it shared a voting interest on a 50% - 50% basis with BCBSKC. Accordingly, the investment in Topaz was accounted for as an equity method investment for the years ended December 31, 2013 and December 31, 2012.

During 2013 the Company and BCBSKC entered into discussions regarding the withdrawal of BCBSKC from Topaz as an owner and customer. These discussions culminated in a Settlement Letter Agreement and Release that became effective January 23, 2014. As a result of this transaction, Noble acquired the 50% voting interest from BCBSKC and prospectively, the Company consolidated the operations of Topaz based on its 100% ownership. The Company intends to continue funding the development of Topaz.

Effective January 23, 2014, The Company acquired the BCBSKC investment interest by assuming certain liabilities valued at approximately $11.5 million. As a result, the Company recognized the following assets acquired and liabilities assumed related to Topaz: cash $4.3 million, accounts receivable $31.8 million, prepaid expenses $0.2 million, internally developed software $52.9 million, prepaid software licenses $15.2 million, accounts payable $15.2 million, and research and development liability $66.1 million. Additionally, the Company's existing investment in Topaz was revalued to fair value at the date of acquisition. This resulted in the recognition of a $20.1 million gain recorded in Other income of the Consolidated Statements of Comprehensive Income.

13. Commitments and Contingencies

Leases

The Company leases office space and certain computer equipment under non-cancelable operating leases. Related lease expense for 2016, 2015 and 2014 was $5,712, $4,161 and $2,591, respectively.

At December 31, 2016, future lease payments for operating leases with initial or remaining non-cancelable terms of one year or more are $12,721 and consist of the following: 2017, $4,391; 2018, $3,972; 2019, $1,695; 2020, $1,485; and 2021, $1,178.

Commitments

The Company has a long-term debt obligation due September 2044, future interest payments on this debt obligation are as follows: 2017, $6,420; 2018, $6,289; 2019, $6,153; 2020, $6,011; 2021, $5,864 and thereafter $76,042.

The Company has a commitment to Trizetto to develop a claims processing system. Related funding for 2016, 2015 and 2014 were $46,772, $32,578, and $24,673 respectively. Future expected costs for this system are as follows: 2017, $4,836; 2018, $4,836; 2019, $4,698; 2020, $4,010; and 2021, $4.010.

At December 31, 2016, expected future costs to BCBSNC related to a purchase obligation for stated service fees with non-cancelable terms with Fujitsu for outsourced IT infrastructure are estimated as follows: 2017, $70,414 and $0 thereafter.

At December 31, 2016, we have various other non-cancelable arrangements with our vendors for outsourced claims processing, healthcare programs, and IT support with future costs estimated as follows: 2017, $137,616; 2018, $76,658; 2019, $36,387; 2020, $14,953; and 2021, $1,286.

Litigation against the Company

We are regularly involved in litigation, both as a defendant and as a plaintiff, but primarily as a defendant. Litigation naming us as a defendant ordinarily arises out of our business operations as a health services organization and our investment activities. Some of the lawsuits may be class actions, or purport to be, and some may include claims for unspecified or substantial punitive and treble damages.

We may discuss such litigation in one of three ways. We accrue a charge to income and disclose legal matters for which the chance of loss is probable and for which the amount of loss can be reasonably estimated. We may disclose contingencies for which the chance of loss is reasonably possible and provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. Finally, we may voluntarily disclose loss contingencies for which the chance of loss is remote in order to provide information concerning matters that potentially expose us to possible losses.

The Company is involved in litigation (In Re: Blue Cross Blue Shield Antitrust Litigation (United States District Court, Northern District of Alabama)) which is a multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans. The Company is a named defendant in forty-three of the consolidated cases. The cases all allege an ongoing conspiracy in violation of the Sherman Antitrust Act among the Blues and the BCBSA and seek (1) a permanent injunction prohibiting enforcement of any agreements which restrict the BCBSA member operating territories; (2) treble damages for (a) alleged artificially inflated premiums in the case of subscribers and (b) alleged suppressed provider compensation in the case of providers and (3) attorneys' fees and costs. Additionally, one of the consolidated cases against the Company makes antitrust allegations based on most favored nations ("MFN") clauses in the Company's provider contracts and seeks reformation of the Company's provider contracts to strike MFN clauses and monetary damages. The case is now in the discovery stage. The Company intends to vigorously defend this litigation.

The Company is also involved in litigation (In Re: Anthem Data Breach Litigation(United States District Court, Northern District of California)). The case is a Federal, multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans, arising out of a cyber-attack perpetrated against Anthem, Inc. in December, 2014 and January, 2015. The case seeks certification of a class of all Blue plan insured members and alleges various negligence and breach of contract claims and violations of consumer protection laws and seeks injunctive relief and compensatory and punitive damages. The Company is vigorously defending the case.

The Company is also a defendant in litigation (Susan Sykes d/b/a Advanced Chiropractic, et al. v. BCBSNC, et al). This class action was filed May 22, 2015 against BCBSNC and other carriers, CIGNA, Medcost and Healthgram who use Health Network Solutions, Inc. ("HNS") to provide their chiropractic network. The complaint alleges a purported plaintiff class of all chiropractors who practiced in North Carolina from 2005 to the present and asserts claims for (1) declaratory judgment invalidating the agreements between HNS and the individual carriers; (2) price fixing, monopsony and monopoly; (3) unfair and deceptive trade practices; (4) illegal conspiracy in restraint of trade; (5) breach of fiduciary duty; and (6) punitive damages. Generally, the plaintiffs contend that the carriers' agreements with HNS result in underpayment to chiropractors and/or illegal exclusion of chiropractors from the carriers' provider networks. The case was originally filed in North Carolina state court, but has been transferred to the North Carolina Business Court to be consolidated with a prior pending action by the same plaintiffs against HNS. All defendants filed Motions to Dismiss on September 25, 2015 which are currently pending. The Company is vigorously defending the case.

Additionally, BCBSNC is also involved in various claims and legal actions arising in the ordinary course of business. However, management believes that proceedings arising in the ordinary course of business and those referenced above will not have a material adverse impact on the financial position of the Company.

Other Contingencies

The National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) is a voluntary organization consisting of the state life and health insurance guaranty associations located throughout the U.S. State life and health insurance guaranty associations, working together with NOLHGA, provide a safety net for their state's policyholders, ensuring that they continue to receive coverage even if their insurer is declared insolvent. The Company is aware that the Pennsylvania Insurance Commissioner (Insurance Commissioner) has placed Penn Treaty Network America Insurance Company and its subsidiary American Network Insurance Company, or collectively Penn Treaty, in rehabilitation, an intermediate action before insolvency. On July 27, 2016, the Pennsylvania Insurance Commissioner filed a petition to move Penn Treaty from rehabilitation to liquidation. It is anticipated that the Pennsylvania court will approve the petition to liquidate Penn Treaty in early 2017. In that event, the Company and other insurers may be required to pay a portion of Penn Treaty's policyholder claims through state guaranty association assessments in future periods. Given the uncertainty around whether Penn Treaty will ultimately be declared insolvent and, if so, the amount of the insolvency, the amount and timing of any associated future guaranty fund assessments and the availability and amount of any potential premium tax and other offsets, the Company currently cannot estimate its net exposure, if any, to this potential insolvency. The Company will continue to monitor the situation and may record a liability and expense in future reporting periods, which could be material to its cash flows and results of operations.

14. Administrative Services

Claims processed for others under contract, which have been excluded from the financial statements, are summarized for the years ended December 31 as follows:

	2016	2015	2014
Claims processed for:			
State of North Carolina	$2,167,470	$2,068,634	$1,951,133
Other self-funded groups	7,711,509	7,340,238	6,419,447
	$9,878,979	$9,408,872	$8,370,580

Administrative fees received for processing these claims totaled $479,168, $443,919 and $410,846 in 2016, 2015 and 2014, respectively. All claims payments are subject to audit by the program administrators. If the program administrators determine that the claims or expenses have not been paid in accordance with the contract, the Company may be required to reimburse the program administrators.

15. Comprehensive Income (Loss)

The accumulated other comprehensive income (loss) in the Consolidated Balance Sheets consists of the following:

	Unrealized Gains on Securities	Non-credit Component of Other-Than-Temporary Impairment	Qualified Retirement Plans	Post Retirement and Other Benefit Plans	Accumulated Other Comprehensive (Loss) Income
Balance, December 31, 2013	$300,997	$-	$(39,223)	$(7,053)	$254,721

Change for 2016	(17,599)	638	(6,777)	2,752	(20,986)
Balance, December 31, 2016	$207,870	$1,944	$(97,796)	$(10,069)	$101,949

16. Subsequent Events

The Company has evaluated subsequent events through February 22, 2017, which is the date that the financial statements were available to be issued, for recognition or disclosure in our consolidated financial statements. All of the effects of subsequent events that provide additional evidence about conditions that existed at the consolidated balance sheet date, including the estimates inherent in the process of preparing the consolidated financial statements, are recognized in the consolidated financial statements. The Company does not recognize subsequent events that provide evidence about conditions that did not exist at the balance sheet date but arose after, but before the financial statements are available to be issued. In some cases, non-recognized subsequent events are disclosed to keep the financial statements from being misleading.

17. Supplemental Statutory Financial Information

The Company is required to file unconsolidated financial statements with, and is subject to exam by, the NCDOI. These financial statements are presented on the basis of accounting practices prescribed or permitted by the NCDOI.

The NCDOI recognizes only Statutory Accounting Practices prescribed or permitted by the state of North Carolina for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the North Carolina Insurance Law. The NAIC's Accounting Practices and Procedures manual has been adopted as a component of prescribed or permitted practices by the state of North Carolina.

A reconciliation of net income – statutory basis for the years ended December 31, 2016, 2015 and 2014 and capital and surplus – statutory basis at December 31, 2016 and 2015 to amounts reported in the accompanying consolidated financial statement follows:

The NAIC adopted the RBC for Health Organizations Model Act in 1998. The NCDOI subsequently adopted this act in 2001. Under this act, a company's risk-based capital (RBC) is calculated by applying certain factors to various asset, premium and reserve items. If a company's calculated RBC falls below certain thresholds,

regulatory intervention or oversight is required. BCBSNC's RBC level, calculated in accordance with the NAIC's RBC instructions, exceeded all RBC thresholds as of December 31, 2016 and 2015. The Company is also subject to insurance laws and regulations of the State of North Carolina that include but are not limited to restrictions on dividends, types of investments that insurers are allowed to invest in, and the amount of capital and surplus.

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Blue Cross and Blue Shield of North Carolina (BCBSNC or the Company) have been prepared in conformity with accounting practices and procedures prescribed by the North Carolina Department of Insurance (NCDOI).

The NCDOI recognizes only Statutory Accounting Practices (SAP) prescribed or permitted by the State of North Carolina for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the North Carolina Insurance laws, regulations and general administrative rules. The NCDOI has adopted the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) as a component of prescribed or permitted practices by the State of North Carolina (NC SAP). There is no deviation from the NAIC SAP. There were no differences between the statutory practices prescribed or permitted by the State of North Carolina and those prescribed or permitted by NAIC SAP which would materially affect the statutory basis net income or surplus.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of North Carolina is show below:

		State of Domicile	2016	2015
NET INCOME				
1.	BCBSNC state basis (Page 4, Line 32, Columns 2&3)	NC	$272,019,840	($5,710,317)

3.	State Permitted Practices that increase/(decrease) NAIC SAP:			
4.	NAIC SAP (1-2-3=4)	NC	$272,019,840	($5,710,317)
SURPLUS				
5.	BCBSNC state basis (Page 3, Line 33, Columns 3 & 4)	NC	$2,210,529,712	$2,067,050,162
6.	State Prescribed Practices that increase/(decrease) NAIC SAP:			
7.	State Permitted Practices that increase/(decrease) NAIC SAP:			
8.	NAIC SAP (5-6-7=8)	NC	$2,210,529,712	$2,067,050,162

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the amounts of revenue and expenses during the reporting period. The Company uses estimates and assumptions based on analytical and/or actuarially accepted quantitative methods in determining contract reserves and claims incurred but not yet reported, valuation of pension and other benefit plans, deferred income taxes, fair value of investments, other-than-temporary investments, and other valuation accruals. Actual results could differ materially from those estimates.

C. Accounting Policies

Premiums written are earned over the period of coverage on a pro rata basis. Premiums billed to policyholders are recorded as uncollected premiums when the coverage period begins. Payments received in advance of coverage are recorded as premiums received in advance until earned. Delinquent uncollected premiums are charged directly to reserves and unassigned funds once delinquent for 30 days and 90 days for non-group and group subscribers, respectively.

In addition, the Company uses the following accounting policies:

1. Short-term investments consist of readily marketable securities with maturities greater than three months but less than one year at the time of purchase. These investments are recorded at amortized cost.

2. Bonds rated 1 and 2 by the NAIC are stated at cost adjusted for amortization of premiums and accretion of discounts using the scientific amortization method. Bonds rated 3 through 6 are carried at the lower of amortized cost or fair value with the change recorded in capital and surplus, net of applicable taxes. Prepayment assumptions are determined by using broker data.

Declines in the fair value of invested assets below cost are compiled on a monthly basis and reviewed quarterly to assess whether any other-than-temporary impairment loss should be recorded. Various thresholds are used to identify those securities which are at the greatest risk of an other than temporary impairment

3. Common stocks of subsidiaries are stated in accordance with SSAP 97. Common, excluding common stock of subsidiaries, are stated at the estimated market value provided by the Securities Valuation Office (SVO) of the NAIC or are based on quoted market prices. Estimated SVO market values are based on published quotations of the SVO. However, for certain investments for which the SVO does not provide a value, BCBSNC uses the amortized cost amount as its estimate of market value in accordance with prescribed guidance.

4. Preferred stocks are stated at the estimated market value provided by the Securities Valuation Office (SVO) of the NAIC or are based on quoted market prices. Estimated SVO market values are based on published quotations of the SVO. However, for certain investments for which the SVO does not provide a value, BCBSNC uses the amortized cost amount as its estimate of market value in accordance with prescribed guidance.

5. The Company does not have any mortgage loans.

6. Mortgage-backed and other asset-backed securities rated 1 and 2 by the NAIC are adjusted for unamortized premiums and discounts, which are amortized using the scientific method over the estimated remaining term of the securities, adjusted retrospectively for changes in anticipated prepayments.

For loan-backed or structured securities, factors considered by management in determining whether an other-than-temporary impairment exists include the Company's stated intent to not sell, the Company's ability to hold such investments until the fair value recovers, and the discounted cash flows of the security based on the yield at the date of acquisition. If the Company intends to sell or if the Company does not have the ability and intent to hold the security for a period of time sufficient to recover its amortized cost basis, an other-than-temporary impairment exists, and the security is written down to fair value with the amount of the write-down recorded as a realized loss. If the Company does not intend to sell the security and has the ability and intent to hold the security for a period of time sufficient to recover the amortized cost basis, the Company calculates the cash flows expected to be collected. In this calculation, the Company compares the present value of cash flows expected to be collected, discounted at the security's effective interest rate at date of purchase, to the amortized cost basis. If the present value of cash flows is less than the amortized cost basis, a realized loss is recorded for the difference. The present value of cash flows then becomes the new cost basis.

7. As of December 31, 2016, BCBSNC had four wholly-owned subsidiaries: Corium, LLC ("Corium"); Corium II, LLC ("Corium II"); Blue Cross and Blue Shield of North Carolina Senior Health ("Senior Health"); and NobleHealth, Inc. ("NobleHealth"). Corium owns, operates, and manages financed office buildings of the Company. Corium II owns, operates, and manages unencumbered office buildings of the Company. Senior Health will provide Medicare plans in the future. NobleHealth holds non-controlling strategic investments in certain health services companies and has four wholly-owned subsidiaries: Mosaic Group Services, LLC ("Mosaic Group"); Mosaic Health Solutions, LLC ("Mosaic Health Solutions"); Noble Benefit Services, LLC ("NBS"); and Topaz Shared Services, LLC ("Topaz"). Mosaic Group functions as an insurance agency selling third-party life and disability and death and dismemberment products and is licensed as a third-party administrator. Mosaic Health Solutions has one wholly-owned subsidiary, ACS Benefit Services, LLC ("ACS") and also holds non-controlling strategic investments in certain health services companies. ACS provides self-funded plans with complete third-party administration services for group medical, dental and disability benefits. NBS will function as a third-party administrator for self-insured employer groups. Topaz provides a healthcare payer operating system.

Noble investment meets the definition of presumption of control as defined in accounting guidance provided in SSAP 97 (Investments in Subsidiary, Controlled, and Affiliated Entities-A Replace of SSAP No. 88), Paragraph 6.b. Accordingly, adjustment has been made to report this investment on an equity method basis as defined in SSAP No. 48 – Joint Ventures, Partnerships and Limited Liability Companies. The investment which is Common Stock is carried at cost.

8. As of December 31, 2016, the Company holds ownership interest in 35 joint ventures. The company carries these interests based on the underlying audited GAAP equity of the investee, adjusted for certain provisions as described by SSAP 48, Joint Ventures, Partnerships and Limited Liability Companies. For the year to date periods ended December 31, 2016 and 2015, certain securities became other-than-temporarily impaired and were written down to their fair value, resulting in a realized loss of $982,000 and $2,009,000, respectively.

9. There have been no significant changes to the accounting policy related to derivative instruments since the fiscal year 2015 filing.

10. There have been no significant changes related to the methodology used in the premium deficiency calculation.

11. Claims and claims adjustment expenses are expensed as incurred. The claims unpaid liability includes management's estimate of the ultimate cost of the claims in process of settlement and claims incurred but not yet reported.

The process of estimating reserves requires a high degree of judgment and a number of factors are taken into consideration. The Company actuarially estimates the liability for claims in process of settlement and claims incurred but not reported based on the most current historical claims payment patterns, changes in number of members, changes in products and benefits, and estimates of health care trend changes (cost, utilization, and intensity of services). Management also estimates the amount of claims adjustment expense needed to settle claims by determining the total administrative cost incurred to process claims as a percentage of total insured claims expense and applying that percentage to total claims in process of settlement and claims incurred but not yet reported.

Estimates for the claims unpaid liability are continually reviewed and revised as changes in experience and other factors occur, and revisions are accordingly reflected in the hospital and medical expense line of the Statement of Revenue and Expenses in the period in which the change in estimate is identified. Changes in the medical cost trend and claims payment patterns used in estimating reserves would impact the balance of claims unpaid and unpaid claims adjustment expense. These estimates may change as actuarial methods change or as underlying facts upon

which these estimates are based change. There have been no significant changes to our actuarial methods in the last two fiscal years.

12. The Company has not modified its capitalization policy for the prior period.

13. The Company's pharmacy benefit manager (PBM) contracts with pharmaceutical manufacturers, some of whom provide rebates based on the use of the manufacturers products by the PBM for the Company's insured and self-funded customers. The Company accrues the rebates receivable monthly based on the terms of the applicable contracts. The PBM bills these rebates to the manufacturers on a quarterly basis. The Company is reimbursed primarily quarterly. The Company records the rebates attributable to insured customers as a reduction to claims and medical expense. The rebates attributable to self-funded customers are accrued as rebates receivable as well as a corresponding payable to self-funded customers in accordance with their contracts. Of these receivables, $60,790,203 and $52,405,540 at December 31, 2016 and 2015, respectively, were nonadmitted because they were outstanding in excess of 90 days.

D. Loan-Backed Securities

(1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from broker-dealer survey values or internal estimates.

(2) The Company did not have any other than impaired loan-backed securities for the period ended December 31, 2016.

(3) Loan-backed securities with a recognized other-than-temporary impairment, currently held by the Company, as the present value of cash flows expected to be collected is less than the amortized cost basis of the securities are as follows as of December 31, 2016:

1	2	3	4	5	6	7
CUSIP	Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	Present Value of Projected Cash Flows	Recognized Other-than-Temporary Impairment	Amortized Cost After Other-Than-Temporary Impairment	Fair Value at time of OTTI	Date of financial statement Where Reported
None	$-	$-	$-	$-	$-	$-

(4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earning as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

B. The aggregate amount of unrealized losses:

1. Less than 12 Months $2,452,816
2. 12 Months or Longer $156,630

C. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months $144,998,240
2. 12 Months or Longer $31,773,368

(5) For loan-backed or structured securities, factors considered by management in determining whether an other-than-temporary impairment exists include the Company's stated intent to not sell, the Company's ability to hold such investments until the fair value recovers, and the discounted cash flows of the security based on the yield at the date of acquisition. If the Company intends to sell or if the Company does not have the ability and intent to hold the security for a period of time sufficient to recover its amortized cost basis, an other-than-temporary impairment exists, and the security is written down to fair value with the amount of the write-down recorded as a realized loss. If the Company does not intend to sell the security and has the ability and intent to hold the security for a period of time sufficient to recover the amortized cost basis, the Company calculates the cash flows expected to be collected. In this calculation, the Company compares the present value of cash flows expected to be collected, discounted at the security's effective interest rate at date of purchase, to the amortized cost basis. If the present value of cash flows is less than the amortized cost basis, a realized loss is recorded for the difference. The present value of cash flows then becomes the new cost basis.

E. Repurchase Agreements and/or Securities Lending Transactions

The Company did not have any Repurchase Agreements and/or Securities Lending Transactions as of December 31, 2016 and 2015.

F. The Company's federal income tax return is consolidated with the following entities:

ACS Benefit Services, LLC. (ACS)
Corium, LLC (Corium)
Corium II, LLC (Corium II)
Mosaic Health Solutions, LLC (MHSI)
Mosaic Group Services, LLC (Mosaic)
NobleHealth, Inc.
Blue Cross and Blue Shield of North Carolina Senior Health, Inc. (Senior Health)
Noble Benefit Services, LLC. (NBS)
Topaz, LLC

Current taxes are allocated among all affiliated companies based on a written tax sharing agreement. Allocation of taxes is made primarily on a separate return basis. Payment for losses and other tax items occurs once a company could have utilized the items in a separate return and the group has utilized the items in the consolidated return. This is referred to as the wait-and-see method. Inter-company balances are settled annually within two months of filing the consolidated return.

N. Investment in Insurance SCAs

1. The Company has received an exemption from the North Carolina Department of Insurance pursuant to 58-10-185 for Senior Health for year-end December 31, 2016. The statute requires an annual audit of financial statements reporting the financial position and the results of operations of insurers by independent certified public accountants.

2. The monetary effect on net income and surplus as a result of using an accounting practice that differed from NAIC Statutory Accounting Practices and Procedures (NAIC SAP), the amount of the investment in the insurance SCA per audited statutory equity and amount of the investment if the insurance SCA has completed statutory financial statements in accordance with the AP&P Manual.

SCA Entity (Investments in Insurance SCA Entities)	Monetary Effect on NAIC SAP		Amount of Investment	
	Net Income Increase (decrease)	Surplus Increase (Decrease)	Per Audited Statutory Equity	If the Insurance SCA Had Completed Statutory Financial Statements
Blue Cross Blue Shield of NC Senior Health	$0	$0	$0	$1,500,000

3. Senior Health is not required to file an HRBC at this time.

11. Debt

A. BCBSNC has established three credit lines providing a total borrowing capacity of $400,000,000 to support its daily working capital requirements. The three credit lines include two revolving lines of credit and a secured line of credit with the Federal Home Loan Bank of Atlanta (FHLBA). The interest rate for borrowings on the revolving lines is LIBOR plus 65 basis points. The interest rate for borrowings on the secured line is based on rates published by the FHLB for the specific term requested for the borrowings.

In November 2013, BCBSNC entered into a revolving line of credit and amended and restated it in July 2015, to increase the borrowing capacity to $150,000,000 and extend the termination date until July 2017. In July 2016, BCBSNC extended the termination date an additional year to July 2018.

In September 2015, BCBSNC entered into a second $50,000,000 revolving line of credit terminating in September 2017. In December 2016, BCBSNC extended the termination date to September 2018.

In September 2016, BCBSNC entered into a credit agreement with the FHLBA providing secured borrowing capacity up to $200,000,000. The capacity is based on our internal limits and the collateral will included cash and securities in our investment portfolio deemed eligible by the FHBLA. Collateral is only encumbered to the extent borrowings are outstanding.

Amounts drawn under these revolving lines of credit were $46,109,000 and $171,851,000 at December 31, 2016 and 2015, respectively.

In September 2014, the Company entered into a $165,000,000 thirty-year, fully amortizing, 4.09% mortgage due 2044 with an unaffiliated lender using eight office buildings as collateral. The mortgage is not callable and can be prepaid at any time subject to a make whole premium due to the lender.

BCBSNC must maintain certain covenants including limits on indebtedness to capital, indebtedness to EBITDA, risk based capital ratio, liens, and dispositions. As of December 31, 2016 and December 31, 2015, the Company was in compliance with the covenants and requirements outlined in these agreements.

B. FHLB (Federal Home Loan Bank) Agreements

1. In 2016, the Company became a member of the Federal Home Loan Bank (FHLB) of Atlanta. Through its membership, the Company has conducted business activity (borrowings) with the FHLB. It is part of the Company's strategy to utilize these funds as a component of its working capital financing structure. The Company has determined the actual/estimated maximum borrowing capacity as $200,000,000. The Company calculated this amount in accordance with current debt policy.

12. Retirement Plans, Deferred Compensation, Post-Employment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. Defined Benefit Plan

The Company has a non-contributory qualified defined benefit retirement plan covering a significant number of employees. No new participants are allowed into the plan. In addition, certain participants have no additional service accrual based on a defined contribution plan participation choice. The benefits are based on years of service and the employee's highest sixty consecutive months of earnings in the last one hundred and twenty months of employment.

The Company also provides non-contributory non-qualified defined benefit supplemental executive retirement plans (SERP) for certain executives. Two of the SERPs have benefits based on years of service, retirement age and certain final average pay calculations. Benefits are offset by benefits payable from other defined benefit retirement plans. An additional SERP has benefits based on years of service and individual agreements that generally require payment of a fixed monthly dollar amount for 15 years upon retirement.

BCBSNC provides certain healthcare and life insurance benefits for retired employees. Substantially all of BCBSNC's employees who reach retirement age while working at BCBSNC with at least 5 years of service may become eligible for healthcare insurance benefits. In addition, substantially all of those BCBSNC employees hired prior to January 1, 2006, who will reach retirement age while working at BCBSNC with at least 15 years of service may become eligible for both a Company subsidy of healthcare insurance costs and life insurance benefits. BCBSNC funds retiree healthcare benefits by making contributions to the Voluntary Employees Beneficiary Association (VEBA) administered by the Blue Cross and Blue Shield Association (BCBSA). The Company did not make a contribution for the years 2015 or 2016 to fund the liability for eligible retire employees.

Effective January 1, 2017, the Company has moved the majority of its Medicare eligible retirees to a private exchange. Medicare eligible retirees will receive a benefit in the form of a Healthcare Reimbursement Account (HRA). The HRA is expected to equal to current expected plan subsidy for each group as of 2016.

A summary of assets, obligations and assumptions of the Retirement and Other Postretirement Plans, are as follows at December 31, 2016 and 2015:

Retiree Life Insurance	4.00%	4.06%

A measurement date of December 31, 2016 and 2015, respectively, was used for the benefit plans.

The medical trend rate used in determining the accumulated postretirement benefit obligation at December 31:

	2016	**2015**
Health care cost trend rate assumed for next year:		
Under age 65	6.70%	7.1%
Age 65 and older	6.70%	7.1%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	4.5%	4.5%
Year that the rate reaches the ultimate trend rate:		
Under age 65	2037	2037
Age 65 and older	2037	2037

The above trend rates were used for the PPO plan options. Different rates were used for some post-65 plan options to better model gross costs and expected government subsidies.

(9) The amount of the accumulated benefit obligation for defined benefit pension plans was $513,169,730 for the current year and $498,716,810 for the prior year.

