

DRAFT Items for Consideration

2022 Essential Health Benefits Committee
February 25, 2020

Ideas for consideration:

Idea	Suggested by
Consider changes made by Illinois to address opioid crisis. Would these be appropriate for Oregon?	DFR
Review EHB formulary to ensure all types of FDA-approved insulin are included.	DFR
Remove exclusion of “chiropractic care” to ensure compliance with provider non-discrimination.	Verne Saboe
Increase limit on physical therapy visits from 30 to 60 and allow patient to choose among different provider types (similar to OHP Physical Medicine benefit).	Lisa Pool
Include coverage of spinal manipulation	Vern Saboe
Include health plan coverage of translation services, especially when provision of these services is required under ACA.	Maegan Culver

Other issues discussed

- Clarify the scope of genetic testing included in current EHB. One document indicated that genetic was not covered in the current benchmark, but it is not clear what that means. Is this all genetic testing (e.g. cancer) or a particular subset?
- Clarify whether TMJ is currently a covered benefit under Oregon’s pediatric dental EHB.
- Consider inclusion of value-based benefit design.
- Consider requiring pediatric dental benefits to be embedded (i.e. covered) under medical plans rather than allowing them to be covered under EHB dental plans. How would this impact plans that current don’t provide dental coverage?