(10) BCBSNC provides certain healthcare and life insurance benefits for retired employees. Substantially all of BCBSNC's employees who reach retirement age while working at BCBSNC with at least 5 years of service may become eligible for healthcare insurance benefits. In addition, substantially all of those BCBSNC employees hired prior to January 1, 2006, who will reach retirement age while working at BCBSNC with at least 15 years of service may become eligible for both a Company subsidy of healthcare insurance costs and life insurance benefits. BCBSNC funds retiree healthcare benefits by making contributions to the VEBA administered by the BCBSA. The Company did not make a contribution in 2015 or 2016 to fund the liability for eligible retired employees.

(11) Health care cost trend rate assumptions can have a significant effect on the amounts reported for the Retiree Medical Benefits Plan. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	1-Percentage Point Increase	**1-Percentage Point Decrease**
Effect on total of service and interest cost components	$420,862	$(327,153)
Effect on postretirement benefit obligation	$4,923,003	$(3,937,520)

(12) Future expected benefit payments and 2016 contributions are as follows:

	Retirement Benefits		**Other Postretirement Benefits**
	Qualified	**Non-Qualified**	
a. 2017	$22,358,733	$1,836,279	$3,252,297
b. 2018	$22,684,437	$18,089,027	$3,324,513
c. 2019	$23,082,041	$1,973,251	$3,437,577
d. 2020	$23,593,555	$1,992,660	$3,531,500

e. 2021	$24,336,490	$1,969,042	$3,668,848
f. Thereafter Total	$134,040,763	$16,494,979	$20,434,358

(13) The Company anticipates that it will make cash contributions in 2017 of $1,836,279 and $686,095 to the non-qualified and postretirement pension plan. The Plan does not expect to make a cash contribution to the qualified pension plan. Expected contributions are dependent on many variables, including the variability of the market value of the assets as compared to the obligation and other market or regulatory conditions. The Plan takes into consideration its business investment opportunities and resulting cash requirements. Accordingly, actual funding may differ from current estimates. The Pension Protection Act established certain minimum funding standards for defined benefit plans, and the Plan is in compliance with these funding standards.

(14) Not Applicable

(15) In 2016 and 2015, BCBSNC recognized the amortization of the cumulative net loss from past experience as measured by comparing the expected position of the plan at year-end (based on the beginning of the year actuarial assumptions and prior year census data) with the actual position of the plan at year-end (based on the end of year actuarial assumptions and current year census data) prior to recognizing any plan provision changes. The loss is amortized over the average life expectancy of plan participants.

(16) The Company did not have a significant benefit increase during the period. Additionally, the Company does not have any substantive commitment, such as a past practice or history of regular benefit increases, used as the basis for accounting for the benefit obligation.

(17) No significant special or contractual termination benefits were recognized during the period.

(18) There was no significant change in the benefit obligation or plan asset in 2016 or 2015 not otherwise apparent in the disclosures herein.

(19) There are no plan assets expected to be returned to the employer.

(20) The accumulated postretirement and pension benefit obligation, fair value of plan assets and funded status of the benefit plans are disclosed in the tables herein.

(21) The full surplus impacts of SSAP No. 102 and SSAP No. 92 have been recognized. There is no transition liability, nor will there be any future recognition of the initial application if this guidance.

B. Investment Plan Policies for Plan Assets

BCBSNC's plan weighted-average asset allocations at December 31, by asset category, are as follows:

	Retirement Benefits

The Company utilizes a partial liability matching investment strategy. The Plan's funding ratio exceeded 100% at year end and approximately 50% of the portfolio was transitioned to a liability driven investment strategy (LDI) in 2014. As the Plan's funding ratio grows, more investments will be allocated to the LDI strategy.

The Plan's investments remain diversified and of high quality. At year end the Plan had investments in funds invested in fixed income, domestic and international equities, real estate and timber.

The investment fiduciary for the VEBA employs a total return investment approach whereby a mix of equities, fixed income and other investments is used to maximize the long-term return of plan assets for a prudent level of risk. The investment portfolio contains a diversified blend of equity, fixed income and other investments. Investment risk is measured and monitored on an ongoing basis through investment portfolio reviews, annual liability measurements, and periodic asset/liability studies.

The mutual fund investment strategy for the VEBA is market sensitive while remaining consistent with the risk tolerance, tax status, and cash flow requirements. Fund strategies include pursuing and capitalizing on market inefficiencies using duration, yield curve, security selection, geographic concentration, sector and state allocation.

Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks and supply and demand.

On December 31, 2015 we changed the method we use to estimate the service and interest components of net periodic benefit cost for defined benefit pensions and other postretirement benefits. This new estimation approach discounts the individual expected cash flows underlying the service cost and interest cost using the applicable spot rates derived from the yield curve used to discount the cash flows used to measure the benefit obligation. Historically, we estimated these service and interest cost components utilizing a single weighted-average discount rate derived from the yield curve used to measure the benefit obligation at the beginning of the period.

We have made this change to provide a more precise measurement of service and interest costs by improving the correlation between projected benefit cash flows to the corresponding spot yield curve rates. We have accounted for this change as a change in accounting estimate that is inseparable from a change in accounting principle and accordingly have accounted for it prospectively. The benefit obligation measured under this approach is unchanged as of December 31, 2015. The new approach will be used to measure the service and interest cost for the pension benefits, other postretirement benefits and other postemployment benefits in 2016. Based on current economic conditions, we estimate the service cost and interest cost for those plans will be reduced by approximately $6,400,000 in 2016 as a result of the change.

Starting with the 2016 net periodic benefit cost, the Company elected to use a spot discount rate approach to determine the interest cost component of expense and interest on the service cost component. Instead of using a single fixed discount rate, each year's cash flow is discounted at, and then credited with, interest based on the spot rate for that duration. The effective rate for interest on the benefit obligation is the single equivalent rate such that interest on the plan's PBO using the single rate equals the sum of the interest on each year's discounted cash flows determined using the corresponding spot rate along the Mercer Yield Curve. Interest on benefit obligations for purposes of determining the interest cost component of expense is calculated by applying interest to the present value of the payment expected at each payment date. For this purpose, interest is determined using the same spot rate used to determine the present value of the associated payment. In addition to the spot discount rate approach described above, the Company also elected to use split discount rates for the calculation of the PBO and service cost component of expense. The service cost calculation uses the same method as the calculation of the PBO, but is based on expected service cost cash flows only (e.g. expected retiree cash flows are not included).

In 2014, the Society of Actuaries completed a mortality study and issued a new base mortality table (RP-2014) and new mortality improvement scale (MP-2014). The Company has decided to move to the Mercer modified MRP-2007 base mortality table and the Mercer modified MMP-2007 generational projection scale on December 31, 2014. In previous years, the Company used the RP-2000 base mortality table and the Scale AA generational projection scale. This change resulted in an increase of this benefit obligation in 2014.

To set the expected return on plan assets for the qualified pension plan, the Company projects returns on each asset class using historical return relationships and making adjustments as necessary, given current market and economic conditions. The projected returns are then applied to the portfolio target asset allocation weightings and result in a projected long-term portfolio rate of return.

C. Fair Value Measurement of Plan Assets

(1) The following table summarizes fair value measurements by level at December 31 for qualified retirement benefit plan assets and liabilities:

	Fair Value Measurements Using Quoted Prices in Active Markets for Identical Assets (Level I)	Significant Other Observable Inputs (Level II)	Significant Unobservable Inputs (Level III)	Total Fair Value

(3) The following is a description of the valuation methodologies used for the benefit plan assets. There have been no changes in the methodologies used during the years ended December 31, 2016 and 2015.

D. Rate of Return on Assets Assumption

To set the expected return on plan assets for the qualified pension plan, the Company projects returns on each asset class using historical return relationships and making adjustments as necessary, given current market and economic conditions. The projected returns are then applied to the portfolio target asset allocation weightings and result in a projected long-term portfolio rate of return.

E. Defined Contribution Plans

BCBSNC has two defined contribution retirement plans qualified under Section 401(k) of the Internal Revenue Code, the BCBSNC Retirement Savings Plan and the BCBSNC 401(k) Plan (401(k) Plan). Participant pretax and Roth contributions are matched at a rate of 100% of the first 4% and 50% of the next 2% of compensation contributed. Additional Company contributions include profit sharing contributions that range from 2% to 5% of eligible compensation, based on the employee's years of service with the Company, and Transition Contributions that range from 1% to 8% of eligible compensation for eligible employees who were participants in the defined benefit pension plan on December 31, 2013. Transition Contributions will cease after December 31, 2023. Employee and Company contributions are subject to certain regulatory limits and service conditions.

The Company's contributions to the plans totaled $32,632,458 and $30,794,362 for the years ended December 31, 2016 and 2015, respectively.

The Company also maintains the Restoration Plan, a non-qualified defined contribution plan, to ensure that designated participants receive the full amount of benefits to which they would have been entitled under the BCBSNC 401(k) Plan except for limits on compensation imposed by the Internal Revenue Service. The Company's contributions to the plans totaled $1,958,045 and $1,974,567 for the years ended December 31, 2016 and 2015, respectively.

F. Multiemployer Plans

BCBSNC does not participate in any multiemployer plans.

G. Consolidated/Holding Company Plans

The Company does not participate in any qualified, noncontributory defined benefit pension plans sponsored by any affiliates.

H. Post-Employment Benefits and Compensated Absences

The Company does not have any post-employment benefits that are not accrued for in accordance with SSAP No. 11 Post-Employment Benefits and Compensated Absences.

I. Impact of Medicare Modernization Act on Postretirement Benefits

(1) The Medicare Prescription Drug, Improvement and Modernization Act of 2003 allows employers who offer actuarially equivalent prescription drug benefits to retirees to receive a federal subsidy starting in 2006. The Plan did not apply for these federal subsidies during 2016 or 2015 and does not expect to apply for them in 2017.

(2) Not applicable.

(3) Not applicable.

13. Capital and Surplus, Shareholders' Dividend Restrictions and Quasi-Reorganizations

(1) The Company has no shares authorized, issued or outstanding since the Company is incorporated as a taxable not-for-profit organization as of December 31, 2016 and 2015.

(2) The Company has no preferred stock outstanding.

(3) The Company does not declare dividends as it does not have shares authorized, issued or outstanding.

(4) The Company did not pay any dividends as of December 31, 2016 or 2015.

(5) The Company did not pay any dividends to stockholders as of December 31, 2016 or 2015.

(6) There were no restrictions placed on the Company's unassigned funds as of December 31, 2016 and 2015.

(7) The Company had no unpaid advances of surplus as of December 31, 2016 and 2015.

(8) The Company did not hold any shares of stock for purposes such as conversion of preferred stock, employee stock options or stock purchase warrants as of December 31, 2016 and 2015.

(9) The Company does not have any special surplus funds as of December 31, 2016 and 2015. The Affordable Care Act (ACA) imposes a nondeductible assessment on entities that issue health insurance for each calendar year beginning on or after January 1, 2014. The liability related to the Section 9010 ACA assessment shall be estimated and recorded in full once the entity provides qualifying health insurance (typically January 1) in the applicable calendar year in which the assessment is paid (fee year) with a corresponding entry to expense. The Section 9010 ACA assessment shall be recognized in full on January 1 of the fee year, in the operating expense category of Taxes, Licenses and Fees. On January 1, 2016 and 2015, respectively, the Company recognized in full $138,472,491 and $135,202,257 related to the Section 9010 ACA assessment. At September 30, 2016, the Company adjusted our initial amount for 2016 by ($13,486,166), based on the final fee calculation from the Internal Revenue Service. At September 30, 2016 and 2015, the Company paid $124,986,325 and $131,583,917, respectively, based on the final fee calculation from the Internal Revenue Service.

On January 1 of the fee year, the prior year segregation in special surplus is reversed and the full current fee year assessment liability shall be accrued. As of December 31, 2015, the Company segregated amount of special surplus is $138,472,491. As of and for the year ended December 31, 2016, the Company has not segregated special surplus for the health insurer fee to be paid in 2017. Per the Consolidated Appropriations Act of 2016, Title II, Moratorium on Annual Fee on Health Insurance Providers, the collection of the health insurer fee is suspended for calendar year 2017.

(10) The portion of unassigned funds (surplus) represented or reduced by cumulative unrealized gains and losses, including accumulated amortized goodwill of $3,759,778 were ($209,456,306) and ($218,327,718) in 2016 and 2015, respectively.

(11) The Company does not have any surplus notes debentures or similar obligations as of December 31, 2016 and 2015.

(12) The Company does not have any quasi-reorganizations as of December 31, 2016 and 2015.

(13) The Company was not involved in any quasi-reorganizations; therefore, there is no effective date(s) for quasi-reorganization.

14. Liabilities, Contingencies and Assessments

A. Contingent Commitments

The Company has a long-term debt obligation due September 2044, future interest payments on this debt obligation are as follows: 2017, $6,420,000; 2018, $6,289,000; 2019, $6,153,000; 2020, $6,011,000; 2021, 5,864,000 and thereafter $76,041,000.

The Company has a commitment to Trizetto to develop a claims processing system. Related funding for 2016 and 2015 were $46,771,663 and $32,257,766, respectively. Future expected costs for this system are as follows: 2017, $4,835,753; 2018, $4,835,753; 2019, $4,698,061; 2020, $4,009,597; and 2021, $4,009,597.

At December 31, 2016, expected future costs to BCBSNC related to a purchase obligation for stated service fees with non-cancelable terms with Fujitsu for outsourced IT infrastructure are estimated as follows: 2017, $70,413,700; 2018, $0; 2019, $0; 2020, $0 and 2021, $0.

At December 31, 2016, we have various other non-cancelable arrangements with our vendors for outsourced claims processing, healthcare programs, and IT support with future costs estimated as follows: 2017, $137,616,350; 2018, $76,658,404; 2019, $36,387,370; 2020, $14,92,7793; and 2021, $1,285,968.

The National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) is a voluntary organization consisting of the state life and health insurance guaranty associations located throughout the U.S. State life and health insurance guaranty associations, working together with NOLHGA, provide a safety net for their state's policyholders, ensuring that they continue to receive coverage even if their insurer is declared insolvent. The Company is aware that the Pennsylvania Insurance Commissioner (Insurance Commissioner) has placed Penn Treaty Network America Insurance Company and its subsidiary American Network Insurance Company, or collectively Penn Treaty, in rehabilitation, an intermediate action before insolvency. On July 27, 2016, the Pennsylvania Insurance Commissioner filed a petition to move Penn Treaty from rehabilitation to liquidation. It is anticipated that the Pennsylvania court will approve the petition to liquidate Penn Treaty in early 2017. In that event, the Company and other insurers may be required to pay a portion of Penn Treaty's policyholder claims through state guaranty association assessments in future periods. The Company will continue to monitor the situation and may record a liability and expense in future reporting periods, as well as an asset for a premium tax offset which could be material to its cash flows and results of operations.

B. Assessments

As of December 31, 2016 and 2015, the Company is not aware of any assessments against the Company.

C. Gain Contingencies

The Company does not have any material gain contingencies as of December 31, 2016 and 2015.

D. Claims related extra contractual obligation and bad faith losses stemming from lawsuits

The Company did not pay any amounts to settle claims related to extra contractual obligations or bad faith claims stemming from lawsuits.

E. Joint and Several Liabilities

The Company did not have joint and several liabilities as of December 31, 2016 and 2015.

F. All Other Contingencies

We are regularly involved in litigation, both as a defendant and as a plaintiff, but primarily as a defendant. Litigation naming us as a defendant ordinarily arises out of our business operations as a health services organization and our investment activities. Some of the lawsuits may be class actions, or purport to be, and some may include claims for unspecified or substantial punitive and treble damages.

We may discuss such litigation in one of three ways. We accrue a charge to income and disclose legal matters for which the chance of loss is probable and for which the amount of loss can be reasonably estimated. We may disclose contingencies for which the chance of loss is reasonably possible and provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. Finally, we may voluntarily disclose loss contingencies for which the chance of loss is remote in order to provide information concerning matters that potentially expose us to possible losses.

The Company is involved in litigation (In Re: Blue Cross Blue Shield Antitrust Litigation (United States District Court, Northern District of Alabama)) which is a multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans. The Company is a named defendant in forty-three of the consolidated cases. The cases all allege an ongoing conspiracy in violation of the Sherman Antitrust Act among the Blues and the BCBSA and seek (1) a permanent injunction prohibiting enforcement of any agreements which restrict the BCBSA member operating territories; (2) treble damages for (a) alleged artificially inflated premiums in the case of subscribers and (b) alleged suppressed provider compensation in the case of providers and (3) attorneys' fees and costs. Additionally, one of the consolidated cases against the Company makes antitrust allegations based on most favored nations ("MFN") clauses in the Company's provider contracts and seeks reformation of the Company's provider contracts to strike MFN clauses and monetary damages. The case is now in the discovery stage. The Company intends to vigorously defend this litigation.

The Company is also involved in litigation (In Re: Anthem Data Breach Litigation(United States District Court, Northern District of California)). The case is a Federal, multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans, arising out of a cyber-attack perpetrated against Anthem, Inc. in December, 2014 and January, 2015. The case seeks certification of a class of all Blue plan insured members and alleges various negligence and breach of contract claims and violations of consumer protection laws and seeks injunctive relief and compensatory and punitive damages. The Company is vigorously defending the case.

The Company is also a defendant in litigation (Susan Sykes d/b/a Advanced Chiropractic, et al. v. BCBSNC, et al). This class action was filed May 22, 2015 against BCBSNC and other carriers, CIGNA, Medcost and Healthgram who use Health Network Solutions, Inc. ("HNS") to provide their chiropractic network. The complaint alleges a purported plaintiff class of all chiropractors who practiced in North Carolina from 2005 to the present and asserts claims for (1) declaratory judgment invalidating the agreements between HNS and the individual carriers; (2) price fixing, monopsony and monopoly; (3) unfair and deceptive trade practices; (4) illegal conspiracy in restraint of trade; (5) breach of fiduciary duty; and (6) punitive damages. Generally, the plaintiffs contend that the carriers' agreements with HNS result in underpayment to chiropractors and/or illegal exclusion of chiropractors from the carriers' provider networks. The case was originally filed in North Carolina state court, but has been transferred to the North Carolina Business Court to be consolidated with a prior pending action by the same plaintiffs against HNS. All defendants filed Motions to Dismiss on September 25, 2015 which are currently pending. The Company is vigorously defending the case.

Additionally, BCBSNC is also involved in various claims and legal actions arising in the ordinary course of business. However, management believes that proceedings arising in the ordinary course of business and those referenced above will not have a material adverse impact on the financial position of the Company.

15. Leases

A. Lessee Operating Lease

(1)

a. The Company leases office space and certain office equipment under various non-cancelable operating leases. Rental expense was $5,352,385 and $3,820,228 for periods ended December 31, 2016 and 2015, respectively.

b. The Company does not have contingent rental payments.

c. Certain rental commitments have renewal options extending through the year 2017 and are subject to adjustments in future periods.

d. The Company does not have lease agreement that include restrictions.

e. The Company does not have lease agreements that were terminated early or for which the Company is no longer using the leased property benefits, and the liability recognized in the financial statements.

(2) a. At December 31, 2016, the minimum aggregate rental commitments are as follows:

	Year Ending December 31	Operating Leases
1.	2017	$4,028,150
2.	2018	$3,609,341
3.	2019	$1,683,356
4.	2020	$1,484,936
5.	2021 and thereafter	$1,178,158
6.	Total	$11,983,941

b. The Company does not have any total minimum rentals to be received in the future under non-cancelable subleases as of December 31, 2016.

(3) The Company is not involved in any sales-leaseback transactions as of December 31, 2016 and 2015.

B.

(4) Not applicable

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. Transfers of Receivables Reported as Sales

The Company had no transfers of receivables reported as sales during 2016 and 2015.

B. Transfer and Servicing of Financial Assets

The Company had no transferring or servicing of financial assets during 2016 and 2015.

C. Wash Sales

The Company had no wash sales during 2016 and 2015.

18. Gain or Loss to the Reporting Entity from Uninsured Plans and the Uninsured Portion of Partially Insured Plans

A. ASO Plans

The loss from operations from ASO uninsured plans and the uninsured portion of partially insured plans were as follows during 2016:

	ASO Uninsured Plans	Uninsured Portion of Partially Insured Plans	Total ASO
Net reimbursement for administrative expenses (including administrative fees) in excess of actual expenses	$(30,251,071)	$ -	$(30,251,071)
Total net other income or expenses (including interest paid to or received from plans)	-	-	-
Net loss from operations	$(30,251,071)	$ -	$(30,251,071)
Total claim payment volume	$2,167,470,015	$ -	$2,167,470,015

Administrative fees incurred under this plan were $78,927,916 during 2016.

The Company's ASO business includes a multi-year agreement with a key customer. Currently, the Company anticipates ultimate future revenues will be less than the anticipated cost of administration.

B. ASC Plans

The income from operations from ASC uninsured plans and the uninsured portion of partially insured plans were as follows during 2016:

	ASC Uninsured Plans	Uninsured Portion of Partially Insured Plans	Total ASC
Gross reimbursement for medical cost incurred (including other BlueCard claims)	$7,535,863,898	$ -	$7,535,863,898

D. The carrying amounts reported in the Statements of Assets, Liabilities, Capital and Surplus, for cash, cash equivalents, investment income due and incurred, premiums receivable, and other receivables, amounts receivable relating to uninsured plans, income tax receivable, premiums received in advance, medical and other benefits payable, accounts payable and accrued expenses, and payable for securities approximate fair value because of the short term nature of these items.

Non-financial instruments such as property and equipment, other current assets, deferred income taxes and certain financial instruments such as policy liabilities are excluded from the fair value disclosures. Therefore, the fair value amounts cannot be aggregated to determine our underlying economic value.

Not Practicable to Estimate Fair Value:

Investments available for sale	Carrying Value	Effective Int Rate	Maturiy Date	Explanation
Parents, Subsidiaries and Affiliates	$172,070,314	-	-	Affiliates of the company

21. Other Items

A. Unusual or Infrequent Items

The Company had no unusual or infrequent events or transactions during 2016 and 2015.

B. Troubled Debt Restructuring: Debtors

The Company had no troubled debt restructurings during 2016 and 2015.

C. Other Disclosures

The Company had no other disclosures during 2016 and 2015.

D. Business Interruption Insurance Recoveries

The Company had no business interruption recoveries recognized in December 31, 2016 and 2015.

E. State Transferable and Non-transferable Tax Credits

(1) Carrying Value of Transferable and Non-transferable State Tax Credits Gross of any Related Tax Liabilities and Total Unused Transferable and Non-transferable State Tax Credits by State in Total.

Description of State Transferable and Non-transferable Tax Credits	State	Carrying Value	Unused Amount
Non-transferable Tax credits	NC	$66,534,823	$25,891,141
Total		$66,534,823	$25,891,141

(2) Method of Estimating Utilization of Remaining Transferable and Non-transferable State Tax Credits

The Company estimated the utilization of the remaining transferable and non-transferable state tax credits by projecting future premium taking into account policy growth and rate changes, projecting future tax liability based on projected premium, tax rates and tax credits, and comparing projected future tax liability to the availability of remaining transferable and non-transferable state tax credits.

(3) Impairment Loss

The Company recognized an impairment loss of $0 related to the write-down as a result of impairment analysis of the carrying amount for state transferable and non-transferable tax credits.

(4) State Tax Credits Admitted and Non-admitted

	Total Admitted	Total Non-admitted
A. Transferable	$-	$-
B. Non-Transferable	$24,813,108	$41,721,715

F. Subprime-Mortgage-Related Risk Exposure

The Company did not have any subprime mortgage related risk at December 31, 2016 and 2015.

G. Retained Assets

The Company did not have any retained assets at December 31, 2016 or 2015.

H. Insurance-Linked Securities (ILS) Contracts

The Company did not have any ILS contracts at December 31, 2016 or 2015.

22. Events Subsequent

Type I: Recognized Subsequent Events:

The Company has evaluated subsequent events through February 28, 2017, which is the date that the financial statements were available to be issued, for recognition or disclosure in our statutory financial statements. All of the effects of subsequent events that provide additional evidence about conditions that existed at the consolidated balance sheet date, including the estimates inherent in the process of preparing the consolidated financial statements, are recognized in the consolidated financial statements. The Company does not recognize subsequent events that provide evidence about conditions that did not exist at the balance sheet date but arose after, but before the financial statements are available to be issued. In some cases, non-recognized subsequent events are disclosed to keep the financial statements from being misleading.

Type II: Non-recognized Subsequent Events:

On January 1, 2017, the Company would be subject to an annual fee under section 9010 of the Affordable Care Act (ACA). However, per the Consolidated Appropriations Act of 2016, Title II, Moratorium on Annual Fee on Health Insurance Providers, the collection of the health insurer fee is suspended for calendar year 2017. This annual fee is allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1, 2016.

		Current Year	Prior Year
A.	Did the reporting entity write accident and health insurance premium that is subjected to Section 9010 of the Federal Affordable Care Act?	Yes	
B.	ACA fee assessment payable for the upcoming year	$-	$138,472,491

F.	Authorized Control Level before surplus adjustment	$2,187,040,450	
G.	Authorized Control level	$263,761,161	
H.	Would reporting the ACA assessment as of December 31, 2016, have triggered an RBC action level	No	

23. Reinsurance

A. Ceded Reinsurance Report

Section 1 - General Interrogatories

1. Are any of the reinsurers, listed in Schedule S as non-affiliated, owned in excess of 10% or controlled, either directly or indirectly, by the company or by any representative, officer, trustee, or director of the company?
   (X) No

2. Have any policies issued by the Company been reinsured with a company chartered in a country other than the United States (excluding U.S. Branches of such companies) that is owned in excess of 10% or controlled directly or indirectly by an insured, a beneficiary, a creditor or an insured or any other person not primarily engaged in the insurance business?
   (X) No

Section 2 – Ceded Reinsurance Report – Part A

1. Does the Company have any reinsurance agreements in effect under which the reinsurer may unilaterally cancel any reinsurance for reasons other than for nonpayment of premium or other similar credit?
   (X) No

2. Does the reporting entity have any reinsurance agreements in effect such that the amount of losses paid or accrued through the statement date may result in a payment to the reinsurer of amounts that, in aggregate and allowing for offset of mutual credits from other reinsurance agreements with the same reinsurer, exceed the total direct premium collected under the reinsured policies?
(X) No

Section 3 – Ceded Reinsurance Report – Part B

1. What in the estimated amount of the aggregate reduction in surplus, (for agreements other than those under which the reinsurer may unilaterally cancel for reasons other than for nonpayment of payment or other similar credits that are reflected in Section 2 above) of termination of all reinsurance agreements, by either party, as of the date of this statement? Where necessary, the Company may consider the current or anticipated experience of the business reinsured in making this estimate.
NONE

2. Have any new agreements been executed or existing agreements amended, since January 1 of the year of this statement, to include policies or contracts that were in force or which had existing reserves established by the company as of the effective date of the agreement?
(X) No

B. Uncollectible Reinsurance

The Company does not have any uncollectible reinsurance balances due as of December 31, 2016 and 2015.

C. Commutation of Ceded Reinsurance

24. Retrospectively Rated Contracts & Contracts Subject to Redetermination

A. Method Used to Estimate Accrued Retrospective Premium Adjustments

The Company estimates accrued retrospective premium adjustments for its group health insurance business through a mathematical approach using an algorithm of the company's underwriting rules and experience rating practices.

B. Accrued Retrospective Premium Disclosure

The Company records accrued retrospective premium as an adjustment to earned premium.

C. Net Premiums Written Disclosure

The amount of net premiums written by the Company for the period ended December 31, 2016 that are subject to retrospective rating features was $6,750,769,404, that represented 94% of the total net premiums written. No other net premiums written by the Company are subject to retrospective rating features.

D. Medical Loss Ratio Rebates Required Pursuant to the Public Health Service Act

The Company does not anticipate having to pay a rebate as of the current reporting period year to date, and as a result, there have been no rebates accrued for the Company's Individual, Small, Student, or Large Group business as of December 31, 2016.

Beginning in 2014, Medicare Advantage plans are also subject to the 85% minimum MLR. MLR rebates to Centers for Medicare and Medicaid Services (CMS) are to be provided annually if the insurer fails to meet the requirements in the market for the prior year. Medicare rebates are due for the 2015 reporting year and will be paid in 2017. As of December 31, 2016, activity related to Medicare MLR rebate reserves and premium adjustments was as follows:

25. Change in Incurred Claims and Claim Adjustment Expenses

Reserves as of December 31, 2015 were $684,240,466. As of December 31, 2016, $577,720,573 has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years of $8,202,906 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on Comprehensive and Medicare lines of business. Therefore, there has been a $98,316,987 favorable prior-year development since December 31, 2015 to December 31, 2016, primarily a result of cost sharing reduction impact, favorable claims development, and timing of ACA reinsurance estimates.

26. Intercompany Pooling Arrangements

The Company had no intercompany pooling arrangements recognized in December 31, 2016 and 2015.

27. Structured Settlements

33. Premium and Premium Equivalent Reporting

The information below presents BCBSNC ratios based on premium and premium equivalents. Premium equivalents are administrative fees earned from the Company's ASO and ASC Plans plus claims processed for this self-funded business. Medical loss, operating expense and net income ratios based on premiums and premium equivalents represent more complete financial ratios, as they include the total activities associated with the Company's business. Cost containment expenses are included in the operating expense ratio and excluded from the medical loss ratio. Premium taxes are included in the operating expense ratio. Ratios and certain dollar amounts below were calculated based on amounts obtained from within the Annual Statement filing.

Medical loss ratio (with premium equivalents)	89.7%
Operating expense ratio (with premium equivalents)	9.8%
Net income ratio (with premium equivalents)	2.0%

Premium equivalent ratios above are calculated as a percentage of premiums and premium equivalents for medical loss and operating expense ratios, and a percentage of total revenue (premium, premium equivalents, other revenues, and net investment gains) for net income ratio.

Report of Independent Auditors

The Board of Trustees

BlueCross BlueShield North Carolina

We have audited the accompanying consolidated financial statements of Blue Cross Blue Shield of North Carolina, which comprise the consolidated balance sheets as of December 31, 2017 and 2016, and the related consolidated statements of comprehensive income, changes in accumulated capital and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, the Company has elected to change its method of accounting for amortizing gains and losses related to the Company's defined benefit pension plans in 2017. Our opinion is not modified with respect to this matter.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Blue Cross and Blue Shield of North Carolina and its subsidiaries at December 31, 2017 and 2016, and the consolidated results of their operations and their cash flows for the years then ended in conformity with U.S. generally accepted accounting principles.

1. Organization

Blue Cross and Blue Shield of North Carolina (BCBSNC; we; our; us; the Company) is a health services company domiciled in the state of North Carolina. The membership of BCBSNC and its subsidiaries (collectively the Company) totaled approximately 2.7 million members as of December 31, 2017. Including members served on behalf of other Blue plans, the Company's membership totaled approximately 3.8 million members served as of December 31, 2017. The Company's customers are located primarily in North Carolina, where the Company is licensed and operates. The Company provides a comprehensive spectrum of health benefits products and BCBSNC holds the exclusive licenses to use the Blue Cross® and Blue Shield® names and service marks in North Carolina. Health benefits offerings include preferred provider organization, or PPO, traditional indemnity medical, health maintenance organization, or HMO, Medicare supplement, Health Savings Account, or HSA, and Medicare Advantage plans. The Company also offers a broad range of health benefits services for self-funded plans, including claims processing, stop-loss insurance, actuarial and reporting services, network access, medical cost management and other administrative services. In addition, the Company offers a range of other products, including coverage for dental, vision, group life, disability, accidental death and dismemberment, long-term care, prescription drugs including Medicare Part D, vision hardware, mental health, substance abuse, and chiropractic benefits. The Company offers these products and services to large and small employers, groups and government units as well as individuals.

As of December 31, 2017, BCBSNC had five wholly-owned subsidiaries: Beacon Health Holdings ("Beacon"); Corium, LLC ("Corium"); Corium II, LLC ("Corium II"); Blue Cross and Blue Shield of North Carolina Senior Health ("Senior Health"); and NobleHealth, Inc. ("NobleHealth"). Beacon is a holding company for not-for-profit subsidiaries and affiliates. Corium owns, operates, and manages financed office buildings of the Company. Corium II owns, operates, and manages unencumbered office buildings of the Company. Senior Health will provide Medicare plans in the future. NobleHealth holds non-controlling strategic investments in certain health services companies and has six wholly-owned subsidiaries: Mosaic Group Services, LLC ("Mosaic Group"); Mosaic Health Solutions, LLC ("Mosaic Health Solutions"); Noble Benefit Services, LLC ("NBS"); Topaz Shared Services, LLC ("Topaz"); ACS Benefit Services, LLC ("ACS"); and NC Health Affiliates, LLC ("NCHA"). Mosaic Group functions as an insurance agency selling third-party life and disability and death and dismemberment products and is licensed as a third-party administrator. Mosaic Health Solutions holds non-controlling strategic investments in certain health services companies. NBS will function as a third-party administrator for self-insured employer groups. Topaz provides a healthcare payer operating system. ACS provides self-funded plans with complete third-party administration services for group medical, dental and disability benefits. NCHA operates as a staff augmentation service.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements are prepared in conformity with generally accepted accounting principles (GAAP) in the United States (US). Preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the amounts of revenues and expenses during the reporting period. The Company uses estimates and assumptions based on analytical and/or actuarially accepted quantitative methods in determining contract reserves and claims incurred but not yet reported, valuation of pension and other benefit plans, deferred income taxes, fair value of investments, other-than-temporary impairments and other valuation accruals. Actual results could differ materially from those estimates.

The consolidated financial statements include the accounts of BCBSNC and all of its wholly-owned subsidiaries. All significant intercompany transactions and accounts have been eliminated in consolidation.

Change in Accounting Principle

During 2017, we voluntarily changed our method of amortizing gains and losses in our defined benefit pension plans which are recognized in accumulated other comprehensive income ("AOCI") to a straight-line method over a 5 year period without the use of a corridor. Previously, we amortized unrecognized gains and losses in

excess of a 10% corridor over the estimated life (approximately 32 years) of plan participants. We adopted this new amortization method because it results in faster amortization and is more consistent with how the related pension balances are recognized on the balance sheet. Comparative amounts from prior periods have been adjusted to apply this new amortization methodology retrospectively in these financial statements to January 1, 2015.

Following are the impacts to financial statement line items as a result in the change in method of amortizing gains and losses for the periods presented in the financial statements:

	Consolidated Statement of Changes in Accumulated Capital – as adjusted		
	Accumulated Earnings	**Gross Unrealized Losses**	**Fair Value**
Balance, January 1, 2015, as previously reported	$2,444,803	$253,570	$2,698,373

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued guidance that would require an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The updated standard will replace most existing revenue recognition guidance in U.S. GAAP, except those related to insurance contracts, when it becomes effective and permits the use of either a full retrospective or retrospective with cumulative effect transition method. Early adoption is not permitted. The guidance is effective for annual reporting periods beginning after December 15, 2018. The Company expects to adopt the new guidance through retrospective restatement and is currently working to develop required disclosures and restate historical periods in line with its chosen method of adoption. The Company does not anticipate significant changes to its systems, processes or controls. The Company expects the adoption of this guidance will not have a material impact on our consolidated financial statements.

In April 2015, the FASB issued new guidance requiring entities to present debt issuance costs related to a recognized debt liability as a direct deduction from the carrying amount of that debt liability. This standard is effective beginning with annual reporting periods beginning after December 15, 2016. We adopted this new guidance effective January 1, 2017, which did not have a material impact on our consolidated financial statements.

In May 2015, the FASB issued new guidance requiring insurance entities to provide additional disclosures about claim liabilities including paid claims development information by accident year and claim frequency data and related methodologies. The guidance is effective for annual periods beginning after December 15, 2016 with early adoption permitted. We adopted this new guidance effective January 1, 2017.

In November 2015, the FASB issued new guidance, which eliminates the current requirement to present deferred tax liabilities and assets as current and noncurrent in a classified balance sheet. Instead, we will be required to classify all deferred tax assets and liabilities as noncurrent. The guidance is effective for annual periods beginning after December 15, 2017. The adoption of the new guidance will not have a material impact on our consolidated financial statements.

In January 2016, the FASB issued new guidance related to classification and measurement of financial instruments which requires equity securities that are not accounted for using the equity method or that do not result in consolidation, to be accounted for at fair value with changes in fair value recognized through net income. The

new guidance is effective beginning after December 15, 2018 with early adoption permitted under certain circumstances. The cumulative effect adjustment will depend on investments held and market conditions at adoption.

In February 2016, the FASB issued new guidance related to accounting for leases which requires lessees to record assets and liabilities reflecting the leased assets and lease obligations, respectively, while following the dual model for recognition in statements of income requiring leases to be classified as either operating or finance. Operating leases will result in straight-line expense (similar to current operating leases) while finance leases will result in a front-loaded expense pattern (similar to current capital leases). The guidance is effective beginning with annual periods beginning after December 15, 2019, with earlier adoption permitted, and requires retrospective application to previously issued financial statements. The adoption of this new guidance is not expected to have a material impact on our consolidated financial statements.

In June 2016, the FASB issued new guidance introducing a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses (CECL). The new CECL model generally calls for the immediate recognition of all expected credit losses and applies to loans, accounts and trade receivables as well as other financial assets measured at amortized cost, loan commitments and off-balance sheet credit exposures, debt securities and other financial assets measured at fair value through other comprehensive income, and beneficial interests in securitized financial assets. The new guidance replaces the current incurred loss model for measuring expected credit losses, requires expected losses on available-for-sale debt securities to be recognized through an allowance for credit losses rather than as reductions in the amortized cost of the securities, and provides for additional disclosure requirements. Our investment portfolio consists of available for sale debt securities. The guidance is effective beginning with annual periods beginning after December 15, 2020. We are currently evaluating the impact on our consolidated financial statements.

In August 2016, the FASB issued new guidance addressing the classification of certain cash receipts and cash payments. The intent of this guidance is to provide consistency in the presentation and classification of cash receipts and payments within the statement of cash flows. The guidance is effective beginning with annual periods beginning after December 15, 2018 with early adoption permitted and should be applied on a retrospective basis. The adoption of this new guidance is not expected to have a material impact on our consolidated financial statements.

In January 2017, the FASB issued new guidance clarifying the definition of a business. The guidance is effective beginning with annual periods beginning after December 31, 2018 with early adoption permitted. The adoption of the new guidance will not have a material impact on our consolidated financial statements.

In January 2017, the FASB issued new guidance modifying the concept of impairment from the condition that exists when the carrying amount of goodwill exceeds its implied fair value to the condition that exists when the carrying amount of a reporting unit exceeds its fair value. An entity no longer will determine goodwill impairment by calculating the implied fair value of goodwill by assigning the fair value of a reporting unit to all of its assets and liabilities as if that reporting unit had been acquired in a business combination. The guidance is effective beginning with annual periods beginning after December 31, 2021 with early adoption permitted. The adoption of the new guidance will not have a material impact on our consolidated financial statements.

In March 2017, the FASB issued new guidance modifying the presentation of net periodic pension cost and net periodic postretirement benefit cost. The guidance is effective beginning with annual periods beginning after December 31, 2018. The adoption of the new guidance will not have a material impact on our consolidated financial statements.

In March 2017, the FASB issued new guidance related to the amortization of purchased callable debt securities. The guidance is effective beginning with annual periods beginning after December 31, 2019. This guidance has been adopted with no impact to our consolidated financial statements.

Risks and Uncertainties

Unfavorable economic conditions could materially and adversely affect our revenues and our results of operations. For example, high unemployment rates could cause lower enrollment or lower rates of renewal in our employer group plans. Unfavorable economic conditions could cause employers to stop offering certain health care coverage as an employee benefit or elect to offer this coverage on a voluntary, employee-funded basis as a means to reduce their operating costs. In addition, unfavorable economic conditions could adversely impact our ability to increase premiums or result in the cancellation by certain customers of our products and services. All of these could lead to a decrease in our membership levels and premium and fee revenues and could materially and adversely affect our results of operations, financial position and cash flows.

Our investment portfolio may suffer losses, which could materially and adversely affect our results of operations, financial position and cash flows. Market fluctuations could impair our profitability and capital position. Volatility in interest rates affects our interest income and the market value of our investments in debt securities of varying maturities, which comprise a majority of the fair value of our investments as of December 31, 2017.

We also allocate a proportion of our portfolio to equity and alternative investments, which are subject to greater volatility than fixed income investments. General economic conditions, stock market conditions, and many other factors beyond our control can materially and adversely affect the value of these investments and may result in investment losses.

There can be no assurance that our investments will produce total positive returns or that we will not sell investments at prices that are less than their carrying values. Changes in the value of our investment assets, as a result of interest rate fluctuations, changes in issuer financial conditions, illiquidity or otherwise, could have an adverse effect on our equity. In addition, if it became necessary for us to liquidate our investment portfolio on an accelerated basis, it could have a material adverse effect on our results of operations.

Investments made in privately held healthcare companies are not guaranteed to produce positive results. Our financial results may be impacted by a number of factors including, but not limited to, the failure of companies in which we invest to achieve business and operating plans, failure of these companies to adapt to a rapidly changing healthcare environment, and the inability of these companies to attract and retain key executives and employees. Additionally, negative changes in the financial markets could result in lower valuations (impacting the carrying value of investments already made) and the inability of these companies to access capital or to access capital on favorable terms. The impact of some or all of these risks could result in the impairment of some or all of our investments.

We routinely process, store, and transmit large amounts of data in our day to day operations. Such data includes sensitive personal, proprietary or confidential information relating to our customers, our business or other third-parties. Some of this data may be processed, stored, and transmitted outside of the U.S. because of operational reliance on strategic vendors.

The possibility of security incidents resulting in a breach of our information systems and/or sensitive information are constant risks to our organization. Notwithstanding the proactive and aggressive measures we employ to prevent them, experienced cyber criminals may be able to penetrate our layered security controls and misappropriate or compromise sensitive information given sufficient time and resources. Such attacks could create system disruptions or shutdowns. They may also result in the deployment of malicious software programs, such as viruses and worms, which could infect our systems or otherwise exploit any security vulnerabilities. Physical attacks and disruptions are also a risk. Our facilities may be subjected to security incidents or security attacks; acts of vandalism or theft; coordinated attacks by activist entities; misplaced or lost data; human errors; or other similar events that could negatively affect our systems and our customers' data.

The costs associated with threat mitigation and vulnerability remediation to prevent a breach or cyber-incident are significant, but potentially much greater when such activities are forced to occur after an event. Such efforts are always impactful and may not always be successful. Service interruptions, delays or complete lack of service resulting in customer dissatisfaction and the loss of existing or new customers are additional impacts associated with these activities. Breaches of our security measures and the unauthorized disclosure of sensitive

information could expose our customers to the risk of medical identity theft or financial harm. Additionally, such breaches could expose us or other third-parties to loss or misuse of sensitive information. This could result in litigation and potential liability for us, damaging our brand and reputation, or otherwise harm our business.

Substantially all of the Company's cash and cash equivalents are held in either deposits at financial institutions or in commercial paper with a high quality investment grade rating. Credit losses are not anticipated. All fixed income securities are rated investment grade at the time of purchase by nationally recognized rating agencies, and the credit ratings are continuously reviewed by management. The portfolio is diversified by limiting each individual non-government issuer concentration to no more than 5% of the portfolio.

We are dependent on the success of our relationship with a large vendor for a significant portion of our information system resources and certain other vendors for various other services. We have an agreement with Fujitsu America, Inc (Fujitsu), through February 2019 for the operation of our Information Technology systems and are dependent upon them for support functions. Additionally, we have signed a contract with HCL America (HCL) to begin transferring operations performed by Fujitsu in 2018; this will be effective through January 2021. We also have agreements with other vendors to provide call center, claims processing, enrollment and billing, and fulfillment support. Additionally, we have vendor dependencies associated with various workflow and transactional systems critical to our operations. Should these vendors be unable to provide their services, our operations and financial stability may be significantly impacted, but more importantly we may not be able to meet the demands of our customers.

The inability to bring a scalable and flexible information technology infrastructure to support and deliver on the current and anticipated future needs of the business in an efficient, cost effective and well-controlled manner could impact results of operations, financial position and cash flows. Our current core technology suite, infrastructure and business model is intended to provide core operating capabilities including enrollment, claims-processing and customer services with the explicit goals of reducing our operating costs and increasing speed-to-market and market offer flexibility. This core platform has been in service for our Small Group market since July 2014 and Individual Under 65 market since January 2016, with additional markets migrating over a number of years as we add new functionality. Our infrastructure model is transitioning from a fully outsourced model to a model including select outsourced responsibilities with others managed by the Company. Completion of these programs could favorably position the Company and improve our price competitiveness and speed-to-market. To achieve these outcomes, the decommissioning of existing infrastructure as the additional markets migrate will also be required. Execution risk exists on programs of this magnitude and complexity, while the business and operating cost value is largely delivered upon completion of the migration.

In addition, federal and state regulatory agencies may further restrict our ability to implement necessary changes in premium rates to earn our target contribution to surplus or impose additional restrictions, under new or existing laws, such as minimum medical loss ratio requirements or restricted definitions of costs to be included when calculating medical loss ratios under such definitions. Our ability to secure sufficient premium rates, including regulatory approval for and implementation of such rates on a timely basis, may be restricted by changes in federal and state regulations or by the application of existing federal and state regulations. A limitation on our ability to increase or maintain our premium rates and more restrictive medical loss ratio requirements could adversely affect our business, cash flows, financial condition and results of operations.

A wide variety of factors could result in volatility of medical losses in any given year. These factors include economic, legislative and regulatory risks whereby state and federal budgets could be materially and adversely affected, resulting in reduced reimbursements or payments for federal and state government health care coverage programs, including Medicare and Individual Exchange business. A reduction in state reimbursement rates could be implemented retrospectively to payments already negotiated and/or received from the government and could indirectly affect our results of operations, financial position and cash flows. In addition, the state and federal budgetary pressures could cause the government to impose new or a higher level of taxes or assessments for our commercial programs, such as premium taxes on insurance companies and health maintenance organizations and surcharges or fees on select fee-for-service and capitated medical claims, and could materially and adversely affect our results of operations, financial position and cash flows. New types of medical treatments or prescription drugs, increases in utilization of healthcare services, and unplanned changes to provider reimbursement rates could

emerge during the policy period or after the time premiums are established and approved by regulators, resulting in higher medical losses than expected. Finally, the actual size of a buying market or participation in a given market may vary from what is assumed at the time premiums are set, resulting in higher average medical costs in a risk pool and insufficient revenue.

Depending on the consolidation and integration of physician groups and hospitals, reimbursement strategies vary across markets. Fee-for-service is our predominant reimbursement methodology for physicians, but we are transitioning to a value-based payment program. More traditional physician fee schedules are developed at the state and regional level based on an assessment of several factors and conditions, including the Centers for Medicare & Medicaid Services ("CMS"), resource-based relative value system, medical practice cost inflation and physician supply. In addition, we have implemented and continue to expand physician incentive contracting, or "pay for performance", which ties physician payment levels to performance on quality and clinical outcomes. As providers continue to consolidate, we may experience upward pressure on reimbursement amounts and, in turn, our business, cash flows, financial condition and results of operations may be harmed.

Additionally, accountable care organizations ("ACOs"), physician practice management companies, and other organizational structures that physicians, hospitals and other care providers choose may change the way in which these providers interact with us and may change the competitive landscape. Such organizations or groups of physicians may compete directly with us, which could adversely affect our operations, and our results of operations, financial position and cash flows by impacting our relationships with these providers or affecting the way that we price our products and estimate our costs, which might require us to incur costs to change our operations.

Another risk that may develop relates to changes and disruption being incurred in our marketplace. The traditional payer-provider dynamic is being challenged by providers looking to expand into the payer space and create their own health plans. New entrants into the insurance space that heavily focus on automation and lower administrative expense create competition for payers. And finally, new technologies and delivery models may carve out the need for the traditional payer and provider service models. As these disruptive risks appear on the horizon, we are assessing them and planning for our best mitigation strategies to adapt our business model to take advantage of the changes while still providing value to our members as an enterprise.

The passage of the Affordable Care Act (ACA) in 2010 has resulted in dynamic changes in the provision of health insurance. The law brought many substantive changes to the health insurance market and has had a significant impact on health insurer operations. Some of the larger and more far-reaching requirements of the law include the individual and employer mandates, federal subsidies for low and middle income consumers, establishment of a standard set of benefits in the individual and small group markets (known as the Essential Health Benefits), an online Marketplace for consumers to compare and purchase health insurance, more stringent rating restrictions as well as increased review and scrutiny of rate increases. Additionally, the law imposed numerous new taxes and fees on insurers. While many of these provisions of the law have been in effect for several years, health insurance issuers continue to feel the far-reaching effects of a litany of subsequent regulations and guidance implementing the law.

Federal and state regulatory changes in December 2013 allowed certain individuals to maintain their pre-ACA plans that are not compliant with health care reform, which led to higher than previously expected retention of existing underwritten health plans. As this was the case with many issuers across many states, this resulted in many consumers who would have bought ACA compliant plans, staying in either grandfathered or transitional (grandmothered) plans. But over the past seven years, many customers have given up their grandfathered plans – and many insurers have stopped offering them. Because no new customers have joined this pool in seven years, the group as a whole has gotten older and sicker. Without new, healthier members to balance these high cost members, grandfathered plans have become too expensive to continue offering and we terminated Individual grandfathered plans effective 12/31/2017.

In addition, the ACA has increased federal oversight of health plan premium rates and could adversely affect our ability to appropriately adjust health plan premiums on a timely basis. Financing for these reforms comes, in part, from material additional fees and taxes.

Given the breadth of possible changes and the uncertainties of interpretation, implementation, and timing of these changes, health care reform broadly has and will continue to change how we do business. These changes are likely to impact pricing, benefit design, product offering, and sales distribution channels. The response of insurance issuers, the market overall, and adjustments to plan offerings has caused some disruption in health care markets. Several national and state level issuers have experienced significant losses as a result of older and sicker members than expected enrolling in ACA plans, both within and outside of the Exchange. It is possible that health care reform and related regulations, as well as future legislative and regulatory changes, including legislative restrictions on issuers' ability to manage provider networks or otherwise operate business, may have a sustained material adverse effect on our results of operations, financial position, and cash flows.

In the 2015 federal budget bill, Congress specified that the ACA's risk corridor program must be budget neutral, with distributions not exceeding collections. In October 2015, CMS announced that for the 2014 benefit year, they would pay insurers expecting risk corridor payments 12.6% of their requested amount due to a shortfall with insurers having requested $2.87 billion in payments and CMS receiving $362 million (in aggregate). The notice repeated CMS' intention to pay the remaining 2014 amounts due out of 2015 and 2016 receivables. CMS stated that in the event of a shortfall in the program after the 2016 benefit year, they will 'explore other sources of funding for risk corridors payments'. In November 2016, CMS announced that all 2015 risk corridor collection amounts would be used to pay outstanding 2014 payments and that no funding would be available to pay 2015 amounts due. The 2015 payment amount was approximately 3.5% of the total 2014 requested amount. In November 2017, CMS released data on risk corridor obligations for 2016. The net payment owed to issuers for the 2016 benefit year was $4.9 billion nationwide. As expected, CMS will not make any payments toward the 2016 losses. Instead, CMS intends to use the 2016 collections, which amount to $24.9 million, to make additional payments towards the 2014 risk corridor outstanding balance. This continued uncertainty regarding receipt of risk corridor owed amounts makes financial forecasting and reporting increasingly challenging.

The election of Donald Trump, coupled with Republican majorities in both houses of Congress, presented a possibility to repeal and replace the ACA early in 2017. In May 2017, the House passed health reform legislation and sent it to the Senate. The Senate then introduced their own health reform legislation which did not pass. In December 2017, Congress did pass, and the President signed into law, a tax reform bill which also eliminated the individual mandate penalty for 2019. Uncertainty remains as to what further policy changes will be forthcoming either through legislation or via regulations.

The US House of Representatives filed a lawsuit challenging the legality of Department of Health and Human Services (HHS) Cost Sharing Reduction (CSR) payments to insurers. CSR plans provide lower member cost share amounts and are available to enrollees at or below 250% of the Federal Poverty Level (FPL). HHS makes CSR payments directly to the Company as reimbursement for the lower cost-sharing amounts provided in CSR plans.

The House of Representatives maintained that the funds for CSR payments require a direct appropriation from Congress, which has not been made. The Obama administration, which was in office at the time of the lawsuit, maintained that CSR payments and the Advance Premium Tax Credit (APTC or subsidies) are inextricably linked (as APTC eligibility triggers CSR eligibility); thus, the appropriation for APTC serves as appropriation for CSRs as well.

In May 2016, a federal judge ruled in favor of the House of Representatives, but stayed the ruling pending the outcome of the appeal being pursued by the Obama administration (thus, allowing CSR payments to continue pending the appeal). In October 2017, the Trump administration announced that it was ending the subsidy program. Shortly thereafter, a coalition of 19 state Attorneys General, including N.C. Attorney General Josh Stein, filed a lawsuit in the Northern District of California against the Trump administration's decision to stop making the CSR payments (*California v. Trump).* Then, in December 2017, the Trump administration, the House of Representatives, and the 19 Attorneys General settled the *US House of Representatives v. Burwell* lawsuit. Under the settlement, the parties ask the Appeals Court to remand to the federal judge who ruled in favor of the House of Representatives and ask her to vacate the holding in her decision, e.g., the injunction against paying CSR payments absent an appropriation. Additionally, the settlement includes an agreement that

the federal judge's decision on both standing and the merits have no precedential value. The parties are awaiting finalization of the settlement. Regardless, the *California v. Trump* lawsuit continues for now.

The outcome of all of the CSR litigation is important because the Company is required to offer CSR plans to eligible individuals for the entire plan year under the issuer agreement with the Federal Exchange.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with an original maturity of three months or less and not restricted to be cash equivalents. Cash equivalents totaled $72,479 and $56,752 as of December 31, 2017 and 2016, respectively. Cash and cash equivalents are carried at cost, which approximates fair value due to the short maturity of these assets.

Included in other noncurrent assets as of December 31, 2017 and 2016 are restricted money market funds and bonds of $0 and $30,949, respectively, which were on deposit with the state of North Carolina in accordance with contractual requirements.

Investments

All investments are categorized as available-for-sale and are recorded at their fair values as of the balance sheet date. The Company records purchases and sales as of the trade date. Fixed income securities are classified as either current or noncurrent assets based on their contractual maturities as well as management's expectations as to when they will be sold. If the Company does not intend to sell the fixed income security, management considers available evidence to assess whether it is more likely than not the Company will be required to sell the security before the recovery of its amortized cost basis. Equity securities are primarily classified as current as they are available for use for current operations. Certain securities, which are used to satisfy contractual, regulatory or other requirements, continue to be classified as long-term, without regard to contractual maturity. Venture capital investments, real estate funds, private equity funds and private equity securities are classified as noncurrent assets.

Realized gains and losses, including other-than-temporary impairments that are determined to be due to credit, are included in income. Unrealized gains, unrealized losses estimated to be temporary in nature and other-than-temporary impairments determined to be non-credit related, net of deferred income taxes, are reflected in accumulated capital as Accumulated Other Comprehensive Income (Loss) (AOCI). Realized gains and losses on investments sold are determined on the specific identification basis. Interest and dividend income is recorded on the accrual basis.

Declines in the fair value of invested assets below cost are compiled on a monthly basis and reviewed quarterly to assess whether any other-than-temporary impairment loss should be recorded. Various thresholds are used to identify those securities which are at the greatest risk of an other-than-temporary impairment. Impairment losses for declines in value of fixed income investments and equity securities below cost attributable to issuer-specific events are based upon all relevant facts and circumstances for each investment and are recognized when appropriate. Some, but not all, of the factors considered in evaluating financial condition are earnings trends, industry outlook, negative cash flows, profitability, capital, the length of time below book value, downgrade of debt ratings and asset quality which could lead to an other-than-temporary impairment of any security. U.S. Treasury securities with unrealized losses are deemed to be temporarily impaired, with unrealized losses due to interest rate changes and not due to credit related factors. Fixed income investments with unrealized losses due to market conditions or industry-related events and where no specific evidence of deterioration of the issuers' credit exists, are not assumed to be other-than-temporary. If the Company does not intend to sell this fixed income security and management does not consider it to be more likely than not the Company will be required to sell the security before a market recovery or maturity, declines in value below amortized cost would not indicate that the security is other than temporarily impaired.

When an other-than-temporary impairment loss is determined to have occurred on equity securities, the losses are recognized in the Consolidated Statements of Comprehensive Income. The way in which impairment losses on fixed income securities are recognized in the financial statements is dependent on the facts and circumstances related to the specific security. If the Company intends to sell a security or it is more likely than not that we would be required to sell a security before the recovery of its amortized cost, less any current period credit

loss, the Company recognizes an other-than-temporary impairment in the Consolidated Statements of Comprehensive Income for the difference between amortized cost and fair value. If the Company does not expect to recover the amortized cost basis, does not plan to sell the security and if it is not more likely than not that the Company would be required to sell a security before the recovery of its amortized cost, less any current period credit loss, the recognition of the other-than-temporary impairment is bifurcated. The Company recognizes the credit loss portion in net income and the noncredit loss portion in AOCI.

The credit component of an other-than-temporary impairment is determined by comparing the net present value of projected future cash flows with the amortized cost basis of the fixed income security. The net present value is calculated by discounting our best estimate of projected future cash flows at the effective interest rate implicit in the fixed income security at the date of acquisition. For mortgage-backed and asset-backed securities, cash flow estimates are based on assumptions regarding the underlying collateral including expected prepayments, vintage, type of underlying asset, geographic concentrations, default rates, recoveries and changes in value of the underlying collateral. For all other fixed income securities, cash flow estimates are driven by assumptions regarding probability of default, including changes in credit ratings, and estimates regarding timing and amount of recoveries associated with a default.

Fair value is determined by quoted market prices, where available. For securities not actively traded, fair values were estimated using values obtained from independent pricing services or quoted market prices of comparable instruments. Management judgment is involved in evaluating whether a decline in an investment's fair value is other-than-temporary. The discovery of new information and the passage of time can change these judgments. Impairment judgments are revised when new information becomes known and any resulting impairment adjustments are made at that time.

Ownership in Investee Companies

The Company, through its wholly-owned subsidiary, NobleHealth, and its subsidiary, Mosaic Health Solutions, has ownership in several investee companies in the amount of $169,107 and $166,589 as of December 31, 2017 and 2016, respectively. Ownership interest amounts ranged from 1% to 50%. These investments are included in the Other assets line item in the Consolidated Balance Sheets and make up 5.1% and 7.0% of total invested assets at year end in 2017 and 2016, respectively.

These investments are accounted for under the equity method of accounting and the Company has elected the fair value method for most of the investments as they have determined that fair value best reflects the economics of these investments. These investments were valued using quantifiable data from the portfolio company, recent portfolio company financing events, discounted cash flows, and relevant revenue, market, earnings before interest, tax, depreciation and amortization (EBITDA), or similar multiples for comparable companies and transactions. Earnings in 2017 and 2016 for these investments were $38,397 and $14,372, respectively, which was recorded in Other income.

Premiums and Other Receivables

Premiums and other receivables include the uncollected amounts due from insured and self-funded customers and the federal government for amounts related to Medicare Advantage. Also, included in other receivables are the uncollected amounts of drug rebates, interest, certain profit sharing arrangements and other miscellaneous receivables. Premiums and other receivables are reported net of any allowance for uncollectible amounts. The allowance for uncollectible receivables is estimated each period and a valuation allowance is recorded based upon the age of unpaid amounts and other information about the customers as well as management's judgment regarding the ability of the customers to pay outstanding amounts. Estimates of uncollectible accounts receivable are revised each period, and changes are reflected in the operating expense line of the Consolidated Statements of Comprehensive Income in the period they become known. At December 31, 2017 and 2016, the Company recorded a valuation allowance of $18,281 and $12,956, respectively.

The Company's pharmacy benefit manager (PBM) contracts with pharmaceutical manufacturers, some of whom provide rebates based on use of the manufacturers products by the PBM for the Company's insured and self-funded customers. The Company accrues the rebates receivable monthly based on the terms of the applicable contracts. The PBM bills these rebates to the manufacturers on a quarterly basis. The Company is reimbursed

either annually or quarterly for these rebates. The Company records the rebates attributable to insured customers as a reduction to claims and medical expenses. The rebates attributable to self-funded customers are accrued as rebates receivable as well as a corresponding payable to self-funded customers in accordance with their contracts.

Affordable Care Act Risk Management Programs

Beginning in 2014, as prescribed by health care reform, three programs, commonly referred to as the 3R's, went into effect to reduce the risk for participating health insurance companies selling coverage on the public exchanges.

A three-year (2014-2016) reinsurance program was designed to provide reimbursement to insurers for high claims dollars resulting from individual business sold on or off the public exchanges. The reinsurance entity established by HHS is funded by a per-customer reinsurance fee assessed on all commercial medical plans, including self-insured group health plans. Only non-grandfathered individual plans are eligible for recoveries if claims exceed a specified threshold, up to a reinsurance cap. Reinsurance contributions associated with non-grandfathered individual plans are reported as a reduction in premium revenue, and estimated reinsurance recoveries are established with an offsetting reduction in medical claims expense. Reinsurance fee contributions for other insured business are reported in other operating expenses. After fully reflecting completed actual claims experience and sufficient claims run-out, development factors were set and used to record the reinsurance receivable. At December 31, 2017 and 2016, the Company had a reinsurance receivable of $15,923 and $100,839, respectively. In 2017, the Company collected $78,198 reinsurance related to 2016.

A permanent risk adjustment program reallocates funds from insurers with lower risk populations to insurers with higher risk populations based on the relative risk scores of participants in non-grandfathered plans in the individual and small group markets, both on and off the exchanges. Based on the risk of our members compared to the risk of other members in the same state and market, considering data obtained from industry studies and our proprietary market data, we estimate our year-to-date risk adjustment. The Company records a risk adjustment receivable or payable, with an offsetting adjustment to premium revenue when the amounts are reasonably estimable and collection is reasonably assured. To determine this amount, we used 3rd party consultant studies to supplement our own estimates in both years. These results were validated with internal actuarial models. At December 31, 2017 and 2016, the Company had a risk adjustment receivable of $41,000 and $165,000, respectively. Actual experience resulted in a risk adjustment of $170,500 for 2016, which was fully collected during the year.The Company does not have an outstanding receivable on risk adjustment for 2016. In 2016, the Company collected the vast majority of the risk adjustment receivable established in 2015.

A three year (2014-2016) risk corridor program is designed to limit insurer gains and losses by comparing allowable costs to a target amount as defined by HHS. This program applies to individual and small group qualified health plans, operating on and off the exchanges. Variances from the target amount exceeding certain thresholds may result in amounts due to or due from HHS. The Company records a risk corridor receivable or payable as an adjustment to premium revenue based on our year-to-date experience when the amounts are reasonably estimable. At December 31, 2017 and 2016, the Company had a net risk corridor receivable of $0 and $15,121 respectively.

In December 2014, the 2015 Continuing Resolution Omnibus Bill was approved by Congress and signed into law. Due to the lack of appropriation in the budget for the risk corridor program and the likelihood that payments required to be made by CMS would exceed amounts collected to fund the program, the Company evaluated the collectability of the risk corridor receivable and determined that it was probable that none of the 2015 amounts due from CMS would be collected and none of the 2016 amounts would be collected. As a result, the Company had a reserve of $357,735 and $325,919 as of December 31, 2017 and 2016, respectively.

The following is a summary of the 3R's as of December 31, 2017. Amounts are classified as current or long-term in the accompanying Consolidated Balance Sheets based on the timing of expected settlement.

	Reinsurance Recoveries	Risk Adjustment	Risk Corridor
Current assets	$15,923	$41,000	$-

Non-current assets	-	-	$-
Net asset	$15,923	$41,000	$0

The following is a summary of the 3R's as of December 31, 2016.

	Reinsurance Recoveries	Risk Adjustment	Risk Corridor
Current assets	$100,839	$165,000	$3,040
Non-current assets	-	-	12,081
Net asset	$100,839	$165,000	$15,121

Federal Employee Program

The Company participates in the Federal Employee Health Benefits Program (FEHBP) with other BlueCross BlueShield Plans. This program includes a fully-insured experience-rated contract, commonly known as the Federal Employee Program (FEP), between the Office of Personnel Management (OPM) and the Blue Cross Blue Shield Association (BCBSA), which acts as an agent for the participating BlueCross BlueShield plans. In addition, each participating plan, including the Company, executes a contract with BCBSA which obligates each participating plan to underwrite FEP benefits in its service area. Premium rates are developed by BCBSA and negotiated with OPM annually. These rates determine the funds that will be available to the participating BlueCross BlueShield plans to provide insurance to Federal employees that enroll with the BlueCross BlueShield FEP. The excess of gross premiums for the life of the program over the charges for the life of the program on an accrual basis is accounted for as a rate stabilization reserve (commonly referred to as the special reserve), as required by the contract between OPM and BCBSA. Each year, OPM also allocates a portion of the premiums to a contingency reserve which may be utilized by the participating plans in the event that annual premiums paid to the insurance carrier are insufficient or the rate stabilization reserve falls below certain levels prescribed by OPM. Premiums paid to the carrier and available to each participating BlueCross BlueShield plan, including the special reserve and the contingency reserve, are held at the U.S. Treasury, including amounts unused from prior periods. Any premiums that remain in the rate stabilization reserve upon termination of the BCBSA contract after the claims run-out and reimbursement of allowable administrative expenses would be returned to OPM for the benefit of the FEHBP. The FEP contract renews automatically each year unless written notice of termination is given by either party.

In accordance with the FEP contract, premium funds that exceed daily operating needs are held on behalf of the Company in letter of credit accounts at the U.S. Treasury to provide funding for claims, administrative expenses, and other charges to the contract. The Company, along with other BlueCross BlueShield plans who participate in the FEHBP contract, has an unrestricted right to draw funds being held in the U.S. Treasury, other than those allocated to the contingency reserve, for any valid claim or expense. If the balance of the special reserve is exhausted or falls below certain prescribed levels, OPM will transfer funds from the contingency reserve to the special reserve to the extent that funds are available in the contingency reserve. Amounts incurred in excess of the total reserves held at the U.S. Treasury for the FEP would not be reimbursed to the Company. The unaudited amounts being held in the special reserve are $7,862,341 and $6,333,521 as of September 30, 2017 and December 31, 2016, respectively. The unaudited amounts being held in the contingency reserve are $9,077,270 and $8,678,494 as of September 30, 2017 and December 31, 2016, respectively.

The Company has recorded its allocable share of the special reserve funds held in the U.S. Treasury as an asset, with an equivalent amount recorded as a rate stabilization reserve. These amounts are $135,880 and $43,286 as of December 31, 2017 and 2016, respectively, and are included in Other current assets and Other current liabilities in the accompanying Consolidated Balance Sheets. Additionally, the Company has recorded a mandatory statutory reserve for its FEP business. These amounts are $36,542 and $33,388 as of December 31, 2017 and 2016, respectively, and are included in Cash and other non-current liabilities in the accompanying Consolidated Balance Sheets.

Concentration of Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash equivalents, investments and premium and other receivables. All cash equivalents and investments are managed within established guidelines, which provide us diversity among issuers. Concentrations of credit risk with respect to premium and other receivables are related to our large number of payers comprising our customer base and the federal government.

FEP represented approximately 19.5% and 16.1%, of accounts receivable as of December 31, 2017 and 2016, respectively. ACA receivables represented 9.0% and 32.9% of accounts receivable as of December 31, 2017 and 2016, respectively. FEP and ACA receivables represented approximately 28.5% and 49.0% of accounts receivable for the years ended December 31, 2017 and 2016, respectively.

FEP represented approximately 11.1%, 14.4%, and 13.6% of net revenue for the years ended December 31, 2017, 2016 and 2015, respectively. ACA represented approximately 39.8% 23.2% and 23.0% of net revenue as of December 31, 2017, 2016, and 2015 respectively. FEP and ACA revenue represented approximately 50.9%, 37.6%, and 36.6% of net revenue for the years ended December 31, 2017, 2016 and 2015, respectively.

Property and Equipment

Property and equipment is stated at cost less accumulated depreciation and amortization. Depreciation and amortization is computed using the straight-line method over the estimated useful lives of the respective assets, which are 40 to 50 years for buildings, 3 to 10 years for furniture and equipment, and 2 to 10 years for computer equipment and software. Leasehold improvements are amortized using the straight-line method over the shorter of the lease term or estimated useful life of the asset. Upon disposition or retirement, assets and related accumulated depreciation accounts are relieved and any related gain or loss is reflected in the Consolidated Statements of Comprehensive Income. Property and equipment is evaluated annually for the existence of events or changes in circumstances that indicate the asset might be impaired. Property and equipment retired from use is classified as held for sale and is carried at the lower of its depreciated cost or fair value, less estimated costs to sell. The Company ceases depreciating these assets when they are classified as held for sale.

The Company develops software for internal use. Certain costs associated with the development or purchase of internal-use software are capitalized and amortized over the estimated useful lives of the software. All other development costs are expensed as incurred.

Goodwill and Intangible Assets

Goodwill represents the excess of cost of acquisition over the fair value of net assets acquired. Intangible assets represent the values assigned to acquired subscriber relationships and provider networks. Intangible assets are recognized as assets apart from goodwill because they meet one of two criteria: the contractual-legal criterion or the separability criterion. Goodwill is amortized over 10 years using the straight line method. Goodwill impairment testing will only occur if there is a triggering event that indicates that the fair value of the entity is below its carrying amount. If it is determined the carrying value of a reporting unit's goodwill exceeds its implied fair value, the Company records an impairment loss equal to the difference in that period.

Intangible assets are amortized over periods that originally range from 12 to 31 years using the undiscounted cash flow method. Intangible assets are evaluated annually for the existence of events or changes in circumstances that indicate the asset might be impaired. The Company assesses qualitative factors to determine whether it is more likely than not that the intangible assets' fair value is less than its carrying amount. Based on the results of this assessment, the Company may conduct a quantitative impairment test if the fair value of the intangible assets was determined to be, more likely than not, less than its carrying amount. Recoverability of intangible assets is primarily determined by a comparison of the carrying amount of the assets to future net cash flows before interest expense and income taxes expected to be generated by the assets. Impairment, if any, is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

Medical and Other Benefits Payable

The reserve for medical and other benefits payable includes management's estimate of the ultimate cost of the claims in process of settlement, claims incurred but not yet reported, and claims adjustment expenses needed to settle these claims.

The process of estimating reserves requires a high degree of judgment and a number of factors are taken into consideration. The Company actuarially estimates the liability for claims in process of settlement and claims incurred but not reported based on the most current historical claims payment patterns, changes in number of members, changes in products and benefits, and estimates of health care trend changes (cost, utilization, and intensity of services). Management also estimates the amount of claims adjustment expense needed to settle claims by determining the total administrative cost incurred to process claims as a percentage of total insured claims expense and applying that percentage to total claims in process of settlement and claims incurred but not yet reported.

Estimates for medical and other benefits payable are continually reviewed and revised as changes in experience and other factors occur, and revisions are reflected in the claims and medical expense line of the Consolidated Statements of Comprehensive Income in the period in which the change in estimate is identified. Changes in medical cost trend and claims payment patterns used in estimating reserves would impact the balance of medical and other benefits payable. These estimates may change as actuarial methods change or as underlying facts upon which these estimates are based change. There have been no significant changes to the Company's actuarial methods in the last three fiscal years.

We partner with eligible provider organizations in the state of North Carolina who agree to serve as ACOs to our members assigned to it. The ACOs aim to improve the quality of care their members receive while simultaneously lowering per capita costs. As an incentive to meet these goals, a portion of the savings representing the difference between claim payments made to the organization and a predetermined threshold are paid to the ACO if quality requirements are also met. If claim payments made to the ACO organization are higher than the predetermined threshold, then no shared savings payment is made. Other provider incentives are accrued as well, to cover programs based on quality metrics as well as incentives to improve quality, cost and/or coding efforts in the future.

Contract Reserves

Contract reserves are established for long duration insurance products where, because of the policy's design, future benefit costs increase because of factors that the plan cannot reflect in the premiums. The liability, established when a portion of the premium collected in years prior to the valuation date is meant to help pay for claim costs arising in later years, represents the present value of future benefits paid to or on behalf of policyholders and related expense less the present value of future net premiums. Contract reserves are actuarially estimated using methods that include locked in assumptions such as interest rates, claim trends, persistency, and other assumptions. The assumptions include a provision for possible unfavorable deviation. Contract reserves are established for NAIC Medicare Supplement products. In 2017, our Blue Advantage policies were terminated, and we are no longer holding any contract reserves for that block.

The current portion of contract reserves relates to the estimated amount by which the Company expects claims costs to exceed premiums collected over the next twelve months.

Book Overdrafts

Under our cash management system, checks issued but not yet presented to banks frequently result in overdraft balances for accounting purposes. These amounts are classified as a current liability in the Consolidated Balance Sheet and was $133,351 and $133,674 for the years ended December 31, 2017 and 2016, respectively. Changes in book overdrafts from period to period are reported in the Consolidated Statement of Cash Flows as an operating activity.

Bank Overdrafts

Under our cash management system, payments issued and presented to our banks can result in overdraft balances at those banks when immediate funding is not available; an extension of credit from the bank is granted. These amounts are classified as a current liability in the Consolidated Balance Sheets and was $0 for each of the years ended December 31, 2017 and 2016. Changes in bank overdrafts from period to period are reported in the Consolidated Statement of Cash Flows as a financing activity.

Premium Deficiency

Premium deficiencies are recognized when it is probable that expected future claims and claims adjustment expenses will exceed existing reserves plus anticipated future premiums on existing health benefit contracts with the consideration of investment income and overhead expense allocation. For purposes of premium deficiencies, contracts are deemed to be either short or long duration and are grouped in a manner consistent with the Company's method of acquiring, servicing and measuring the profitability of such contracts. Management determined that no premium deficiency reserve was warranted as of December 31, 2017 and 2016.

Revenue Recognition and Unearned Premiums

Revenue is principally derived from health benefit premiums. Generally, membership contracts have one-year terms. Group contracts are subject to cancellation upon 30 days written notice. Premiums are generally due monthly and are recognized as revenue during the period in which the Company is obligated to provide services or benefits. Amounts that are billed and received but unearned are recorded as unearned premiums. Because employer groups generally provide changes to their eligible member population one month in arrears, each billing includes an adjustment to premiums for the prior month's changes in member status that were not reflected in the original billing. Premium refunds are shown as a reduction in premium.

Our Medicare Advantage premium revenues are subject to periodic adjustment under CMS' risk adjustment payment methodology. The CMS risk adjustment model provides higher per member payments for enrollees diagnosed with certain conditions and lower payments for enrollees who are healthier. The Company and other health care plans collect, capture, and submit available diagnosis data to CMS within prescribed deadlines. CMS uses submitted diagnosis codes, demographic information, and special statuses to determine the risk score for most Medicare Advantage beneficiaries. CMS also retroactively adjusts risk scores during the year based on additional data. The Company estimates Medicare Advantage risk adjustment revenues based upon the data submitted and expected to be submitted to CMS.

Beginning in 2014, HHS pays us a portion of the health care costs for low-income individual members for which we assume no risk in accordance with the Health Care Reform Law. We account for these subsidies as a deposit in our Consolidated Balance Sheets and as a financing activity in our Consolidated Statements of Cash Flows. We do not recognize premiums revenue or benefits expense for these subsidies as these payments are a reimbursement. Receipt and payment activity is recorded in our Consolidated Balance Sheets in other current assets or accounts payable and accrued expenses depending on the balance at the end of the reporting period. Receipts from HHS associated with these cost sharing subsidies for which we do not assume risk were $113,869 and $50,119 higher than claims payments for the year ended December 31, 2017 and 2016, respectively.

Administrative fees include revenue from those group contracts that provide for the group to be at risk for all or, in the case of stop-loss agreements, a portion of its claims experience. These self-funded groups are charged an administrative fee that is based upon the number of members in the group and the group's claims experience. In addition, administrative fees include amounts received for the administration of certain other contracts, including cost plus arrangements. Administrative fees are recognized in accordance with the terms of the Company's contractual relationship with the customer. Administrative fees are included in the administrative fees and other revenue in the Consolidated Statements of Comprehensive Income. All benefit payments, except for those covered by stop-loss agreements, under these self-funded programs are excluded from the claims and medical expenses line of the Consolidated Statements of Comprehensive Income. Reimbursements of all medical benefit payments, except for those covered by stop-loss agreements, under these self-funded programs are also excluded from the operating revenue in the Consolidated Statements of Comprehensive Income.

Medicare Part D Prescription Drug Program

The Company serves as a plan sponsor offering Medicare Part D prescription drug insurance coverage under a calendar year contract with CMS. Payments from CMS under this contract include amounts for premiums, risk corridor adjustments, reinsurance and low-income cost sharing subsidies and prospective payments under the coverage gap discount program (CGDP).

The CMS contract is subject to audit and adjustments identified are recognized in the Consolidated Statements of Comprehensive Income as they are reviewed and agreed to by the Company. As of December 31, 2017, years 2006 through 2017 remain open to financial examination by CMS.

The payments received monthly from CMS and members represent amounts for providing prescription drug insurance coverage. The Company recognizes premium revenues for providing this insurance coverage ratably over the contract period. Premiums received in advance are recorded in unearned premiums. Pharmacy benefit and administrative costs under the contract are expensed as incurred. As a result of the Medicare Part D product design, the Company incurs a disproportionate amount of benefit costs in the first half of the contract year compared with the last half of the contract year.

The Company's CMS payment is subject to risk sharing through the Medicare Part D risk corridor provisions. The Company recognizes a risk sharing payable or receivable based on year-to-date activity. The risk corridor provisions compare costs targeted in the Company's annual bid to actual prescription drug costs, limited to actual costs that would have been incurred under the standard coverage as defined by CMS. Variances exceeding certain thresholds may result in CMS making additional payments to the Company or require the Company to refund to CMS a portion of what was received. The Company estimates and recognizes an adjustment to premium revenues related to these risk corridor provisions based upon pharmacy claims experience to date as if the annual contract were to terminate at the end of the reporting period. Accordingly, this estimate provides no consideration to future pharmacy claims experience.

In addition, payments from CMS for reinsurance and low-income cost sharing subsidies represent reimbursement of prescription drug costs for which the Company is not at risk and is recorded as a payable when received. Reinsurance subsidies represent reimbursements for CMS's portion of prescription drug costs which exceed the member's out-of-pocket threshold, or the catastrophic coverage benefit level. Low-income cost sharing subsidies represent reimbursements from CMS for all or a portion of the deductible, the coinsurance and co-payment amounts from the out-of-pocket threshold for low income beneficiaries. The Company recognizes risk sharing receivable or payable based on year to date activity. Monthly prospective payments from CMS for reinsurance and low-income cost sharing subsidies are based on assumptions submitted with the Company's annual bid. This payable is reduced when reinsurance is utilized and subsidies are provided by the Company. This activity is accumulated and when the net balance for each contract is negative, it is recorded as a receivable. The Company does not recognize premium revenues or claims expense for these subsidies as the Company does not incur any risk with this part of the program.

A reconciliation and related settlement of the final risk sharing and low-income cost sharing and reinsurance subsidy amounts is performed following the end of the contract year. As of December 31, 2017 and 2016, the net estimated risk sharing payable with CMS was $0 for both years. The net estimated subsidies receivable from CMS was $0 and $3,299 at December 31, 2017 and 2016, respectively. Any estimated receivables related to either the CMS risk sharing or subsidies are included in premiums and other receivables. Any estimated payables related to the CMS risk sharing or subsidies are included in accounts payable and other accrued expenses.

Tax Reform

On December 22, 2017, the United States government enacted significant changes to the US tax law with the passage of H.R.1, "An Act to Provide for Reconciliation Pursuant to Titles II and V of the Concurrent Resolution on the Budget for Fiscal Year 2018" (the "Tax Act"). The Tax Act included significant changes to existing tax law, including a permanent reduction to the US federal corporate income tax rate from 35% to 21%, along with changes to deductions, credits, and business-related exclusions.

Under ASC 740-10-45-15, the effects of changes in tax rates and laws on deferred tax balances are recognized in the period in which the new legislation is enacted. The Company has not completed its accounting for the tax effects of enactment of the Act as it is still analyzing certain aspects of the Act, and any future guidance from the Treasury, Internal Revenue Service, or the Company's regulator could potentially affect the measurement of those balances or give rise to new deferred tax amounts. However, it has made a reasonable estimate of the effects on its existing deferred tax balances. The total effect of tax law changes on deferred tax balances is recorded as a component of tax expense related to continuing operations for the period in which the law is enacted even if the assets and liabilities relate to discontinued operations, a prior business combination or items of accumulated other comprehensive income. The Company recognized a provisional tax benefit of $102,437 in 2017 due to the application of the newly enacted rates to existing deferred balances.

Deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and tax credit carryforwards. A valuation allowance is recorded to reduce the Company's deferred tax asset to the amount the Company believes is more-likely-than-not to be realized. This determination is based upon a number of assumptions, including: the types of deferred tax assets; the expected reversal patterns and periods of the temporary differences; taxes paid in prior periods available for carry-back claims; estimates of future taxable income; and other significant issues or developments likely to impact the realization of the benefits from the deferred tax assets. If facts are ultimately inconsistent with the Company's expectations, an adjustment to the Company's deferred tax asset may be required in the future. Any such adjustment would be charged or credited to income tax expense in the Consolidated Statements of Comprehensive Income in the period the determination is made.

When tax returns are filed, some positions taken will be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more-likely-than-not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50% likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceed the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying Consolidated Balance Sheets along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Interest and penalties associated with unrecognized tax benefits are charged to income tax expense in the Consolidated Statements of Comprehensive Income.

Employee Benefit Programs

The funded status of the Company's defined benefit pension plans and nonpension postretirement benefit plans is recognized in the Consolidated Balance Sheets. The funded status is measured as the difference between the fair value of plan assets and the benefit obligation at December 31, the measurement date. For defined benefit pension plans, the benefit obligation is the projected benefit obligation, which represents the actuarial present value of benefits expected to be paid upon retirement based on estimated compensation levels and service. For the nonpension postretirement benefit plans, the benefit obligation is the accumulated postretirement benefit obligation, which represents the actuarial present value of postretirement benefits attributed to employee services already rendered.

The fair value of plan assets represents the current fair value of cumulative Company contributions and investment earnings on those contributions less amounts paid out. Overfunded plans, with the fair value of plan assets exceeding the benefit obligation, are aggregated and recorded as a prepaid pension asset equal to this excess. Underfunded plans, with the benefit obligation exceeding the fair value of plan assets, are aggregated and recorded as a pension, postretirement and other retirement benefits liability equal to this excess. The current portion of the pension and nonpension postretirement benefit obligations represents the actuarial present value of benefits

payable in the next 12 months exceeding the fair value of plan assets, measured on a plan-by-plan basis. This obligation is recorded in accounts payable and accrued expenses in the Consolidated Balance Sheets. Net periodic pension and nonpension postretirement benefit expense (income) is recorded in operating expense in the Consolidated Statements of Comprehensive Income.

Certain events, such as changes in employee base, plan amendments and changes in actuarial assumptions, result in a change in the benefit obligation which results in corresponding changes in the gains and losses or prior service costs. Historically, the result of these events is amortized as a component of net periodic benefit expense (income) over the average life expectancy of the participants, provided such amounts exceed certain thresholds which are based upon the benefit obligation or the value of plan assets. As mentioned in footnote 2 above, there has been a change in accounting principle where the amortization period is now a five year period. (Gains) losses and prior service costs (credits) not recognized as a component of net periodic benefit expense (income) in the Consolidated Statements of Comprehensive Income as they arise are recognized as a component of gains (losses) and prior service costs (credits) recognized in AOCI in the Consolidated Statements of Changes in Accumulated Capital. Those (gains) losses and prior service costs (credits) are subsequently amortized and recognized as a component of net periodic benefit expense (income).

The measurement of benefit obligations and net periodic benefit expense (income) is based on estimates and assumptions approved by the Company's management. These valuations reflect the terms of the plans and use participant-specific information such as compensation, age and years of service, as well as certain assumptions, including estimates of discount rates, expected return on plan assets, rate of compensation increases and mortality rates.

The Company records expense for defined contribution plans for the Company's contribution when the employee renders service to the Company, essentially coinciding with the cash contributions to the plans. The expense is recorded in operating expense in the Consolidated Statements of Comprehensive Income.

Fixed Income Securities – For both 2017 and 2016, the unrealized losses on the Company's fixed income investments were not the result of any credit related issues. In 2017, the unrealized losses on the Company's fixed income investments were mostly attributable to changes in interest rates. All of the issuers have investment grade credit ratings and therefore, the Company believes each issuer will be able to meet the contractual terms of the obligation. At December 31, 2017 and 2016, the Company did not have the intent to sell and it was not more-likely-than-not that the Company would be required to sell the investments before the recovery of its amortized cost basis. The Company therefore did not consider the investments at December 31, 2017 and 2016 to be other-than-temporarily impaired.

Equity Securities – For both 2017 and 2016, the Company's investments in equity securities primarily consist of investments in mutual funds, exchange-traded funds (ETF's), and investments made directly in stocks publicly traded on domestic stock exchanges. Various investment lots were below cost at December 31, 2017 and 2016 and were primarily in emerging market debt ETF's, the vast majority of which had been in a loss position more than twelve months. The unrealized losses in these investments in 2017 were due to uncertainty concerning Federal interest rate actions, changes in commodity prices, and exchange rate movements. The Company believes the declines are not permanent in nature and are due to the lack of clarity regarding Federal policy and commodity price changes, and not related to increased credit risk.

The Company continues to review its investment portfolio under its impairment review policy. Given the unpredictability of market conditions and the significant judgments involved, there is a continuing risk that declines in fair value may occur and other-than-temporary impairments may be recorded in future periods.

4. Goodwill and Intangible Assets

The gross carrying amounts and accumulated amortization for the major intangible asset classes and goodwill at December 31 are as follows:

	2017		2016	
	Gross Carrying Amount	**Accumulated Amortization**	**Gross Carrying Amount**	**Accumulated Amortization**
Amortized intangible assets				
Subscriber relationships	$65,881	$42,310	$65,881	$40,055
Provider networks	$7,198	$6,393	7,198	$6,334
	$73,079	$48,703	$73,079	$46,389
Goodwill	95,218	$28,566	95,218	-
Total	$168,297	$77,269	$168,297	$46,389

Amortization expense of goodwill for 2017 and 2016 was $28,566 and $0, respectively. The Company corrected an immaterial error in 2017 to cumulatively catch-up amortization expense from 2015 and 2016 which was previously unrecorded. The impact is an additional expense of $19,044 in 2017.

Estimated goodwill amortization expense for the next five years is as follows: 2018, $9,522; 2019, $9,522; 2020, $9,522; 2021, $9,522 and 2022, $9,522.

Amortization expense of intangible assets for 2017 and 2016 was $2,314 and $2,585 respectively.

Estimated intangible asset amortization expense for the next five years is as follows: 2018, $2,034; 2019, $1,943; 2020, $1,857; 2021, $1,774 and 2022, $1,695.

5. Property and Equipment

Property and equipment as of December 31 consists of:

	2017	2016
Land and improvements	$40,388	$34,250
Buildings	102,426	107,545
Furniture, equipment and leasehold improvements	52,883	52,095

Computer equipment and software internally developed and purchased	469,897	404,386
	767,780	690,434
Less – accumulated depreciation and amortization	$(258,191)	$(219,877)
	$509,589	$470,557

Depreciation and amortization expense of property and equipment, excluding amortization of intangibles for 2017, 2016 and 2015, was $52,756, $39,023, and $28,166, respectively.

Accumulated amortization for capitalized software and hardware was $191,594 and $163,634 at December 31, 2017 and 2016, respectively. Amortization expense, included in depreciation and amortization above, for capitalized software and hardware for 2017, 2016 and 2015 was $41,342, $27,195, and $21,028, respectively.

At December 31, 2017 and 2016, the Company capitalized $60,944 and $37,045, respectively of internally developed software related to its core operating platform.

6. Medical and Other Benefits Payable

Activity in the medical and other benefits payable liability is summarized as follows:

	2017	2016	2015
Medical and other benefits payable at beginning of year	$708,225	$708,666	$726,684
Incurred related to:			
Current year…….	6,765,957	6,043,226	6,631,617
Prior years……...	(69,205)	(179,664)	(98,764)
Total incurred……..	6,696,752	5,863,562	6,532,853
Paid related to:			
Current year……...	6,033,030	5,288,143	5,873,703
Prior years…….	583,626	575,860	677,168
Total paid	6,616,656	5,864,003	6,550,871
Medical and other benefits payable at end of year…...	788,320	708,225	708,666
Liability for claims processing costs……	20,482	19,164	17,304
Total……..	$808,802	$727,389	$725,970

Amounts incurred related to prior years vary from previously estimated liabilities as the claims are ultimately settled. Liabilities at any year end are continually reviewed and re-estimated as information regarding actual claims payments becomes known. This information is compared to the originally established year end liability. The favorable development for the years ended December 31, 2017 and December 31, 2016 was the result of actual claim payment patterns and cost trends differing from those assumed at the time the liability was established. The claims payment patterns and cost trends were influenced by utilization levels, unit costs, mix of business, benefit

plan designs, provider reimbursement levels, core operating system conversions and changes, claim inventory levels, claim processing patterns, and claim submission patterns.

Incurred and paid development for years ended December 31, 2017 and 2016 is as follows:

Cumulative Incurred Claims

Claim Year	2017	2016 (unaudited)	2015 (unaudited)
2015 & Prior	$7,074,464	$7,079,873	$7,259,537
2016	5,979,430	6,043,226	-
2017	6,765,957	-	-
Total	$19,819,851	$13,123,099	$7,259,537

Cumulative Paid Claims

2016	5,949,932	5,288,143	-
2017	6,007,134	-	-
Total	$19,031,530	$12,414,874	$6,550,871

At December 31, 2017, the total of incurred but not reported liabilities plus expected development on reported claims was $788,320, $758,823 pertaining to 2017 services, $29,497 pertaining to 2016 and $0 pertaining to 2015 & prior services.

At December 31, 2017, 2016 and 2015, the cumulative number of reported claims for the claims years was 45.8 million, 43.8 million and 50.2 million, respectively.

The information about incurred and paid claims development for the years ended Decembers 31, 2017, 2016, and 2015, is presented as supplementary information.

The cumulative number of reported claims for each claim year have been developed using historical data captured by our claims payment system. The provided claim amounts are not a precise tool for understanding utilization of medical services. They could be impacted by a variety of factors including changes in provider billing practices, provider reimbursement arrangements, mix of services, benefit design or processing systems. The cumulative number of reported claims has been provided to comply with FASB accounting standards and is not used by management in its claims analysis. Our cumulative number of reported claims may not be comparable to similar measures reported by other health benefits companies.

The Shared Savings liability at December 31, 2017 and 2016, was $31,175 and $0, respectively.

7. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses consist of the following as of December 31:

Total	$771,617	$544,366

8. Lines of Credit and Long-Term Debt

BCBSNC has established three credit lines providing a total borrowing capacity of $350,000 to support its daily working capital requirements. The three credit lines include two revolving lines of credit and a secured line of credit with the Federal Home Loan Bank of Atlanta (FHLBA). The interest rate for borrowings on the revolving lines is LIBOR plus 65 basis points. The interest rate for borrowings on the secured line is based on rates published by the FHLB for the specific term requested for the borrowings.

In November 2013, BCBSNC entered into a revolving line of credit and amended and restated it in July 2015, to increase the borrowing capacity to $150,000, and extend the termination date until July 2017. In July 2016, BCBSNC extended the termination date an additional year to July 2018. In July 2017, BCBSNC extended the termination date an additional year to July 2019 and reduced the borrowing capacity to $100,000.

In September 2015, BCBSNC entered into a second $50,000 revolving line of credit terminating in September 2017. In December 2016, BCBSNC extended the termination date to September 2018.

In September 2016, BCBSNC entered into a credit agreement with the FHLBA providing secured borrowing capacity up to $200,000. The capacity is based on our internal limits and the collateral included cash and securities in our investment portfolio deemed eligible by the FHBLA. Collateral is only encumbered to the extent borrowings are outstanding.

Amounts drawn under these credit lines were $0 and $46,109 at December 31, 2017 and 2016, respectively.

In September 2014, Corium entered into a $165,000 thirty-year, fully amortizing, 4.09% mortgage due 2044 with an unaffiliated lender using eight office buildings as collateral. The mortgage is not callable and can be prepaid at any time subject to a make whole premium due to the lender. This note is classified as long term in the accompanying consolidated balance sheets

Long-term debt consists of the following at December 31:

	2017	2016
Long-term debt	$155,260	$158,396
Less current portion of long-term debt	3,267	3,136
Long-term debt, less current portion	$151,993	$155,260

BCBSNC must maintain certain covenants including limits on indebtedness to capital, indebtedness to EBITDA, risk based capital ratio, liens, and dispositions. As of December 31, 2017 and 2016, the Company was in compliance with the covenants and requirements outlined in these agreements.

Future maturities of debt are as follows: 2018, $3,267, 2019, $3,403, 2020, $3,544, 2021, $3,692, 2022, $3,846 and thereafter $141,354.

9. Fair Value Measurements

The carrying amounts reported in the Consolidated Balance Sheets for cash, cash equivalents, premiums and other receivables, Affordable Care Act receivables, income tax receivable, unearned premiums, medical and other benefits payable, accounts payable, other assets and accrued expenses, book overdrafts and payables for securities approximate fair value because of the short term nature of these items.

Certain assets and liabilities recorded at estimated fair value in the Consolidated Balance Sheets are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Level inputs are defined as follows:

Level Input:	Input Definition:
Level I	Inputs are unadjusted, quoted prices for identical assets or liabilities in active markets at the measurement date.
Level II	Inputs other than quoted prices included in Level I that are observable for the asset or liability through corroboration with market data at the measurement date.
Level III	Unobservable inputs that reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date.

Transfers between Levels, if any, are recorded as if they had occurred at the beginning of the reporting period during which the change in method for valuing the underlying assets occurred.

Fair values of fixed income and equity securities are based on quoted market prices, where available. Our service provider obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing. In addition, the pricing service uses model processes such as the Option Adjusted Spread model to assess interest rate impact and develop prepayment scenarios.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value.

Following is a description of the valuation methodologies used by the Company to value assets, including the pension and postretirement assets, measured at fair value:

Major Category	Valued at
Mutual funds	Closing price reported in the active market in which the individual security is traded.
State and/or U.S. government obligations and common and/or preferred stock	Closing price reported in the active market in which the individual security is traded. If in an inactive market, based on quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. Securities that trade infrequently and therefore have little or no price transparency are valued using the investment manager's best estimates.

Major Category	Valued at
Interest in collective trust funds	NAV of shares which are provided by the administrator of the fund.
Pooled separate accounts	Based on underlying value provided by the fund manager
Partnership and real estate funds	Based on net asset value provided by the fund manager
Private equity funds	Based on net asset value provided by the fund manager
Other investments	Dealer quotes, trade data, two-sided markets institutional bids, comparable trades and/or other news media
Privately held fixed income and equity securities, including venture capital investments	Reviewing the value ascribed to the most recent financing, comparing the security with securities of publicly traded companies in a similar line of business, and/or reviewing the underlying financial performance including estimating discounted cash flows
Fixed income securities including corporate, commercial and residential mortgage backed securities	Closing price reported in the active market in which the bond is traded or based on yields currently available on comparable securities of issuers with similar credit ratings or discounted cash flows approach that maximized observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks

The carrying value of corporate-owned life insurance policies is the cash surrender value as reported by the respective insurer.

The fair value of our long-term debt, included in liabilities on the Consolidated Balance Sheets, is based on current market observable rates estimated to be available to us for debt of similar terms and remaining maturities.

The following table summarizes fair value measurements by level at December 31 for assets measured at fair value on a recurring basis:

Private equity, venture capital and real estate trusts included in Level III are valued at net asset value as a practical expedient. For real estate investments, the Company estimates that net asset value is consistent with the liquidation value of these assets. There is a limited market for private equity and venture capital investments, and as a result, if the Company were required to sell these investments, the full fair value of these assets may not be realized. As of December 31, 2017, the Company has unfunded commitments of $99,530 for Private Equity Investments and $92,057 for venture capital investments.

Non-financial assets and liabilities including long-lived assets, goodwill, asset retirement obligations, and certain investments are recognized at fair value when they are considered to be other-than-temporarily impaired. There was no required fair value measurement for assets and liabilities measured at fair value on a non-recurring basis.

Non-financial instruments such as property and equipment, other current assets, deferred income taxes and certain financial instruments such as policy liabilities are excluded from the fair value disclosures. Therefore, the fair value amounts cannot be aggregated to determine our underlying economic value.

10. Employee Benefit Programs

The Company maintains a noncontributory, defined benefit pension plan. The Plan covers most employees hired before January 1, 2006. Benefits are determined according to the covered employee's years of credited service and final average compensation while an eligible participant. Effective December 31, 2013 the Plan was frozen and no longer recognizes service or compensation earned after this date for retirement benefit determination purposes. All Plan participants are fully vested. The Company also maintains three separate non-contributory, non-qualified defined benefit SERPs for certain executives. Two of the SERPs have benefits based on years of service, retirement age and certain final average pay calculations. Benefits are offset by benefits payable from other defined benefit retirement plans. An additional SERP has benefits based on years of service and individual agreements that generally require payment of a fixed monthly dollar amount for 15 years upon retirement.

The Company provides certain health care and life insurance benefits for retired employees. The Plan is a contributory health and welfare plan, which provides health benefits (medical, hospital, surgical, dental and drug) for eligible retirees. Retirees are eligible for coverage upon retirement at age 55 or later with five or more years of service. In addition, substantially all of those employees hired prior to January 1, 2006 and who reach retirement age with at least 15 years of service may become eligible for both Company subsidized health care insurance and a company-paid life insurance benefit. The Company funds retiree health care benefits by making contributions to the Voluntary Employees Beneficiary Association (VEBA) administered by the BCBSA. The Company did not make a contribution for the years 2017 or 2016 to fund the liability for eligible retired employees.

Effective January 1, 2017 retirees and dependents who were age 65 and older obtained coverage through a private health exchange, BCBS Marketplace. Eligible retirees and dependents who enrolled through the BCBS Marketplace received a sponsor subsidy in the form of a Health Reimbursement Account contribution. This modification did not intend or expect to materially impact the cost of the program.

In October 2017, the Company offered a second version of a Cash Out Window (COW) to terminated vested participants in the qualified defined benefit plan and, in certain limited situations, the SERP. The COW allowed the participants to elect an immediate lump sum distribution of their benefit in the plan(s). Lump sum payments of $29.1 million were paid from the qualified retirement plan in 2017, with $20.4 million of those lump sum payments attributable to the COW. Because the qualified plan payments exceeded the sum of estimated 2017 service and interest costs, settlement accounting was triggered. As a result, $3.5 million of unrecognized actuarial loss was relieved from AOCI and recognized in income.

During 2017, the Company made a change to the amortization method used to amortize gains/losses in the Qualified and two of the Non-Qualified retirement benefit plans. The change is that actuarial losses would be recognized in income over a 5-year period, and without regard to any excess threshold. Prior to this change, actuarial losses in excess of certain thresholds were amortized over the average life expectancy of the participants. The impact of the change was determined by going back to the 2010 fiscal year and re-calculating the amortization amount for each of the 2010-2017 fiscal years.

The components of the net periodic benefit cost are as follows for the year ended December 31:

	Retirement Benefits

In 2017, 2016 and 2015, the Company recognized the amortization of the cumulative net loss from past experience as measured by comparing the expected position of the plan at year-end (based on the beginning of the year actuarial assumptions and prior year census data) with the actual position of the plan at year-end (based on the end of year actuarial assumptions and current year census data) prior to recognizing any plan provision changes.

The estimated prior service credit and net actuarial loss that will be amortized from AOCI into net periodic benefit expense in 2018 are $381 and $13,611, respectively.

The accumulated benefit obligation was $521,005 and $513,170 at December 31, 2017 and 2016, for the qualified retirement plan and $63,168 and $58,353 for the non-qualified retirement plans, respectively.

Due to the freeze, there will not be a difference in the accumulated benefit obligation and the projected benefit obligation prospectively.

The following tables present assumptions used in determining the actuarial present value of the benefit obligation and the subsequent year's net periodic benefit cost for the qualified and non-qualified retirement plans as of a measurement date:

The Company uses the Mercer Yield Curve to select a discount rate and uses separate discount rates for the different benefit plans as well as no rounding of discount rates, for consistency with industry trends. The expected future cash flows underlying the benefit obligations are discounted by the rate on the yield curve corresponding to the cash flow duration. The single discount rate that would yield the same present value as the sum of the discounted cash flows is determined. As of December 31, 2017 and 2016, the combined duration of all plans was

14 years and 14 years, respectively. The nonqualified pension plans have shorter durations than the qualified pension plan and the other postretirement benefit plans.

On December 31, 2015 we changed the method we use to estimate the service and interest components of net periodic benefit cost for defined benefit pensions and other postretirement benefits. This new estimation approach discounts the individual expected cash flows underlying the service cost and interest cost using the applicable spot rates derived from the yield curve used to discount the cash flows used to measure the benefit obligation. Historically, we estimated these service and interest cost components utilizing a single weighted-average discount rate derived from the yield curve used to measure the benefit obligation at the beginning of the period.

We have made this change to provide a more precise measurement of service and interest costs by improving the correlation between projected benefit cash flows to the corresponding spot yield curve rates. We have accounted for this change as a change in accounting estimate that is inseparable from a change in accounting principle and accordingly have accounted for it prospectively. The benefit obligation measured under this approach was unchanged as of December 31, 2015. The new approach was used to measure the service and interest cost for the pension benefits, other postretirement benefits and other postemployment benefits in 2016. The service cost and interest cost for those plans was reduced by approximately $6.4 million in 2016 as a result of the change.

Starting with the 2016 net periodic benefit cost, the Company elected to use a spot discount rate approach to determine the interest cost component of expense and interest on the service cost component. Instead of using a single fixed discount rate, each year's cash flow is discounted at, and then credited with, interest based on the spot rate for that duration. The effective rate for interest on the benefit obligation is the single equivalent rate such that interest on the plan's PBO using the single rate equals the sum of the interest on each year's discounted cash flows determined using the corresponding spot rate along the Mercer Yield Curve. Interest on benefit obligations for purposes of determining the interest cost component of expense is calculated by applying interest to the present value of the payment expected at each payment date. For this purpose, interest is determined using the same spot rate used to determine the present value of the associated payment. In addition to the spot discount rate approach described above, the Company also elected to use split discount rates for the calculation of the PBO and service cost component of expense. The service cost calculation uses the same method as the calculation of the PBO, but is based on expected service cost cash flows only (e.g. expected retiree cash flows are not included).

In 2014, the Society of Actuaries completed a mortality study and issued a new base mortality table (RP-2014) and new mortality improvement scale (MP-2014). The Company moved to the Mercer modified MRP-2007 base mortality table and the Mercer modified MMP-2016 generational projection scale on December 31, 2017. In previous years, the Company used the same MRP-2007 base mortality table and the MMP-2007 generational projection scale. This change resulted in a decrease of this benefit obligation in 2017.

To set the expected return on plan assets for the qualified pension plan, the Company projects returns on each asset class using historical return relationships and making adjustments as necessary, given current market and economic conditions. The projected returns are then applied to the portfolio target asset allocation weightings and result in a projected long-term portfolio rate of return.

The following table presents assumptions used in determining the accumulated postretirement benefit obligation and the subsequent year's net periodic benefit cost for the other postretirement benefit plans:

To set the expected return on plan assets for the other postretirement benefit plans, historical markets are studied and long-term relationships between equities and fixed income securities indicate that assets with higher volatility generate a greater return over the long run. Current market factors such as inflation and interest rates are evaluated before long-term capital market assumptions are determined. The long-term portfolio return is established with proper consideration of diversification and rebalancing. Peer data and historical returns are reviewed to check for reasonability and appropriateness.

The following table presents the medical trend rate used in determining the accumulated postretirement benefit obligation at December 31 for the other postretirement benefit plans:

	2017	**2016**
Health care cost trend rate assumed for next year:		
Under age 65	6.40%	6.70%
Age 65 and older	6.40%	6.70%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	4.50%	4.50%
Year that the rate reaches the ultimate trend rate:		
Under age 65	2037	2037
Age 65 and older	2037	2037

The above trend rates were used for the PPO plan options. Different rates were used for some post-65 plan options to better model gross costs and expected government subsidies. The health care cost trend rate assumption can have a significant effect on the amounts reported. A one-percentage point change in assumed health care cost trend rates would have the following effects:

	1-Percentage Point Increase	1-Percentage Point Decrease
Effect on total of fiscal 2017 service and interest cost components....	$329	$(257)
Effect on the December 31, 2017 postretirement benefit obligation...	$4,485	$(3,628)

The Company utilizes a partial liability matching investment strategy. The Plan's funding ratio exceeded 100% at year end and approximately 90% of the portfolio is invested in a liability driven investment strategy.

The Plan's investments remain diversified and of high quality. At year end the Plan had investments in funds invested in fixed income, domestic & international equities, real estate and timber.

The investment fiduciary for the VEBA employs a total return investment approach whereby a mix of equities, fixed income and other investments is used to maximize the long-term return of plan assets for a prudent level of risk. The investment portfolio contains a diversified blend of equity, fixed income and other investments. Investment risk is measured and monitored on an ongoing basis through investment portfolio reviews, annual liability measurements, and periodic asset/liability studies.

The mutual fund investment strategy for the VEBA is market sensitive while remaining consistent with the risk tolerance, tax status, and cash flow requirements. Fund strategies include pursuing and capitalizing on market inefficiencies using duration, yield curve, security selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks and supply and demand.

Other Employee Benefits

BCBSNC sponsors a defined contribution retirement plan qualified under Section 401(a) of the Internal Revenue Code, the BCBSNC 401(k) Plan (401(k) Plan). Eligible employees may contribute pretax and Roth contributions that are matched at the rate of 100% of the first 4% and 50% of the next 2% of compensation contributed. Additional Company contributions include profit sharing contributions that range from 2% to 5% of eligible compensation, based on the employee's years of service with the Company, and Transition Contributions that range from 1% to 8% of eligible compensation for eligible employees who were participants in the defined benefit pension plan on December 31, 2013. Transition Contributions will cease after December 31, 2023. Employee and Company contributions are subject to certain regulatory limits and service conditions.

The Company's contributions to the plans totaled $31,678, $32,856 and $31,021 for the years ended December 31, 2017, 2016, and 2015, respectively.

The Company also maintains the Restoration Plan, a non-qualified defined contribution plan, to ensure that designated participants receive the full amount of benefits to which they would have been entitled under the BCBSNC 401(k) Plan except for limits on compensation imposed by the Internal Revenue Service. The Company's contributions to the plan totaled $3,890, $1,958 and $1,975, for the years ended December 31, 2017, 2016, and 2015, respectively.

11. Income Taxes

BCBSNC files a consolidated federal income tax return with its subsidiaries. Current taxes are allocated among all affiliated companies based on a written tax sharing agreement, primarily on a separate company return basis using a wait-and-see method. These agreements have the effect of crediting each separate company within the consolidated group for the use of its net operating or other losses in the year in which the separate company could utilize the losses on a separate company return basis while charging those companies that previously benefited from use of the losses.

The significant components of income tax expense (benefit) in the Consolidated Statements of Comprehensive Income for the years ended December 31 are as follows:

A valuation allowance is required against deferred tax assets if, based on the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Based upon all the available evidence, management recorded a valuation allowance of $1,074 and $1,790 as of December 31, 2017 and 2016, respectively. The change during the year in the total valuation allowance was a decrease of $716. Management believes it is more likely than not that the Company will realize its remaining net deferred tax assets as of the respective balance sheet dates.

As of December 31, 2017, we have no remaining federal income tax net operating loss (NOL) carryforward, no remaining federal credit carryforwards, and no remaining AMT credit carryforward. We have $139,337 in state net operating loss carryforwards, which will begin to expire in 2018.

As of December 31, 2017, as further described below, certain tax years remain open to examination by the IRS and various state authorities. As of December 31, 2017, we have recorded $157 in interest and penalties related to uncertain tax positions in the statement of operations and statement of financial position. We do not anticipate the amount of unrecognized tax benefits related to the open tax years will change in the next twelve months. The ultimate resolution of such items is dependent on a number of factors.

The Company's tax years 2014 through 2017 remain open to examination by the IRS. ACS and NobleHealth tax years 2014 to 2017 remain open to examination by various state Departments of Revenue.

12. Related Party Transactions

In November 2000, BCBSNC established the Blue Cross Blue Shield of North Carolina Foundation, formerly The North Carolina Health Foundation, (Foundation), a separate, independent, private, non-consolidated not-for-profit organization in North Carolina. The purpose of the Foundation is to provide financial support to improve the health and well-being of North Carolinians. BCBSNC committed $20,000, $5,000, and $0 in the years ended December 31, 2017, 2016 and 2015, respectively. The Foundation is not a subsidiary of BCBSNC and the financial results of the Foundation are not consolidated with the Company's financial statements. We have no legal obligations for further commitments to the Foundation, nor are we responsible for losses or obligations that may emerge in the Foundation.

13. Commitments and Contingencies

Leases

The Company leases office space and certain computer equipment under non-cancelable operating leases. Related lease expense for 2017, 2016 and 2015 was $6,190, $5,712 and $4,161, respectively.

At December 31, 2017, future lease payments for operating leases with initial or remaining non-cancelable terms of one year or more are $0 and consist of the following: 2018, $4,723; 2019, $2,457; 2020, $1,864; 2021, $317; and 2022, $0.

Commitments

The Company has a long-term debt obligation due September 2044, future interest payments on this debt obligation are as follows: 2018, $6,289; 2019, $6,153; 2020, $6,011; 2021, $5,864; 2022, $5,710 and thereafter $70,332.

The Company has a commitment to Topaz to develop a claims processing system. Related funding for 2017, 2016 and 2015 were $48,518, $46,772, and $32,578 respectively. Future expected costs for this system are as follows: 2018, $6,872; 2019, $6,872; 2020, $6,872; 2021, $0; and 2022, $0.

At December 31, 2017, expected future costs to BCBSNC related to a purchase obligation for stated service fees with non-cancelable terms with Fujitsu and HCL for outsourced IT infrastructure are estimated as follows: 2018, $158,698; 2019, $16,252; 2020,$15,980; 2021, $1,330 and $0 thereafter.

At December 31, 2017, we have various other non-cancelable arrangements with our vendors for outsourced claims processing, healthcare programs, and IT support with future costs estimated as follows: 2018, $167,768; 2019, $45,189; 2020, $4,079; 2021, $826; and 2022, $826.

Litigation Against the Company

We are regularly involved in litigation, both as a defendant and as a plaintiff, but primarily as a defendant. Litigation naming us as a defendant ordinarily arises out of our business operations as a health services organization and our investment activities. Some of the lawsuits may be class actions, or purport to be, and some may include claims for unspecified or substantial punitive and treble damages.

We may discuss such litigation in one of three ways. We accrue a charge to income and disclose legal matters for which the chance of loss is probable and for which the amount of loss can be reasonably estimated. We may disclose contingencies for which the chance of loss is reasonably possible and provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. Finally, we may voluntarily disclose loss contingencies for which the chance of loss is remote in order to provide information concerning matters that potentially expose us to possible losses.

The Company is involved in litigation *(In Re: Blue Cross Blue Shield Antitrust Litigation (United States District Court, Northern District of Alabama))* which is a multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans. The Company is a named defendant in forty-three of the consolidated cases (twenty-nine provider cases and fourteen subscriber cases). The cases all allege an ongoing conspiracy in violation of the Sherman Antitrust Act among the Blues and the BCBSA and seek (1) a permanent injunction prohibiting enforcement of any agreements which restrict the BCBSA member operating territories; (2) treble damages for (a) alleged artificially inflated premiums in the case of subscribers and (b) alleged suppressed provider compensation in the case of providers and (3) attorneys' fees and costs. Additionally, one of the consolidated cases against the Company makes antitrust allegations based on most favored nations ("MFN") clauses in the Company's provider contracts and seeks reformation of the Company's provider contracts to strike MFN clauses and monetary damages. The case is now in the discovery stage. The Company intends to vigorously defend this litigation.

The Company is also involved in litigation *(In Re: Anthem Data Breach Litigation(United States District Court, Northern District of California))*. The case is a Federal, multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans, arising out of a cyber-attack perpetrated against Anthem, Inc. in December, 2014 and January, 2015. The case seeks certification of a class of all Blue plan insured members and alleges various negligence and breach of contract claims and violations of consumer protection laws and seeks injunctive relief and compensatory and punitive damages. This case has been settled, with no liability to the Company. The class settlement by Anthem has been preliminarily approved by the Court. The final approval hearing is scheduled for April 9, 2018.

The Company is also a defendant in litigation *(Susan Sykes d/b/a Advanced Chiropractic, et al. v. BCBSNC, et al)*. This class action was filed May 22, 2015 against BCBSNC and other carriers, CIGNA, Medcost and Healthgram who use Health Network Solutions, Inc. ("HNS") to provide their chiropractic network. The complaint alleges a purported plaintiff class of all chiropractors who practiced in North Carolina from 2005 to the

present and asserts claims for (1) declaratory judgment invalidating the agreements between HNS and the individual carriers; (2) price fixing, monopsony and monopoly; (3) unfair and deceptive trade practices; (4) illegal conspiracy in restraint of trade; (5) breach of fiduciary duty; and (6) punitive damages. Generally, the plaintiffs contend that the carriers' agreements with HNS result in underpayment to chiropractors and/or illegal exclusion of chiropractors from the carriers' provider networks. The case was originally filed in North Carolina state court, but has been transferred to the North Carolina Business Court to be consolidated with a prior pending action by the same plaintiffs against HNS. All defendants filed Motions to Dismiss on September 25, 2015 which are currently pending. The Company is vigorously defending the case.

The Company is also a defendant in *United States of America, Ex Rel Dr. Susan Nedza v. American Imaging Management, Inc. et. al.*, pending in the United States District Court for the Northern District of Illinois. On December 21, 2017, Dr. Susan Nedza, a former employee of American Imaging Management, Inc. ("AIM") filed a *qui tam* action against AIM and several Blue Cross and Blue Shield plans, including Blue Cross NC, alleging on behalf of the United States that the Defendants have caused false and fraudulent health care claims to be made under Medicare Advantage plans offered by the Defendant Blue plans for which AIM provided utilization management services and have defrauded the federal government in violation of the federal False Claims Act. Blue Cross NC was served with this complaint on January 3, 2018 and has not yet retained defense counsel. The Company will vigorously defend this matter.

Additionally, BCBSNC is also involved in various claims and legal actions arising in the ordinary course of business. However, management believes that proceedings arising in the ordinary course of business and those referenced above will not have a material adverse impact on the financial position of the Company.

Other Contingencies

The National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) is a voluntary organization consisting of the state life and health insurance guaranty associations located throughout the U.S. State life and health insurance guaranty associations, working together with NOLHGA, provide a safety net for their state's policyholders, ensuring that they continue to receive coverage even if their insurer is declared insolvent. The Company is aware that the Pennsylvania Insurance Commissioner (Insurance Commissioner) has placed Penn Treaty Network America Insurance Company and its subsidiary American Network Insurance Company, or collectively Penn Treaty, in rehabilitation, an intermediate action before insolvency. On July 27, 2016, the Pennsylvania Insurance Commissioner filed a petition to move Penn Treaty from rehabilitation to liquidation. On March 1, 2017, Pennsylvania courts released an Order of Liquidation for Penn Treaty & American Network Insurance Company. This liquidation triggered state guaranty fund actions and GAAP accounting actions by insurers in 2017, resulting in a payment by BCBSNC in the amount of $49,500. Payment of the assessment is expected to be recovered over future years through premium tax credits allowable by the State of North Carolina. BCBSNC recorded an asset for the premium tax offset. The amount accrued, $11,100, equals the amount that will be recovered in the first year after the assessment or 20% of the liability, consistent with the short term nature of our insurance policies.

14. Administrative Services

Claims processed for others under contract, which have been excluded from the financial statements, are summarized for the years ended December 31 as follows:

	2017	2016	2015
Claims processed for:			
State of North Carolina	$2,439,131	$2,167,470	$2,068,634

	$10,184,722	$9,878,979	$9,408,872

Administrative fees received for processing these claims totaled $471,340, $479,168 and $443,919 in 2017, 2016 and 2015, respectively. All claims payments are subject to audit by the program administrators. If the

program administrators determine that the claims or expenses have not been paid in accordance with the contract, the Company may be required to reimburse the program administrators.

15. Comprehensive Income (Loss)

The accumulated other comprehensive income (loss) in the Consolidated Balance Sheets consists of the following:

	Unrealized Gains on Securities	Non-credit Component of Other-Than-Temporary Impairment	Qualified Retirement Plans	Post Retirement and Other Benefit Plans	Accumulated Other Comprehensive (Loss) Income
Balance, December 31, 2014.....	$343,964	$0	$(72,807)	$22,044	$293,201

Balance, December 31, 2017.....	$310,537	$2,198	$(73,419)	$24,436	$263,752

16. Subsequent Events

The Company has evaluated subsequent events through February 22, 2018, which is the date that the financial statements were available to be issued, for recognition or disclosure in our consolidated financial statements. All of the effects of subsequent events that provide additional evidence about conditions that existed at the consolidated balance sheet date, including the estimates inherent in the process of preparing the consolidated financial statements, are recognized in the consolidated financial statements. The Company does not recognize subsequent events that provide evidence about conditions that did not exist at the balance sheet date but arose after, but before the financial statements are available to be issued. In some cases, non-recognized subsequent events are disclosed to keep the financial statements from being misleading.

17. Supplemental Statutory Financial Information

The Company is required to file unconsolidated financial statements with, and is subject to exam by, the NCDOI. These financial statements are presented on the basis of accounting practices prescribed or permitted by the NCDOI.

The NCDOI recognizes only Statutory Accounting Practices prescribed or permitted by the state of North Carolina for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the North Carolina Insurance Law. The NAIC's Accounting Practices and Procedures manual has been adopted as a component of prescribed or permitted practices by the state of North Carolina.

The NAIC adopted the RBC for Health Organizations Model Act in 1998. The NCDOI subsequently adopted this act in 2001. Under this act, a company's risk-based capital (RBC) is calculated by applying certain factors to various asset, premium and reserve items. If a company's calculated RBC falls below certain thresholds, regulatory intervention or oversight is required. BCBSNC's RBC level, calculated in accordance with the NAIC's RBC instructions, exceeded all RBC thresholds as of December 31, 2017 and 2016. The Company is also subject to insurance laws and regulations of the State of North Carolina that include but are not limited to restrictions on dividends, types of investments that insurers are allowed to invest in, and the amount of capital and surplus.

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Blue Cross and Blue Shield of North Carolina (BCBSNC or the Company) have been prepared in conformity with accounting practices and procedures prescribed by the North Carolina Department of Insurance (NCDOI).

The NCDOI recognizes only Statutory Accounting Practices (SAP) prescribed or permitted by the State of North Carolina for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the North Carolina Insurance laws, regulations and general administrative rules. The NCDOI has adopted the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) as a component of prescribed or permitted practices by the State of North Carolina (NC SAP). There is no deviation from the NAIC SAP. There were no differences between the statutory practices prescribed or permitted by the State of North Carolina and those prescribed or permitted by NAIC SAP which would materially affect the statutory basis net income or surplus.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of North Carolina is show below:

		State of Domicile	2017	2016

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the amounts of revenue and expenses during the reporting period. The Company uses estimates and assumptions based on analytical and/or actuarially accepted quantitative methods in determining contract reserves and claims incurred but not yet reported, valuation of pension and other benefit plans, deferred income taxes, fair value of investments, other-than-temporary investments, and other valuation accruals. Actual results could differ materially from those estimates.

On December 22, 2017, the United States government enacted significant changes to the US tax law with the passage of H.R.1, "An Act to Provide for Reconciliation Pursuant to Titles II and V of the Concurrent Resolution on the Budget for Fiscal Year 2018" (the "Tax Act"). The Tax Act included significant changes to existing tax law, including a permanent reduction to the US federal corporate income tax rate from 35% to 21%, along with changes to deductions, credits, and business-related exclusions.

Under SSAP No. 101, the effects of changes in tax rates and laws on deferred tax balances are recognized in the period in which the new legislation is enacted. The Company has not completed its accounting for the tax effects of enactment of the Act as it is still analyzing certain aspects of the Act, and any future guidance from the Treasury, Internal Revenue Service, or the Company's regulator could potentially affect the measurement of those balances or give rise to new deferred tax amounts. However, it has made a reasonable estimate of the effects on its existing deferred tax balances as provided in Footnote 9, Income Taxes.

C. Accounting Policies

Premiums written are earned over the period of coverage on a pro rata basis. Premiums billed to policyholders are recorded as uncollected premiums when the coverage period begins. Payments received in advance of coverage are recorded as premiums received in advance until earned. Delinquent uncollected premiums are charged directly to reserves and unassigned funds once delinquent for 30 days and 90 days for non-group and group subscribers, respectively.

In addition, the Company uses the following accounting policies:

1. Short-term investments consist of readily marketable securities with maturities greater than three months but less than one year at the time of purchase. These investments are recorded at amortized cost.

2. Bonds rated 1 and 2 by the NAIC are stated at cost adjusted for amortization of premiums and accretion of discounts using the scientific amortization method. Bonds rated 3 through 6 are carried at the lower of amortized cost or fair

value with the change recorded in capital and surplus, net of applicable taxes. Prepayment assumptions are determined by using broker data.

The Company holds one SVO-Identified bond ETF reported on Schedule D-1. The ETF is reported at fair value.

Declines in the fair value of invested assets below cost are compiled on a monthly basis and reviewed quarterly to assess whether any other-than-temporary impairment loss should be recorded. Various thresholds are used to identify those securities which are at the greatest risk of an other than temporary impairment

3. Common stocks of subsidiaries are stated in accordance with SSAP 97. Common stocks, excluding common stock of subsidiaries, are stated at the estimated market value provided by the Securities Valuation Office (SVO) of the NAIC or are based on quoted market prices. Estimated SVO market values are based on published quotations of the SVO. However, for certain investments for which the SVO does not provide a value, BCBSNC uses the amortized cost amount as its estimate of market value in accordance with prescribed guidance.

4. Preferred stocks are stated at the estimated market value provided by the Securities Valuation Office (SVO) of the NAIC or are based on quoted market prices. Estimated SVO market values are based on published quotations of the SVO. However, for certain investments for which the SVO does not provide a value, BCBSNC uses the amortized cost amount as its estimate of market value in accordance with prescribed guidance.

5. The Company does not have any mortgage loans.

6. Mortgage-backed and other asset-backed securities rated 1 and 2 by the NAIC are adjusted for unamortized premiums and discounts, which are amortized using the scientific method over the estimated remaining term of the securities, adjusted retrospectively for changes in anticipated prepayments.

For loan-backed or structured securities, factors considered by management in determining whether an other-than-temporary impairment exists include the Company's stated intent to not sell, the Company's ability to hold such investments until the fair value recovers, and the discounted cash flows of the security based on the yield at the date of acquisition. If the Company intends to sell or if the Company does not have the ability and intent to hold the security for a period of time sufficient to recover its amortized cost basis, an other-than-temporary impairment exists, and the security is written down to fair value with the amount of the write-down recorded as a realized loss. If the Company does not intend to sell the security and has the ability and intent to hold the security for a period of time sufficient to recover the amortized cost basis, the Company calculates the cash flows expected to be collected. In this calculation, the Company compares the present value of cash flows expected to be collected, discounted at the security's effective interest rate at date of purchase, to the amortized cost basis. If the present value of cash flows is less than the amortized cost basis, a realized loss is recorded for the difference. The present value of cash flows then becomes the new cost basis.

7. As of December 31, 2017, BCBSNC had five wholly-owned subsidiaries: Beacon Health Holdings ("Beacon"); Corium, LLC ("Corium"); Corium II, LLC ("Corium II"); Blue Cross and Blue Shield of North Carolina Senior Health ("Senior Health"); and NobleHealth, Inc. ("NobleHealth"). Beacon is a holding company for not-for-profit subsidiaries and affiliates. Corium owns, operates, and manages financed office buildings of the Company. Corium II owns, operates, and manages unencumbered office buildings of the Company. Senior Health will provide Medicare plans in the future. NobleHealth holds non-controlling strategic investments in certain health services companies and has six wholly-owned subsidiaries: Mosaic Group Services, LLC ("Mosaic Group"); Mosaic Health Solutions, LLC ("Mosaic Health Solutions"); Noble Benefit Services, LLC ("NBS"); Topaz Shared Services, LLC ("Topaz"); ACS Benefit Services, LLC ("ACS"); and NC Health Affiliates, LLC ("NCHA"). Mosaic Group functions as an insurance agency selling third-party life and disability and death and dismemberment products and is licensed as a third-party administrator. Mosaic Health Solutions holds non-controlling strategic investments in certain health services companies. NBS will function as a third-party administrator for self-insured employer groups. Topaz provides a healthcare payer operating system. ACS provides self-funded plans with complete third-party administration services for group medical, dental and disability benefits. NCHA operates as a staff augmentation service.

Noble investment meets the definition of presumption of control as defined in accounting guidance provided in SSAP 97 (Investments in Subsidiary, Controlled, and Affiliated Entities-A Replace of SSAP No. 88), Paragraph 6.b. Accordingly, adjustment has been made to report this investment on an equity method basis as defined in SSAP No. 48 – Joint Ventures, Partnerships and Limited Liability Companies. The investment which is Common Stock is carried at cost.

8. As of December 31, 2017, the Company holds ownership interest in 36 limited partnerships. The company carries these interests based on the underlying audited GAAP equity of the investee, adjusted for certain provisions as described by SSAP 48, Joint Ventures, Partnerships and Limited Liability Companies.

9. There have been no significant changes to the accounting policy related to derivative instruments since the fiscal year 2017 filing.

10. There have been no significant changes related to the methodology used in the premium deficiency calculation.

11. Claims and claims adjustment expenses are expensed as incurred. The claims unpaid liability includes management's estimate of the ultimate cost of the claims in process of settlement and claims incurred but not yet reported.

The process of estimating reserves requires a high degree of judgment and a number of factors are taken into consideration. The Company actuarially estimates the liability for claims in process of settlement and claims incurred but not reported based on the most current historical claims payment patterns, changes in number of members, changes in products and benefits, and estimates of health care trend changes (cost, utilization, and intensity of services). Management also estimates the amount of claims adjustment expense needed to settle claims by determining the total administrative cost incurred to process claims as a percentage of total insured claims expense and applying that percentage to total claims in process of settlement and claims incurred but not yet reported.

Federal and state regulatory changes in December 2013 allowed certain individuals to maintain their pre-ACA plans that are not compliant with health care reform, which led to higher than previously expected retention of existing underwritten health plans. As this was the case with many issuers across many states, this resulted in many consumers who would have bought ACA compliant plans, staying in either grandfathered or transitional (grandmothered) plans. But over the past seven years, many customers have given up their grandfathered plans – and many insurers have stopped offering them. Because no new customers have joined this pool in seven years, the group as a whole has gotten older and sicker. Without new, healthier members to balance these high cost members, grandfathered plans have become too expensive to continue offering and we terminated Individual grandfathered plans effective December 31, 2017.

Estimates for contract reserves are continually reviewed and revised as changes in experience and other factors occur. Changes to the valuation basis are reflected in capital and surplus in the period in which the change in estimate is identified. Changes in the medical cost trend or in claims payment patterns used in estimating reserves would impact the balance of contract reserves and would be recognized in the Statement of Revenue and Expenses. At year-end 2017 and 2016, the Company adjusted contract reserves through capital and surplus by $17,530,059 and $28,414,555 in accordance with the statutory accounting guidance defined in SSAP 54, paragraph 21, as a result of updated experience and refinement of assumptions.

Estimates for the claims unpaid liability are continually reviewed and revised as changes in experience and other factors occur, and revisions are accordingly reflected in the hospital and medical expense line of the Statement of Revenue and Expenses in the period in which the change in estimate is identified. Changes in the medical cost trend and claims payment patterns used in estimating reserves would impact the balance of claims unpaid and unpaid claims adjustment expense. These estimates may change as actuarial methods change or as underlying facts upon which these estimates are based change. There have been no significant changes to our actuarial methods in the last two fiscal years.

12. The Company has not modified its capitalization policy from the prior period.

13. The Company's pharmacy benefit manager (PBM) contracts with pharmaceutical manufacturers, some of whom provide rebates based on the use of the manufacturers products by the PBM for the Company's insured and self-funded customers. The Company accrues the rebates receivable monthly based on the terms of the applicable contracts. The PBM bills these rebates to the manufacturers on a quarterly basis. The Company is reimbursed primarily quarterly. The Company records the rebates attributable to insured customers as a reduction to claims and medical expense. The rebates attributable to self-funded customers are accrued as rebates receivable as well as a corresponding payable to self-funded customers in accordance with their contracts. Of these receivables, $76,453,680 and $60,790,203 at December 31, 2017 and 2016, respectively, were nonadmitted because they were outstanding in excess of 90 days.

D. Going Concern

At December 31, 2017, as required by SSAP No, 1, *Accounting Policies, Risk and Uncertainties, and other Disclosures*, the Company has assessed its ability to continue as a going concern and is unaware of any conditions or events that create substantial doubt regarding its ability to do so.

2. Accounting Changes and Corrections of Errors

A. Material changes in accounting principles and/or corrections of errors:

During 2017, we voluntarily changed our method of amortizing actuarial gains and losses in our defined benefit pension plans which are recognized in equity to a straight-line method over a 5 year period without the use of a corridor. Previously, we amortized unrecognized gains and losses in excess of a 10% corridor over the estimated life (approximately 32 years) of plan participants. We adopted this new amortization method because it results in faster amortization and is more consistent with how the related pension balances are recognized on the balance sheet.

The North Carolina Department of Insurance (NCDOI) concluded that this change for statutory purposes is to be treated as a change in accounting estimate per guidance in SSAP No. 3, paragraphs 6, 7 and 8. The result is a pre-tax impact of $95,399,296.

3. Business Combinations and Goodwill

A. Statutory Purchase Method

There have been no significant changes since the fiscal year 2016 filing.

B. Statutory Mergers

There have been no significant changes since the fiscal year 2016 filing.

C. Assumption Reinsurance

The Company has not assumed any reinsurance related to statutory purchase or mergers since the fiscal year 2016 filing.

D. Impairment Loss

There have been no significant changes since the fiscal year 2016 filing. The Company did not recognize any impairment losses.

(4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earning as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

B. The aggregate amount of unrealized losses:

1. Less than 12 Months $2,596,193
2. 12 Months or Longer $1,623,758

C. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months $306,293,230
2. 12 Months or Longer $66,518,991

(5) For loan-backed or structured securities, factors considered by management in determining whether an other-than-temporary impairment exists include the Company's stated intent to not sell, the Company's ability to hold such investments until the fair value recovers, and the discounted cash flows of the security based on the yield at the date of acquisition. If the Company intends to sell or if the Company does not have the ability and intent to hold the security for a period of time sufficient to recover its amortized cost basis, an other-than-temporary impairment exists, and the security is written down to fair value with the amount of the write-down recorded as a realized loss. If the Company does not intend to sell the security and has the ability and intent to hold the security for a period of time sufficient to recover the amortized cost basis, the Company calculates the cash flows expected to be collected. In this calculation, the Company compares the present value of cash flows expected to be collected, discounted at the security's effective interest rate at date of purchase, to the amortized cost basis. If the present value of cash flows is less than the amortized cost basis, a realized loss is recorded for the difference. The present value of cash flows then becomes the new cost basis.

E. The Company had no net capital loss carryforwards and no federal income tax net operating loss (NOL) carryforwards.

The following are income taxes incurred in the current and prior years that will be available for recoupment in the event of future net losses:

	Ordinary	Capital	Total
Year ended 2017	$148,054,102	$2,083,380	$150,137,486
Year ended 2016	$-	$-	$-

As discussed in Footnote 1B, Accounting Estimates, the Company has made a reasonable estimate of the effects of the Tax Act on its existing deferred balances. The Company recognized a total provisional tax benefit of $1,093,338 in 2017 due to the application of the newly enacted rates to existing deferred balances. In accordance with SSAP No. 101, tax effects were re-measured and reported on the same reporting lines where previously reflected: benefit of $51,972,325 reflected in the change in net unrealized capital gains and losses, expense of $41,102,382 reflected in the change in net deferred income taxes, and expense of $9,776,605 reflected in the change in additional liability for pension benefits.

F. The Company's federal income tax return is consolidated with the following entities:

Corium, LLC (Corium)
Corium II, LLC (Corium II)
NobleHealth, Inc.
Noble Benefit Services, LLC
Mosaic Group Services, LLC
ACS Benefit Services, LLC
Mosaic Health Solutions, LLC
Topaz Shared Services, LLC
Blue Cross and Blue Shield of North Carolina Senior Health

NC Health Affiliates, LLC
Beacon Health Holdings, Inc.

Current taxes are allocated among all affiliated companies based on a written tax sharing agreement. Allocation of taxes is made primarily on a separate return basis. Payment for losses and other tax items occurs once a company could have utilized the items in a separate return and the group has utilized the items in the consolidated return. This is referred to as the wait-and-see method. Inter-company balances are settled annually within two months of filing the consolidated return.

3. Senior Health is not required to file an HRBC at this time.

11. Debt

A. BCBSNC has established three credit lines providing a total borrowing capacity of $350,000,000 to support its daily working capital requirements. The three credit lines include two revolving lines of credit and a secured line of credit with the Federal Home Loan Bank of Atlanta (FHLBA). The interest rate for borrowings on the revolving lines is LIBOR plus 65 basis points. The interest rate for borrowings on the secured line is based on rates published by the FHLB for the specific term requested for the borrowings.

In November 2013, BCBSNC entered into a revolving line of credit and amended and restated it in July 2015, to increase the borrowing capacity to $150,000,000 and extend the termination date until July 2017. In July 2016, BCBSNC extended the termination date an additional year to July 2018. In July 2017, BCBSNC extended the termination date an additional year to July 2019 and reduced the borrowing capacity to $100,000,000.

In September 2015, BCBSNC entered into a second $50,000,000 revolving line of credit terminating in September 2017. In December 2016, BCBSNC extended the termination date to September 2018.

In September 2016, BCBSNC entered into a credit agreement with the FHLBA providing secured borrowing capacity up to $200,000,000. The capacity is based on our internal limits and the collateral will included cash and securities in our investment portfolio deemed eligible by the FHBLA. Collateral is only encumbered to the extent borrowings are outstanding.

Amounts drawn under these revolving lines of credit were $0 and $46,109,000 at December 31, 2017 and 2016, respectively.

In September 2014, the Company entered into a $165,000,000 thirty-year, fully amortizing, 4.09% mortgage due 2044 with an unaffiliated lender using eight office buildings as collateral. The mortgage is not callable and can be prepaid at any time subject to a make whole premium due to the lender.

BCBSNC must maintain certain covenants including limits on indebtedness to capital, indebtedness to EBITDA, risk based capital ratio, liens, and dispositions. As of December 31, 2017 and December 31, 2016, the Company was in compliance with the covenants and requirements outlined in these agreements.

B. FHLB (Federal Home Loan Bank) Agreements

1. In 2016, the Company became a member of the Federal Home Loan Bank (FHLB) of Atlanta. Through its membership, the Company has conducted business activity (borrowings) with the FHLB. It is part of the Company's strategy to utilize these funds as a component of its working capital financing structure. The Company has determined the actual/estimated maximum borrowing capacity as $200,000,000. The Company calculated this amount in accordance with current debt policy.

12. Retirement Plans, Deferred Compensation, Post-Employment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. Defined Benefit Plan

The Company maintains a noncontributory, defined benefit pension plan. The Plan covers most employees hired before January 1, 2006. Benefits are determined according to the covered employee's years of credited service and final average compensation while an eligible participant. Effective December 31, 2013 the Plan was frozen and no longer recognizes service or compensation earned after this date for retirement benefit determination purposes. All Plan participants are fully vested. The Company also maintains three separate non-contributory, non-qualified defined benefit SERPs for certain executives. Two of the SERPs have benefits based on years of service, retirement age and certain final average pay calculations. Benefits are offset by benefits payable from other defined benefit retirement plans. An additional SERP has benefits based on years of service and individual agreements that generally require payment of a fixed monthly dollar amount for 15 years upon retirement.

Effective January 1, 2017 retirees and dependents who were age 65 and older obtained coverage through a private health exchange, BCBS Marketplace. Eligible retirees and dependents who enrolled through the BCBS Marketplace received a sponsor subsidy in the form of a Health Reimbursement Account contribution. This modification did not intend or expect to materially impact the cost of the program.

In October 2017, the Company offered a second version of a Cash Out Window (COW) to terminated vested participants in the qualified defined benefit plan and, in certain limited situations, the SERP. The COW allowed the participants to elect an immediate lump sum distribution of their benefit in the plan(s). Lump sum payments of $29,124,131 were paid from the qualified retirement plan in 2017, with $20,460,662 of those lump sum payments attributable to the COW. Because the qualified plan payments exceeded the sum of estimated 2017 service and interest costs, settlement accounting was triggered. As a result, $3,506,381 of unrecognized actuarial loss was relieved from equity and recognized in income.

A summary of assets, obligations and assumptions of the Retirement and Other Postretirement Plans, are as follows at December 31, 2017 and 2016:

Retiree Life Insurance	3.52%	4.00%

A measurement date of December 31, 2017 and 2016, respectively, was used for the benefit plans.

The medical trend rate used in determining the accumulated postretirement benefit obligation at December 31:

	2017	**2016**
Health care cost trend rate assumed for next year:		
Under age 65	6.40%	6.70%
Age 65 and older	6.40%	6.70%

Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	4.50%	4.50%
Year that the rate reaches the ultimate trend rate:		
Under age 65	2037	2037
Age 65 and older	2037	2037

The above trend rates were used for the PPO plan options. Different rates were used for some post-65 plan options to better model gross costs and expected government subsidies.

(9) The amount of the accumulated benefit obligation for defined benefit pension plans was $521,004,708 for the current year and $513,169,730 for the prior year.

(10) The Company provides certain health care and life insurance benefits for retired employees. The Plan is a contributory health and welfare plan, which provides health benefits (medical, hospital, surgical, dental and drug) for eligible retirees. Retirees are eligible for coverage upon retirement at age 55 or later with five or more years of service. In addition, substantially all of those employees hired prior to January 1, 2006 and who reach retirement age with at least 15 years of service may become eligible for both Company subsidized health care insurance and a company-paid life insurance benefit. The Company funds retiree health care benefits by making contributions to the Voluntary Employees Beneficiary Association (VEBA) administered by the BCBSA. The Company did not make a contribution for the years 2017 or 2016 to fund the liability for eligible retired employees.

(11) Health care cost trend rate assumptions can have a significant effect on the amounts reported for the Retiree Medical Benefits Plan. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	1-Percentage Point Increase	1-Percentage Point Decrease
Effect on total of service and interest cost components	$329,072	$(256,692)
Effect on postretirement benefit obligation	$4,484,549	$(3,627,680)

(12) Future expected benefit payments and 2018 contributions are as follows:

	Retirement Benefits		Other Postretirement Benefits
	Qualified	Non-Qualified	
a. 2018	$22,217,096	$19,002,125	$3,333,969
b. 2019	$22,483,046	$2,106,519	$3,434,894
c. 2020	$22,844,959	$2,155,585	$3,514,542
d. 2021	$23,449,010	$2,133,626	$3,656,007
e. 2022	$24,173,364	$2,215,552	$3,780,871
f. Thereafter Total	$130,418,253	$17,576,937	$20,775,551

(13) The Company anticipates that it will make cash contributions in 2018 of $19,002,125 and $669,219 to the non-qualified and postretirement pension plan. The Plan does not expect to make a cash contribution to the qualified pension plan. Expected contributions are dependent on many variables, including the variability of the market value of the assets as compared to the obligation and other market or regulatory conditions. The Plan takes into consideration its business investment opportunities and resulting cash requirements. Accordingly, actual funding may differ from current estimates. The Pension Protection Act established certain minimum funding standards for defined benefit plans, and the Plan is in compliance with these funding standards.

(14) Not Applicable

(15) In 2017 and 2016, BCBSNC recognized the amortization of the cumulative net loss from past experience as measured by comparing the expected position of the plan at year-end (based on the beginning of the year actuarial assumptions and prior year census data) with the actual position of the plan at year-end (based on the end of year actuarial assumptions and current year census data) prior to recognizing any plan provision changes.

(16) The Company did not have a significant benefit increase during the period. Additionally, the Company does not have any substantive commitment, such as a past practice or history of regular benefit increases, used as the basis for accounting for the benefit obligation.

(17) No significant special or contractual termination benefits were recognized during the period.

(18) There was no significant change in the benefit obligation or plan asset in 2017 or 2016 not otherwise apparent in the disclosures herein.

(19) There are no plan assets expected to be returned to the employer.

(20) The accumulated postretirement and pension benefit obligation, fair value of plan assets and funded status of the benefit plans are disclosed in the tables herein.

(21) The full surplus impacts of SSAP No. 102 and SSAP No. 92 have been recognized. There is no transition liability, nor will there be any future recognition of the initial application if this guidance.

B. Investment Plan Policies for Plan Assets

The Company utilizes a partial liability matching investment strategy. The Plan's funding ratio exceeded 100% at year end and approximately 90% of the portfolio was transitioned to a liability driven investment strategy.

The Plan's investments remain diversified and of high quality. At year end the Plan had investments in funds invested in fixed income, domestic and international equities, real estate and timber.

The investment fiduciary for the VEBA employs a total return investment approach whereby a mix of equities, fixed income and other investments is used to maximize the long-term return of plan assets for a prudent level of risk. The investment portfolio contains a diversified blend of equity, fixed income and other investments. Investment risk is measured and monitored on an ongoing basis through investment portfolio reviews, annual liability measurements, and periodic asset/liability studies.

The mutual fund investment strategy for the VEBA is market sensitive while remaining consistent with the risk tolerance, tax status, and cash flow requirements. Fund strategies include pursuing and capitalizing on market inefficiencies using duration, yield curve, security selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks and supply and demand.

For the company's defined benefit pensions and other postretirement benefits, the company discounts the individual expected cash flows underlying the service cost and interest cost using the applicable spot rates derived from the yield curve used to discount the cash flows used to measure the benefit obligation. This approach provides a more precise measurement of service and interest costs by improving the correlation between projected benefit cash flows to the corresponding spot yield curve rates.

The Company uses a spot discount rate approach to determine the interest cost component of expense and interest on the service cost component. Each year's cash flow is discounted at, and then credited with, interest based on the spot rate for that duration. The effective rate for interest on the benefit obligation is the single equivalent rate such that interest on the plan's PBO using the single rate equals the sum of the interest on each year's discounted cash flows determined using the corresponding spot rate along the Mercer Yield Curve. Interest on benefit obligations for purposes of determining the interest cost component of expense is calculated by applying interest to the present value of the payment expected at each payment date. For this purpose, interest is determined using the same spot rate used to determine the present value of the associated payment. In addition to the spot discount rate approach described above, the Company uses split discount rates for the calculation of the PBO and service cost component of expense. The service cost calculation uses the same method as the calculation of the PBO, but is based on expected service cost cash flows only (e.g. expected retiree cash flows are not included).

The Company also uses the Mercer modified MRP-2007 base mortality table and the Mercer modified MMP-2007 generational projection scale.

To set the expected return on plan assets for the qualified pension plan, the Company projects returns on each asset class using historical return relationships and making adjustments as necessary, given current market and economic

conditions. The projected returns are then applied to the portfolio target asset allocation weightings and result in a projected long-term portfolio rate of return.

(3) The following is a description of the valuation methodologies used for the benefit plan assets. There have been no changes in the methodologies used during the years ended December 31, 2017 and 2016.

D. Rate of Return on Assets Assumption

To set the expected return on plan assets for the qualified pension plan, the Company projects returns on each asset class using historical return relationships and making adjustments as necessary, given current market and economic conditions. The projected returns are then applied to the portfolio target asset allocation weightings and result in a projected long-term portfolio rate of return.

E. Defined Contribution Plans

BCBSNC has a defined contribution retirement plan qualified under Section 401(k) of the Internal Revenue Code, the BCBSNC Retirement Savings Plan and the BCBSNC 401(k) Plan (401(k) Plan). Participant pretax and Roth contributions are matched at a rate of 100% of the first 4% and 50% of the next 2% of compensation contributed. Additional Company contributions include profit sharing contributions that range from 2% to 5% of eligible compensation, based on the employee's years of service with the Company, and Transition Contributions that range from 1% to 8% of eligible compensation for eligible employees who were participants in the defined benefit pension plan on December 31, 2013. Transition Contributions will cease after December 31, 2023. Employee and Company contributions are subject to certain regulatory limits and service conditions.

The Company's contributions to the plans totaled $31,458,000 and $32,632,458 for the years ended December 31, 2017 and 2016, respectively.

The Company also maintains the Restoration Plan, a non-qualified defined contribution plan, to ensure that designated participants receive the full amount of benefits to which they would have been entitled under the BCBSNC 401(k) Plan except for limits on compensation imposed by the Internal Revenue Service. The Company's contributions to the plans totaled $3,889,737 and $1,958,045 for the years ended December 31, 2017 and 2016, respectively.

B. Assessments

1. The National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) is a voluntary organization consisting of the state life and health insurance guaranty associations located throughout the U.S. State life and health insurance guaranty associations, working together with NOLHGA, provide a safety net for their state's policyholders, ensuring that they continue to receive coverage even if their insurer is declared insolvent. The Company is aware that the Pennsylvania Insurance Commissioner (Insurance Commissioner) has placed Penn Treaty Network America Insurance Company and its subsidiary American Network Insurance Company, or collectively Penn Treaty, in rehabilitation, an intermediate action before insolvency. On July 27, 2016, the Pennsylvania Insurance Commissioner filed a petition to move Penn Treaty from rehabilitation to liquidation. This liquidation triggers state guaranty fund actions and statutory accounting actions by insurers in 2017, including a payment of the assessment in the amount of $49,514,336 as well as treatment of tax credits according to NAIC guidance. Payment of the assessments is expected to be recovered over future years through premium tax credits allowable by the state of North Carolina. In accordance with SSAP No. 35R, Guaranty Fund and Other Assessments, $4,802,372 of the assessments was recognized as an expense in 2017, the period in which the court ordered liquidation was entered, along with a discounted receivable in the amount of $44,711,964 for the premium tax credits.

D. Claims related extra contractual obligation and bad faith losses stemming from lawsuits

The Company did not pay any amounts to settle claims related to extra contractual obligations or bad faith claims stemming from lawsuits.

E. Joint and Several Liabilities

The Company did not have joint and several liabilities as of December 31, 2017 and 2016.

F. All Other Contingencies

We are regularly involved in litigation, both as a defendant and as a plaintiff, but primarily as a defendant. Litigation naming us as a defendant ordinarily arises out of our business operations as a health services organization and our investment activities. Some of the lawsuits may be class actions, or purport to be, and some may include claims for unspecified or substantial punitive and treble damages.

We may discuss such litigation in one of three ways. We accrue a charge to income and disclose legal matters for which the chance of loss is probable and for which the amount of loss can be reasonably estimated. We may disclose contingencies for which the chance of loss is reasonably possible and provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. Finally, we may voluntarily disclose loss contingencies for which the chance of loss is remote in order to provide information concerning matters that potentially expose us to possible losses.

The Company is involved in litigation (In Re: Blue Cross Blue Shield Antitrust Litigation (United States District Court, Northern District of Alabama)) which is a multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans. The Company is a named defendant in forty-three of the consolidated cases (twenty-nine provider cases and fourteen subscriber cases). The cases all allege an ongoing conspiracy in violation of the Sherman Antitrust Act among the Blues and the BCBSA and seek (1) a permanent injunction prohibiting enforcement of any agreements which restrict the BCBSA member operating territories; (2) treble damages for (a) alleged artificially inflated premiums in the case of subscribers and (b) alleged suppressed provider compensation in the case of providers and (3) attorneys' fees and costs. Additionally, one of the consolidated cases against the Company makes antitrust allegations based on most favored nations ("MFN") clauses in the Company's provider contracts and seeks reformation of the Company's provider contracts to strike MFN clauses and monetary damages. The case is now in the discovery stage. The Company intends to vigorously defend this litigation.

The Company is also involved in litigation (In Re: Anthem Data Breach Litigation(United States District Court, Northern District of California)). The case is a Federal, multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans, arising out of a cyber-attack perpetrated against Anthem, Inc. in December, 2014 and January, 2015. The case seeks certification of a class of all Blue plan insured members and alleges various negligence and breach of contract claims and violations of consumer protection laws and seeks injunctive relief and compensatory and punitive damages. This case has been settled, with no liability to the Company. The class settlement by Anthem has been preliminarily approved by the Court. The final approval hearing is scheduled for April 9, 2018.

The Company is also a defendant in litigation (Susan Sykes d/b/a Advanced Chiropractic, et al. v. BCBSNC, et al). This class action was filed May 22, 2015 against BCBSNC and other carriers, CIGNA, Medcost and Healthgram who use Health Network Solutions, Inc. ("HNS") to provide their chiropractic network. The complaint alleges a purported plaintiff class of all chiropractors who practiced in North Carolina from 2005 to the present and asserts claims for (1) declaratory judgment invalidating the agreements between HNS and the individual carriers; (2) price fixing, monopsony and monopoly; (3) unfair and deceptive trade practices; (4) illegal conspiracy in restraint of trade; (5) breach of fiduciary duty; and (6) punitive damages. Generally, the plaintiffs contend that the carriers' agreements with HNS result in underpayment to chiropractors and/or illegal exclusion of chiropractors from the carriers' provider networks. The case was originally filed in North Carolina state court, but has been transferred to the North Carolina Business Court to be consolidated with a prior pending action by the same plaintiffs against HNS. All defendants filed Motions to Dismiss on September 25, 2015 which are currently pending. The Company is vigorously defending the case.

The Company is also a defendant in United States of America, Ex Rel Dr. Susan Nedza v. American Imaging Management, Inc. et. al., pending in the United States District Court for the Northern District of Illinois. On December 21, 2017, Dr. Susan Nedza, a former employee of American Imaging Management, Inc. ("AIM") filed a qui tam action

against AIM and several Blue Cross and Blue Shield plans, including Blue Cross NC, alleging on behalf of the United States that the Defendants have caused false and fraudulent health care claims to be made under Medicare Advantage plans offered by the Defendant Blue plans for which AIM provided utilization management services and have defrauded the federal government in violation of the federal False Claims Act. Blue Cross NC was served with this complaint on January 3, 2018 and has not yet retained defense counsel. The Company will vigorously defend this matter.

Additionally, BCBSNC is also involved in various claims and legal actions arising in the ordinary course of business. However, management believes that proceedings arising in the ordinary course of business and those referenced above will not have a material adverse impact on the financial position of the Company.

15. Leases

G. Retained Assets

The Company did not have any retained assets at December 31, 2017 or 2016.

H. Insurance-Linked Securities (ILS) Contracts

The Company did not have any ILS contracts at December 31, 2017 or 2016.

22. Events Subsequent

Type I: Recognized Subsequent Events:

The Company has evaluated subsequent events through February 28, 2018, which is the date that the financial statements were available to be issued, for recognition or disclosure in our statutory financial statements. All of the effects of subsequent

events that provide additional evidence about conditions that existed at the consolidated balance sheet date, including the estimates inherent in the process of preparing the consolidated financial statements, are recognized in the consolidated financial statements. The Company does not recognize subsequent events that provide evidence about conditions that did not exist at the balance sheet date but arose after, but before the financial statements are available to be issued. In some cases, non-recognized subsequent events are disclosed to keep the financial statements from being misleading.

Type II: Non-recognized Subsequent Events:

On January 1, 2018, the Company would be subject to an annual fee under section 9010 of the Affordable Care Act (ACA). This annual fee will be allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1 of the year the fee is due. As of December 31, 2017, the Company has written health insurance subject to the ACA assessment, expects to conduct health insurance business in 2018, and estimates their portion of the annual health insurance industry fee to be payable on September 30, 2018 to be $169,100,868. This amount is reflected in special surplus funds. This assessment is expected to impact risk based capital (RBC) by a 4.8% reduction. Reporting the ACA assessment as of December 31, 2017, would not have triggered an RBC action level.

		Current Year	Prior Year

24. Retrospectively Rated Contracts & Contracts Subject to Redetermination

A. Method Used to Estimate Accrued Retrospective Premium Adjustments

The Company estimates accrued retrospective premium adjustments for its group health insurance business through a mathematical approach using an algorithm of the company's underwriting rules and experience rating practices.

B. Accrued Retrospective Premium Disclosure

The Company records accrued retrospective premium as an adjustment to earned premium.

C. Net Premiums Written Disclosure

The amount of net premiums written by the Company for the period ended December 31, 2017 that are subject to retrospective rating features was $8,342,998,225, that represented 95% of the total net premiums written. No other net premiums written by the Company are subject to retrospective rating features.

D. Medical Loss Ratio Rebates Required Pursuant to the Public Health Service Act

The Company does not anticipate having to pay a rebate as of the current reporting period year to date, and as a result, there have been no rebates accrued for the Company's Individual, Small, Student, or Large Group business as of December 31, 2017.

Beginning in 2014, Medicare Advantage plans are also subject to the 85% minimum MLR. MLR rebates to Centers for Medicare and Medicaid Services (CMS) are to be provided annually if the insurer fails to meet the requirements in the market for the prior year. Medicare rebates for 2015 reporting were paid in July 2017. As of December 31, 2017, activity related to Medicare MLR rebate reserves and premium adjustments was as follows:

33. Premium and Premium Equivalent Reporting

The information below presents BCBSNC ratios based on premium and premium equivalents. Premium equivalents are administrative fees earned from the Company's ASO and ASC Plans plus claims processed for this self-funded business. Medical loss, operating expense and net income ratios based on premiums and premium equivalents represent more complete financial ratios, as they include the total activities associated with the Company's business. Cost containment expenses are included in the operating expense ratio and excluded from the medical loss ratio. Premium taxes are included in the operating expense ratio. Ratios and certain dollar amounts below were calculated based on amounts obtained from within the Annual Statement filing.

Medical loss ratio (with premium equivalents)	86.6%
Operating expense ratio (with premium equivalents)	9.9%
Net income ratio (with premium equivalents)	3.6%

Premium equivalent ratios above are calculated as a percentage of premiums and premium equivalents for medical loss and operating expense ratios, and a percentage of total revenue (premium, premium equivalents, other revenues, and net investment gains) for net income ratio.

Premium and Premium Equivalents in 2017 are as follows:

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Blue Cross and Blue Shield of North Carolina (Blue Cross NC or the Company) have been prepared in conformity with accounting practices and procedures prescribed by the North Carolina Department of Insurance (NCDOI).

The NCDOI recognizes only Statutory Accounting Practices (SAP) prescribed or permitted by the state of North Carolina for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the North Carolina Insurance laws, regulations and general administrative rules. The NCDOI has adopted the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) as a component of prescribed or permitted practices by the State of North Carolina (NC SAP). There is no deviation from the NAIC SAP. There were no differences between the statutory practices prescribed or permitted by the state of North Carolina and those prescribed or permitted by NAIC SAP which would materially affect the statutory basis net income or surplus.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of North Carolina is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the amounts of revenue and expenses during the reporting period. The Company uses estimates and assumptions based on analytical and/or actuarially accepted quantitative methods in determining contract reserves and claims incurred but not yet reported, valuation of pension and other benefit plans, deferred income taxes, fair value of investments, other-than-temporary investments, and other valuation accruals. Actual results could differ materially from those estimates.

On December 22, 2017, the United States government enacted significant changes to the US tax law with the passage of H.R.1, An Act to Provide for Reconciliation Pursuant to Titles II and V of the Concurrent Resolution on the Budget for Fiscal Year 2018 (the Tax Act). The Tax Act included significant changes to existing tax law, including a permanent reduction to the US federal corporate income tax rate from 35% to 21%, along with changes to deductions, credits, and business-related exclusions.

The Company recognized a provisional tax benefit in 2017 and completed its accounting for the tax effects of the enactment of the Tax Act in 2018 as provided in Footnote 9, Income Taxes.

C. Accounting Policies

Premiums written are earned over the period of coverage on a pro rata basis. Premiums billed to policyholders are recorded as uncollected premiums when the coverage period begins. Payments received in advance of coverage are recorded as premiums received in advance until earned. Delinquent uncollected premiums are charged directly to reserves and unassigned funds once delinquent for 30 days and 90 days for non-group and group subscribers, respectively.

In addition, the Company uses the following accounting policies:

1. Short-term investments consist of readily marketable securities with maturities greater than three months but less than one year at the time of purchase. These investments are recorded at amortized cost.

2. Bonds rated 1 and 2 by the NAIC are stated at cost adjusted for amortization of premiums and accretion of discounts using the scientific amortization method. Bonds rated 3 through 6 are carried at the lower of amortized cost or fair value with the change recorded in capital and surplus, net of applicable taxes. Prepayment assumptions are determined by using broker data.

The Company holds one Securities Valuations Office (SVO)-Identified bond ETF reported on Schedule D-1. The ETF is reported at fair value.

Declines in the fair value of invested assets below cost are compiled on a monthly basis and reviewed quarterly to assess whether any other-than-temporary impairment loss should be recorded. Various thresholds are used to identify those securities which are at the greatest risk of an other than temporary impairment.

3. Common stocks of subsidiaries are stated in accordance with SSAP 97. Common stocks, excluding common stock of subsidiaries, are stated at the estimated market value provided by the Securities Valuation Office (SVO) of the NAIC or are based on quoted market prices. Estimated SVO market values are based on published quotations of the SVO. However, for certain investments for which the SVO does not provide a value, Blue Cross NC uses the amortized cost amount as its estimate of market value in accordance with prescribed guidance.

4. Preferred stocks are stated at the estimated market value provided by the Securities Valuation Office (SVO) of the NAIC or are based on quoted market prices. Estimated SVO market values are based on published quotations of the SVO. However, for certain investments for which the SVO does not provide a value, Blue Cross NC uses the amortized cost amount as its estimate of market value in accordance with prescribed guidance.

5. The Company does not have any mortgage loans.

6. Mortgage-backed and other asset-backed securities rated 1 and 2 by the NAIC are adjusted for unamortized premiums and discounts, which are amortized using the scientific method over the estimated remaining term of the securities, adjusted retrospectively for changes in anticipated prepayments.

For loan-backed or structured securities, factors considered by management in determining whether an other-than-temporary impairment exists include the Company's stated intent to not sell, the Company's ability to hold such investments until the fair value recovers, and the discounted cash flows of the security based on the yield at the date of acquisition. If the Company intends to sell or if the Company does not have the ability and intent to hold the security for a period of time sufficient to recover its amortized cost basis, an other-than-temporary impairment exists, and the security is written down to fair value with the amount of the write-down recorded as a realized loss. If the Company does not intend to sell the security and has the ability and intent to hold the security for a period of time sufficient to recover the amortized cost basis, the Company calculates the cash flows expected to be collected. In this calculation, the Company compares the present value of cash flows expected to be collected, discounted at the security's effective interest rate at date of purchase, to the amortized cost basis. If the present value of cash flows is less than the amortized cost basis, a realized loss is recorded for the difference. The present value of cash flows then becomes the new cost basis.

7. As of December 31, 2018, Blue Cross NC had seven wholly-owned subsidiaries: Beacon Health Holdings (Beacon); Corium, LLC (Corium); Corium II, LLC (Corium II); Blue Cross and Blue Shield of North Carolina Senior Health (Senior Health); Momentum Health Partners, LLC (MHP); Momentum Health, LLC Momentum, and NobleHealth, Inc. (NobleHealth). Beacon is a holding company for not-for-profit subsidiaries and affiliates. Corium owns, operates, and manages financed office buildings of the Company. Corium II owns, operates, and manages unencumbered office buildings of the Company. Senior Health will provide Medicare plans in the future. MHP and Momentum may provide medical plans in the future. NobleHealth holds non-controlling strategic investments in certain health services companies and has six wholly-owned subsidiaries: Mosaic Group Services, LLC (Mosaic Group); Mosaic Health Solutions, LLC (Mosaic Health Solutions); Noble Benefit Services, LLC (NBS); Topaz Shared Services, LLC (Topaz); ACS Benefit Services, LLC (ACS); and NC Health Affiliates, LLC (NCHA). Mosaic Group functions as an insurance agency selling third-party life and disability and death and dismemberment products and is licensed as a third-party administrator. Mosaic Health Solutions holds non-controlling strategic investments in certain health services companies. NBS will function as a third-party administrator for self-insured employer groups. Topaz provides a healthcare payer operating system. ACS provides self-funded plans with complete third-party administration services for group medical, dental and disability benefits. NCHA operates as a staff augmentation service.

NobleHealth investment meets the definition of presumption of control as defined in accounting guidance provided in SSAP 97 (Investments in Subsidiary, Controlled, and Affiliated Entities-A Replace of SSAP No. 88), Paragraph 6.b. Accordingly, adjustment has been made to report this investment on an equity method basis as defined in SSAP No. 48 – Joint Ventures, Partnerships and Limited Liability Companies. The investment which is Common Stock is carried at cost.

8. As of December 31, 2018, the Company holds ownership interest in 38 limited partnerships. The company carries these interests based on the underlying audited GAAP equity of the investee, adjusted for certain provisions as described by SSAP 48, Joint Ventures, Partnerships and Limited Liability Companies or net asset value (NAV).

9. The Company does not have derivative instruments.

10. There have been no significant changes related to the methodology used in the premium deficiency calculation.

11. Claims and claims adjustment expenses are expensed as incurred. The claims unpaid liability includes management's estimate of the ultimate cost of the claims in process of settlement and claims incurred but not yet reported.

The process of estimating reserves requires a high degree of judgment and a number of factors are taken into consideration. The Company actuarially estimates the liability for claims in process of settlement and claims incurred but not reported based on the most current historical claims payment patterns, changes in number of members, changes in products and benefits, and estimates of health care trend changes (cost, utilization, and intensity of services). Management also estimates the amount of claims adjustment expense needed to settle claims by determining the total administrative cost incurred to process claims as a percentage of total insured claims expense and applying that percentage to total claims in process of settlement and claims incurred but not yet reported.

Estimates for contract reserves are continually reviewed and revised as changes in experience and other factors occur. Changes to the valuation basis are reflected in capital and surplus in the period in which the change in estimate is identified. Changes in the medical cost trend or in claims payment patterns used in estimating reserves would impact the balance of contract reserves and would be recognized in the Statement of Revenue and Expenses. At year-end 2018 and 2017, the Company adjusted contract reserves through capital and surplus by $5,578,091 and $17,530,059 in accordance with the statutory accounting guidance defined in SSAP 54, paragraph 21, as a result of updated experience and refinement of assumptions.

Estimates for the claims unpaid liability are continually reviewed and revised as changes in experience and other factors occur, and revisions are accordingly reflected in the hospital and medical expense line of the Statement of Revenue and Expenses in the period in which the change in estimate is identified. Changes in the medical cost trend and claims payment patterns used in estimating reserves would impact the balance of claims unpaid and unpaid claims adjustment expense. These estimates may change as actuarial methods change or as underlying facts upon which these estimates are based change. There have been no significant changes to our actuarial methods in the last two fiscal years.

12. The Company has not modified its capitalization policy from the prior period.

13. The Company's pharmacy benefit manager (PBM) contracts with pharmaceutical manufacturers, some of whom provide rebates based on use of the manufacturers products by the PBM for the Company's insured and self-funded customers. The Company accrues the rebates receivable monthly based on the terms of the applicable contracts. The PBM bills these rebates to the manufacturers on a quarterly basis. The Company is reimbursed either annually or quarterly for these rebates. The Company records the rebates attributable to insured customers as a reduction to claims and medical expenses. The rebates attributable to self-funded customers are accrued in accordance with their contracts, as rebates receivable as well as a corresponding payable to self-funded customers. Of these receivables, $73,901,896 and $76,453,680 at December 31, 2018 and 2017, respectively, were nonadmitted because they were outstanding in excess of 90 days.

D. Going Concern

At December 31, 2018, as required by SSAP No, 1, *Accounting Policies, Risk and Uncertainties, and other Disclosures*, the Company has assessed its ability to continue as a going concern and is unaware of any conditions or events that create substantial doubt regarding its ability to do so.

2. Accounting Changes and Corrections of Errors

The Company did not have any material changes in accounting principles and/or corrections of errors at December 31, 2018.

D. Loan-Backed Securities

(1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from broker-dealer survey values or internal estimates.

(2) The Company did not have any other than impaired loan-backed securities for the period ended December 31, 2018.

(3) Loan-backed securities with a recognized other-than-temporary impairment, currently held by the Company, as the present value of cash flows expected to be collected is less than the amortized cost basis of the securities are as follows as of December 31, 2018:

1	2	3	4	5	6	7
CUSIP	Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	Present Value of Projected Cash Flows	Recognized Other-than-Temporary Impairment	Amortized Cost After Other-Than-Temporary Impairment	Fair Value at time of OTTI	Date of financial statement Where Reported
None	$-	$-	$-	$-	$-	$-

(4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earning as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

A. The aggregate amount of unrealized losses:

1.	Less than 12 Months	$2,408,183
2.	12 Months or Longer	$7,076,244

B. The aggregate related fair value of securities with unrealized losses:

1.	Less than 12 Months	$236,729,359
2.	12 Months or Longer	$232,839,725

(5) For loan-backed or structured securities, factors considered by management in determining whether an other-than-temporary impairment exists include the Company's stated intent to not sell, the Company's ability to hold such investments until the fair value recovers, and the discounted cash flows of the security based on the yield at the date of acquisition. If the Company intends to sell or if the Company does not have the ability and intent to hold the security for a period of time sufficient to recover its amortized cost basis, an other-than-temporary impairment exists, and the security is written down to fair value with the amount of the write-down recorded as a realized loss. If the Company does not intend to sell the security and has the ability and intent to hold the security for a period of time sufficient to recover the amortized cost basis, the Company calculates the cash flows expected to be collected. In this calculation, the Company compares the present value of cash flows expected to be collected, discounted at the security's effective interest rate at date of purchase, to the amortized cost basis. If the present value of cash flows is less than the amortized cost basis, a realized loss is recorded for the difference. The present value of cash flows then becomes the new cost basis.

E. The Company had no net capital loss carryforwards and no federal income tax net operating loss (NOL) carryforwards.

The following are income taxes incurred in the current and prior years that will be available for recoupment in the event of future net losses:

	Ordinary	Capital	Total
Year ended 2018	$183,773,246	$8,562,617	$192,335,863
Year ended 2017	$131,650,229	$5,641,500	$137,291,729

As discussed in Footnote 1B, Accounting Estimates, the Company completed its accounting for the tax effects of the enactment of the Tax Act in 2018. The Company recognized a total provisional tax benefit of $1,093,338 in 2017 due to the application of the newly enacted rates to existing deferred balances. The Company completed its accounting for the tax effects of the enactment of the Tax Act in 2018 and recorded an additional benefit of $11,517,000 in net deferred income taxes.

F. The Company's federal income tax return is consolidated with the following entities:

Corium, LLC (Corium)
Corium II, LLC (Corium II)
NobleHealth, Inc.
Noble Benefit Services, LLC
Mosaic Group Services, LLC
ACS Benefit Services, LLC
Mosaic Health Solutions, LLC
Topaz Shared Services, LLC
Blue Cross and Blue Shield of North Carolina Senior Health
NC Health Affiliates, LLC
Beacon Health Holdings, Inc.
Momentum Health, LLC
Momentum Health Partners, Inc.

Current taxes are allocated among all affiliated companies based on a written tax sharing agreement. Allocation of taxes is made primarily on a separate return basis. Payment for losses and other tax items occurs once a company could have utilized the items in a separate return and the group has utilized the items in the consolidated return. This is referred to as the wait-and-see method. Inter-company balances are settled annually within two months of filing the consolidated return.

3. Senior Health is not required to file an HRBC at this time.

11. Debt

A. Blue Cross NC has established three credit lines providing a total borrowing capacity of $350,000,000 to support its daily working capital requirements. The three credit lines include two revolving lines of credit and a secured line of credit with the Federal Home Loan Bank of Atlanta (FHLBA). The interest rate for borrowings on the revolving lines is LIBOR plus 65 basis points. The interest rate for borrowings on the secured line is based on rates published by the FHLBA for the specific term requested for the borrowings.

In November 2013, Blue Cross NC entered into a revolving line of credit and has amended and restated it periodically to extend the termination date or adjust the borrowing capacity as our liquidity needs fluctuate. In July 2016, Blue Cross NC extended the termination date an additional year to July 2018. In July 2017, Blue Cross NC extended the termination date an additional year to July 2019 and reduced the borrowing capacity to $100,000,000 from $150,000,000. In July 2018, Blue Cross NC extended the termination date an additional year to July 2020.

In September 2015, Blue Cross NC entered into a second $50,000,000 revolving line of credit terminating in September 2017. In December 2016, Blue Cross NC extended the termination date to September 2017. In November 2017, Blue Cross NC extended the termination date to September 2019.

In September 2016, Blue Cross NC entered into a credit agreement with the FHLBA providing secured borrowing capacity up to $200,000,000. The capacity is based on our internal limits and the collateral will included cash and securities in our investment portfolio deemed eligible by the FHBLA. Collateral is only encumbered to the extent borrowings are outstanding.

There were no outstanding borrowing under these revolving lines of credit at December 31, 2018 or December 31, 2017.

In September 2014, the Company entered into a $165,000,000 thirty-year, fully amortizing, 4.09% mortgage due 2044 with an unaffiliated lender using eight office buildings as collateral. The mortgage is not callable and can be prepaid at any time subject to a make whole premium due to the lender.

Blue Cross NC must maintain certain covenants including limits on indebtedness to capital, indebtedness to EBITDA, risk based capital ratio, liens, and dispositions. As of December 31, 2018 and December 31, 2017, the Company was in compliance with the covenants and requirements outlined in these agreements.

B. FHLB (Federal Home Loan Bank) Agreements

1. The Company is a member of the FHLBA. Through its membership, the Company has the opportunity to conduct business activity with the FHLBA. The Company has determined the actual/estimated maximum borrowing capacity as $200,000,000. The Company calculated this amount in accordance with current debt policy. The Company's membership stock is eligible for redemption.

12. Retirement Plans, Deferred Compensation, Post-Employment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. Defined Benefit Plan

The Company maintains a noncontributory, defined benefit pension plan. The Plan covers most employees hired before January 1, 2006. Benefits are determined according to the covered employee's years of credited service and final average compensation while an eligible participant. Effective December 31, 2013 the Plan was frozen and no longer recognizes service or compensation earned after this date for retirement benefit determination purposes. All Plan participants are fully vested. The Company also maintains three separate non-contributory, non-qualified defined benefit SERPs for certain executives. Two of the SERPs have benefits based on years of service, retirement age and certain final average pay calculations. Benefits are offset by benefits payable from other defined benefit retirement plans. An additional SERP has benefits based on years of service and individual agreements that generally require payment of a fixed monthly dollar amount for 15 years upon retirement.

Effective January 1, 2017 retirees and dependents who were age 65 and older obtained coverage through a private health exchange, BCBS Marketplace. Eligible retirees and dependents who enrolled through the BCBS Marketplace received a sponsor subsidy in the form of a Health Reimbursement Account contribution. This modification did not intend or expect to materially impact the cost of the program.

A summary of assets, obligations and assumptions of the Retirement and Other Postretirement Plans, are as follows at December 31, 2018 and 2017:

The above trend rates were used for the PPO plan options. Different rates were used for some post-65 plan options to better model gross costs and expected government subsidies.

(9) The amount of the accumulated benefit obligation for defined benefit pension plans was $463,549,719 for the current year and $521,004,708 for the prior year.

(10) The Company provides certain health care and life insurance benefits for retired employees. The Plan is a contributory health and welfare plan, which provides health benefits (medical, hospital, surgical, dental and drug) for eligible retirees. Retirees are eligible for coverage upon retirement at age 55 or later with five or more years of service. In addition, substantially all of those employees hired prior to January 1, 2006 and who reach retirement age with at least 15 years of service may become eligible for both Company subsidized health care insurance and a company-paid life insurance benefit. The Company funds retiree health care benefits by making contributions to the Voluntary Employees Beneficiary Association (VEBA) administered by the

BCBSA. The Company did not make a contribution for the years 2018 or 2017 to fund the liability for eligible retired employees.

(11) Health care cost trend rate assumptions can have a significant effect on the amounts reported for the Retiree Medical Benefits Plan. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	1-Percentage Point Increase	1-Percentage Point Decrease
Effect on total of service and interest cost components	$242,833	$(191,639)
Effect on postretirement benefit obligation	$3,595,318	$(2,950,060)

(12) Future expected benefit payments are as follows:

	Retirement Benefits		Other Postretirement Benefits
	Qualified	Non-Qualified	
a. 2019	$ 22,277,360	$ 2,300,953	$ 3,541,956

e. 2023	$ 24,462,984	$ 2,407,194	$ 3,939,402
f. Thereafter Total	$132,925,097	$18,002,030	$21,253,400

(13) The Company anticipates that it will make cash contributions in 2019 of $2,187,199 and $712,203 to the non-qualified and postretirement pension plan respectively. The Plan does not expect to make a cash contribution to the qualified pension plan. Expected contributions are dependent on many variables, including the variability of the market value of the assets as compared to the obligation and other market or regulatory conditions. The Plan takes into consideration its business investment opportunities and resulting cash requirements. Accordingly, actual funding may differ from current estimates. The Pension Protection Act established certain minimum funding standards for defined benefit plans, and the Plan is in compliance with these funding standards.

(14) Not Applicable

(15) In 2018 and 2017, Blue Cross NC recognized the amortization of the cumulative net loss from past experience as measured by comparing the expected position of the plan at year-end (based on the beginning of the year actuarial assumptions and prior year census data) with the actual position of the plan at year-end (based on the end of year actuarial assumptions and current year census data) prior to recognizing any plan provision changes.

(16) The Company did not have a significant benefit increase during the period. Additionally, the Company does not have any substantive commitment, such as a past practice or history of regular benefit increases, used as the basis for accounting for the benefit obligation.

(17) No significant special or contractual termination benefits were recognized during the period.

(18) There was no significant change in the benefit obligation or plan asset in 2018 or 2017 not otherwise apparent in the disclosures herein.

(19) There are no plan assets expected to be returned to the employer.

(20) The accumulated postretirement and pension benefit obligation, fair value of plan assets and funded status of the benefit plans are disclosed in the tables herein.

(21) The full surplus impacts of SSAP No. 102 and SSAP No. 92 have been recognized. There is no transition liability, nor will there be any future recognition of the initial application if this guidance.

B. Investment Plan Policies for Plan Assets

Blue Cross NC's plan weighted-average asset allocations at December 31, by asset category, are as follows:

	Retirement Benefits					
	Qualified			Other Postretirement Benefits		
	Target	2018	2017	Target	2018	2017
Asset Category:						
Equity securities:

Other	-	1	2	-	-	-
Total	100%	100%	100%	100%	100%	100%

The Company utilizes a partial liability matching investment strategy. The Plan's funding ratio exceeded 100% at year end and approximately 90% of the portfolio was transitioned to a liability driven investment strategy.

The Plan's investments remain diversified and of high quality. At year end, the Plan had investments in funds invested in fixed income, domestic and international equities, real estate and timber.

The investment fiduciary for the VEBA employs a total return investment approach whereby a mix of equities, fixed income and other investments is used to maximize the long-term return of plan assets for a prudent level of risk. The investment portfolio contains a diversified blend of equity, fixed income and other investments. Investment risk is measured and monitored on an ongoing basis through investment portfolio reviews, annual liability measurements, and periodic asset/liability studies.

The mutual fund investment strategy for the VEBA is market sensitive while remaining consistent with the risk tolerance, tax status, and cash flow requirements. Fund strategies include pursuing and capitalizing on market inefficiencies using duration, yield curve, security selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks selection, geographic concentration, sector and state allocation. Security selection, geographic concentration and sector decisions are based on relative attractiveness, using inputs such as historical spread relationships, the value of state tax exemptions, state/regional economic outlooks, credit outlooks and supply and demand.

(2) There were no material transfers between Levels I, II or III during the years ended December 31, 2018 and 2017.

(3) The following is a description of the valuation methodologies used for the benefit plan assets. There have been no changes in the methodologies used during the years ended December 31, 2018 and 2017.

D. Rate of Return on Assets Assumption

To set the expected return on plan assets for the qualified pension plan, the Company projects returns on each asset class using historical return relationships and making adjustments as necessary, given current market and economic conditions. The projected returns are then applied to the portfolio target asset allocation weightings and result in a projected long-term portfolio rate of return.

E. Defined Contribution Plans

Blue Cross NC sponsors a defined contribution retirement plan qualified under Section 401(a) of the Internal Revenue Code, the Blue Cross NC 401(k) Plan (401(k) Plan). Eligible employees may contribute pretax and Roth contributions that are matched at the rate of 100% of the first 4% and 50% of the next 2% of compensation contributed. Additional Company contributions include profit sharing contributions that range from 2% to 5% of eligible compensation, based on the employee's years of service with the Company and Transition Contributions that range from 1% to 8% of eligible compensation for eligible employees who were participants in the defined benefit pension plan on December 31, 2013. Transition Contributions will cease after December 31, 2023. Employee and Company contributions are subject to certain regulatory limits and service conditions.

The Company's contributions to the plans totaled $34,689,250 and $31,458,000 for the years ended December 31, 2018 and 2017, respectively.

The Company also maintains the Restoration Plan, a non-qualified defined contribution plan, to ensure that designated participants receive the full amount of benefits to which they would have been entitled under the Blue Cross NC 401(k) Plan except for limits on compensation imposed by the Internal Revenue Service. The Company's contributions to the plans totaled $4,914,707 and $3,889,737 for the years ended December 31, 2018 and 2017, respectively.

F. Multiemployer Plans

Blue Cross NC does not participate in any multiemployer plans.

G. Consolidated/Holding Company Plans

The Company does not participate in any qualified, noncontributory defined benefit pension plans sponsored by any affiliates

H. Post-Employment Benefits and Compensated Absences

The Company does not have any post-employment benefits that are not accrued for in accordance with SSAP No. 11 Post-Employment Benefits and Compensated Absences.

I. Impact of Medicare Modernization Act on Postretirement Benefits

(1) The Medicare Prescription Drug, Improvement and Modernization Act of 2003 allows employers who offer actuarially equivalent prescription drug benefits to retirees to receive a federal subsidy starting in 2006. The Plan did not apply for these federal subsidies during 2018 and does not expect to apply for them in 2019.

(2) Not applicable.

(3) Not applicable.

13. Capital and Surplus, Shareholders' Dividend Restrictions and Quasi-Reorganizations

(1) The Company has no shares authorized, issued or outstanding since the Company is incorporated as a taxable not-for-profit organization as of December 31, 2018 and 2017.

(2) The Company has no preferred stock outstanding.

(3) The Company does not declare dividends as it does not have shares authorized, issued or outstanding.

(8) The Company did not hold any shares of stock for purposes such as conversion of preferred stock, employee stock options or stock purchase warrants as of December 31, 2018 or 2017.

(9) The Company does not have any special surplus funds as of December 31, 2018. Enacted on January 22, 2018, along with continuing resolution legislation, H.R. 195, Division D – Suspension of Certain Health-Related Taxes, § 4003, suspends collection of the health insurers tax for the 2019 calendar year only. The ACA imposed a nondeductible assessment on entities that issued health insurance for each calendar year beginning on or after January 1, 2014. The liability related to the Section 9010 ACA assessment shall be estimated and recorded in full once the entity provides qualifying health insurance (typically January 1) in the applicable calendar year in which

the assessment is paid (fee year) with a corresponding entry to expense. The Section 9010 ACA assessment shall be recognized in full on January 1 of the fee year, in the operating expense category of Taxes, Licenses and Fees. On January 1, 2018 the Company recognized in full $169,100,868 related to the Section 9010 ACA assessment. At September 30, 2018, the Company adjusted our initial amount for 2017 by ($2,516,476), based on the final fee calculation from the Internal Revenue Service (IRS). At September 30, 2018, the Company paid $166,584,392, based on the invoice from the IRS.

(10) The portion of unassigned funds (surplus) represented or reduced by cumulative unrealized gains and losses were ($273,547,398) and ($360,351,837) in 2018 and 2017, respectively.

(11) The Company does not have any surplus notes debentures or similar obligations as of December 31, 2018 or 2017.

(12) The Company does not have any quasi-reorganizations as of December 31, 2018 or 2017.

(13) The Company was not involved in any quasi-reorganizations; therefore, there is no effective date(s) for quasi-reorganization.

B. Assessments

1. The National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) is a voluntary organization consisting of the state life and health insurance guaranty associations located throughout the U.S. State life and health insurance guaranty associations, working together with NOLHGA, provide a safety net for their state's policyholders, ensuring that they continue to receive coverage even if their insurer is declared insolvent. On March 1, 2017, Pennsylvania courts released an Order of Liquidation for Penn Treaty & American Network Insurance Company. This liquidation triggered state guaranty fund actions and statutory accounting actions by insurers in 2017, including a payment of the assessment in the amount of $50,813,852.

2. Payment of the assessments is expected to be recovered over future years through premium tax credits allowable by the state of North Carolina. In accordance with SSAP No. 35R, Guaranty Fund and Other Assessments, the Company recorded a discounted premium tax credit asset of $41,711,988 , using a whole life discount rate of 3.5% over the five year recovery period..

E. Joint and Several Liabilities

The Company did not have joint and several liabilities as of December 31, 2018 and 2017.

All Other Contingencies

We are regularly involved in litigation, both as a defendant and as a plaintiff, but primarily as a defendant. Litigation naming us as a defendant ordinarily arises out of our business operations as a health services organization and our investment activities. Some of the lawsuits may be class actions, or purport to be, and some may include claims for unspecified or substantial punitive and treble damages.

We may discuss such litigation in one of three ways. We accrue a charge to income and disclose legal matters for which the chance of loss is probable and for which the amount of loss can be reasonably estimated. We may disclose contingencies for which the chance of loss is reasonably possible and provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. Finally, we may voluntarily disclose loss contingencies for which the chance of loss is remote in order to provide information concerning matters that potentially expose us to possible losses.

The Company is involved in litigation *(In Re: Blue Cross Blue Shield Antitrust Litigation (United States District Court, Northern District of Alabama))* which is a multi-district case that consolidates multiple state and national class actions against various of the Company, the BCBSA and multiple other Blue Cross and Blue Shield plans. The Company is a named defendant in forty-three of the consolidated cases (twenty-nine provider cases and fourteen subscriber cases). The cases all allege an ongoing conspiracy in violation of the Sherman Antitrust Act among the Blues and the BCBSA and seek (1) a permanent injunction prohibiting enforcement of any agreements which restrict the BCBSA member operating territories; (2) treble damages for (a) alleged artificially inflated premiums in the case of subscribers and (b) alleged suppressed provider compensation in the case of providers and (3) attorneys' fees and costs. Additionally, one of the consolidated cases against the Company makes antitrust allegations based on most favored nations (MFN) clauses in the Company's provider contracts and seeks reformation of the Company's provider contracts to strike MFN clauses and monetary damages. The case is now in the discovery stage. The Company is vigorously defending the case.

The Company is also a defendant in litigation *(Susan Sykes d/b/a Advanced Chiropractic, et al. v. BCBSNC, et al)*. This class action was filed May 22, 2015 against the Company and other carriers, CIGNA, Medcost and Healthgram who use Health Network Solutions, Inc. (HNS) to provide their chiropractic network. The complaint alleges a purported plaintiff class of all chiropractors who practiced in North Carolina from 2005 to the present and asserts claims for (1) declaratory judgment invalidating the agreements between HNS and the individual carriers; (2) price fixing, monopsony and monopoly; (3) unfair and deceptive trade practices; (4) illegal conspiracy in restraint of trade; (5) breach of fiduciary duty; and (6) punitive damages. Generally, the plaintiffs contend that the carriers' agreements with HNS result in underpayment to chiropractors and/or illegal exclusion of chiropractors from the carriers' provider networks. The case was originally filed in North Carolina state court, but has been transferred to the North Carolina Business Court to be consolidated with a prior pending action by the same plaintiffs against HNS. All defendants filed Motions to Dismiss on September 25, 2015 which were allowed and all claims dismissed on April 5, 2018. Plaintiffs have filed notice of appeal to the North Carolina Supreme Court. Briefing is complete and the case has been set for oral argument in the North Carolina Supreme Court on March 5, 2019. The Company is vigorously defending the case.

The Company is also a defendant in *United States of America, Ex Rel Dr. Susan Nedza v. American Imaging Management, Inc. et. al.,* pending in the United States District Court for the Northern District of Illinois. On December 21, 2017, Dr. Susan Nedza, a former employee of American Imaging Management, Inc. (AIM) filed a *qui tam* action against AIM and several Blue Cross and Blue Shield plans, including the Company, alleging on behalf of the United States that the defendants have caused false and fraudulent health care claims to be made under Medicare Advantage plans offered by the defendant Blue plans for which AIM provided utilization management services and have defrauded the federal government in violation of the federal False Claims Act. The Company was served with this complaint on January 3, 2018. The Company filed a Motion to Dismiss the Complaint on March 18, 2018, which is still pending. The Company is vigorously defending this case.

The Company is also a defendant in Lifebrite Hospital Group of Stokes, LLC v. Blue Cross and Blue Shield of North Carolina, originally filed in North Carolina state court, but removed by the Company to United Stated District Court for the Middle District of North Carolina. On March 15, 2018, the Company was served with a summons and complaint filed by Lifebrite Hospital Group of Stokes, LLC, which is also known as Stokes County Hospital in Danbury, North Carolina. The complaint alleges claims for breach of contract and unjust enrichment arising out of denial of urine drug testing claims filed by Stokes County Hospital. The Company filed its Answer and Counterclaims on May 16, 2018 and filed an Amended Answer and Counterclaims on June 27, 2018. The Plaintiff

filed a Motion to Dismiss the counterclaims and Motion to Remand to state court on July 20, 2018, which are currently pending. The Company is vigorously defending this matter and vigorously prosecuting its counterclaims against the plaintiff.

Additionally, the Company is also involved in various claims and legal actions arising in the ordinary course of business. However, management believes that proceedings arising in the ordinary course of business and those referenced above will not have a material adverse impact on the financial position of the Company.

Total Investments	$3,720,591	$-	$-	($560,992)	($344,954)	$-	$-	$-	$-	$2,814,645

There were no material transfers between Levels I, II or III during the year to date ended December 31, 2018 and December 31, 2017.

B. **Assets measured at Fair Value on a Nonrecurring Basis**

Non-financial assets and liabilities including long-lived assets and goodwill are recognized at fair value when they are considered to be other-than-temporarily impaired. There was no required fair value measurement for assets and liabilities measured at fair value on a non-recurring basis.

C. **Assets measured at Fair Value and Admitted Values**

The assets on the table below are located on the Statement of Assets, lines 1, 2, and 5 (cash is excluded).

As of December 31, 2018 Financial Instrument	Aggregate Fair Value	Admitted Assets	Level I	Level II	Level III	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Cash Equivalents, and Short Term Investments	$82,028,082	$82,028,082	$82,028,082	-	-	-	-
Bond Securities	$3,045,006,978	$3,052,710,296	$291,893,814	$2,753,113,164	-	-	-

D. The carrying amounts reported in the Statements of Assets, Liabilities, Capital and Surplus, for cash, cash equivalents, investment income due and incurred, premiums receivable, and other receivables, amounts receivable relating to uninsured plans, income tax receivable, premiums received in advance, medical and other benefits payable, accounts payable and accrued expenses, and payable for securities approximate fair value because of the short term nature of these items.

Non-financial instruments such as property and equipment, other current assets, deferred income taxes and certain financial instruments such as policy liabilities are excluded from the fair value disclosures. Therefore, the fair value amounts cannot be aggregated to determine our underlying economic value.

Not Practicable to Estimate Fair Value:

Investments available for sale	Carrying Value	Effective Int Rate	Maturiy Date	Explanation
-	-	-	-	-

E. The Company holds ownership interest in limited partnerships which include alternatives investments, private equity, and venture capital and real estate investments. The company carries these interests based on the underlying audited GAAP equity of the investee, adjusted for certain provisions as described by SSAP 48, Joint Ventures, Partnerships and Limited Liability Companies or NAV. Our limited partnership investments are not liquid and most of the funds do restrict our ability to sell.

21. Other Items

A. Unusual or Infrequent Items

The Company had no unusual or infrequent events or transactions.

B. Troubled Debt Restructuring: Debtors

The Company had no troubled debt restructurings.

C. Other Disclosures

On March 29, 2018 CMS released guidance on the 2017 CSR reconciliation. The manual provided information on the process for reconciling the cost-sharing reduction component of the advance payments that QHP issuers have been paid through the September 2017 payment cycle against the cost-sharing reduction amounts those issuers provided to eligible Exchange enrollees for the entire 2017 benefit year to determine any charges owed to CMS. As a result of this new guidance, our Cost Sharing Payable was reduced to $70,782,885. This was an adjustment of $43,086,030 which reduced claims expense. We had determined that this amount is immaterial to our 2017 statutory financial statements overall and did not adjust our statutory financial statements. We made the adjustments in the first quarter of 2018.

D. Business Interruption Insurance Recoveries

The Company had no business interruption recoveries recognized.

E. State Transferable and Non-transferable Tax Credits

(1) Carrying Value of Transferable and Non-transferable State Tax Credits Gross of any Related Tax Liabilities and Total Unused Transferable and Non-transferable State Tax Credits by State in Total.

Description of State Transferable and Non-transferable Tax Credits	State	Carrying Value	Unused Amount
Non-transferable Tax credits	NC	$20,669,878	$190,845,704
Total		$20,669,878	$190,845,704

(2) Method of Estimating Utilization of Remaining Transferable and Non-transferable State Tax Credits

The Company estimated the utilization of the remaining transferable and non-transferable state tax credits by projecting future premium taking into account policy growth and rate changes, projecting future tax liability based on projected premium, tax rates and tax credits, and comparing projected future tax liability to the availability of remaining transferable and non-transferable state tax credits.

(3) Impairment Loss

The Company recognized an impairment loss of $0 related to the write-down as a result of impairment analysis of the carrying amount for state transferable and non-transferable tax credits.

(4) State Tax Credits Admitted and Non-admitted

	Total Admitted	Total Non-admitted
A. Transferable	$-	$-
B. Non-Transferable	$11,802,980	$8,866,898

G. Retained Assets

The Company did not have any retained assets.

H. Insurance-Linked Securities (ILS) Contracts

The Company did not have any ILS contracts.

22. Events Subsequent

Type I: Recognized Subsequent Events:

The Company has evaluated subsequent events through February 28, 2019, which is the date that the financial statements were available to be issued, for recognition or disclosure in our statutory financial statements. All of the effects of subsequent events that provide additional evidence about conditions that existed at the consolidated balance sheet date,

including the estimates inherent in the process of preparing the consolidated financial statements, are recognized in the consolidated financial statements. The Company does not recognize subsequent events that provide evidence about conditions that did not exist at the balance sheet date but arose after, but before the financial statements are available to be issued. In some cases, non-recognized subsequent events are disclosed to keep the financial statements from being misleading.

Type II: Non-recognized Subsequent Events:

On January 1, 2019, the Company would be subject to an annual fee under section 9010 of the Affordable Care Act (ACA). However, Enacted on January 22, 2018, along with continuing resolution legislation, H.R. 195, Division D – Suspension of Certain Health-Related Taxes, § 4003, suspends collection of the health insurers tax for the 2019 calendar year only. This annual fee is allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1, 2018.

		Current Year	Prior Year
A.	Did the reporting entity write accident and health insurance premium that is subjected to Section 9010 of the Federal Affordable Care Act?	Yes

33. Premium and Premium Equivalent Reporting

The information below presents Blue Cross NC ratios based on premium and premium equivalents. Premium equivalents are administrative fees earned from the Company's ASO and ASC Plans plus claims processed for this self-funded business. Medical loss, operating expense and net income ratios based on premiums and premium equivalents represent more complete financial ratios, as they include the total activities associated with the Company's business. Cost containment expenses are included in the operating expense ratio and excluded from the medical loss ratio. Premium taxes are included in the operating expense ratio. Ratios and certain dollar amounts below were calculated based on amounts obtained from within the Annual Statement filing.

Medical loss ratio (with premium equivalents)	86.2%
Operating expense ratio (with premium equivalents)	10.8%
Net income ratio (with premium equivalents)	3.3%

Premium equivalent ratios above are calculated as a percentage of premiums and premium equivalents for medical loss and operating expense ratios, and a percentage of total revenue (premium, premium equivalents, other revenues, and net investment gains) for net income ratio.
